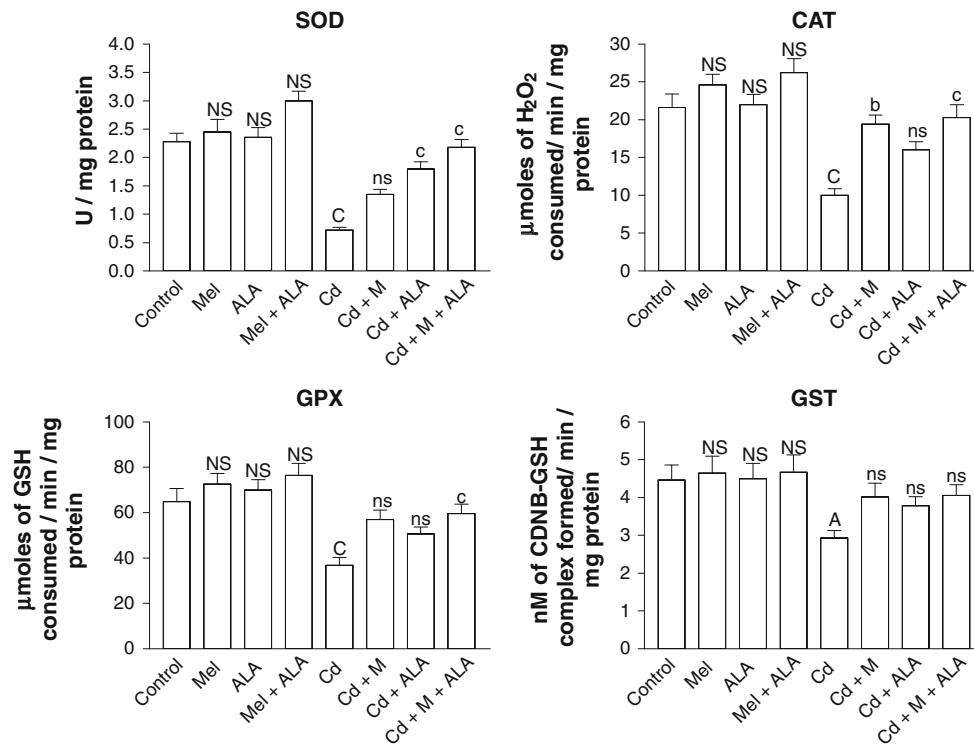

Fig. 3 Effect of simultaneous administration of melatonin + ALA combination on the status of enzymatic antioxidants in the heart of cadmium-treated animal. Values are expressed as mean \pm SEM for $n = 6$, where, C ($P < 0.001$) and NS non-significant when control

versus Mel, ALA, Mel + ALA, Cd and, a ($P < 0.05$), b ($P < 0.01$), C ($P < 0.001$) and ns non-significant when Cd versus Cd + M, Cd + ALA, Cd + M + ALA
