

# A GUIDE TO FIRST-PASSAGE PROCESSES

SIDNEY REDNER

*Boston University*

**CAMBRIDGE**  
**UNIVERSITY PRESS**

# Contents

<i>Preface</i>	<i>page</i>	vii
<i>Errata</i>		x
1	First-Passage Fundamentals	1
	1.1. What Is a First-Passage Process?	1
	1.2. Connection between First-Passage and Occupation Probabilities	5
	1.3. Probability Distribution of a One-Dimensional Random Walk	7
	1.4. Relation between Laplace Transforms and Real-Time Quantities	17
	1.5. Asymptotics of the First-Passage Probability	21
	1.6. Connection between First-Passage and Electrostatics	24
	1.7. Random Walks and Resistor Networks	33
	1.8. Epilogue	37
2	First Passage in an Interval	38
	2.1. Introduction	38
	2.2. Time-Dependent Formulation	40
	2.3. Time-Integrated Formulation	55
	2.4. Discrete-Space Random Walk	69
3	Semi-Infinite System	80
	3.1. The Basic Dichotomy	80
	3.2. Image Method	81
	3.3. Systematic Approach	93
	3.4. Discrete Random Walk	97
	3.5. Imperfect Absorption	106
	3.6. The Quasi-Static Approximation	113
4	Illustrations of First Passage in Simple Geometries	115
	4.1. First Passage in Real Systems	115
	4.2. Neuron Dynamics	117

4.3. Self-Organized Criticality	120
4.4. Kinetics of Spin Systems	131
4.5. First Passage in Composite and Fluctuating Systems	139
4.6. Interval with Spatially Variable Diffusion	150
4.7. The Expanding Cage	154
4.8. The Moving Cliff	161
5 Fractal and Nonfractal Networks	168
5.1. Beyond One Dimension	168
5.2. Cayley Tree	169
5.3. Hierarchical Three-Tree	172
5.4. Comb Structures	181
5.5. Hydrodynamic Transport	193
6 Systems with Spherical Symmetry	208
6.1. Introduction	208
6.2. First Passage between Concentric Spheres	208
6.3. First Passage to a Sphere	214
6.4. Time-Dependent First-Passage Properties	218
6.5. Reaction-Rate Theory	223
7 Wedge Domains	234
7.1. Why Study the Wedge?	234
7.2. Two-Dimensional Wedge	235
7.3. Three-Dimensional Cone	239
7.4. Conformal Transformations and Electrostatic Methods	241
7.5. First-Passage Times	245
7.6. Extension to Time-Dependent First-Passage Properties	250
8 Applications to Simple Reactions	252
8.1. Reactions as First-Passage Processes	252
8.2. Kinetics of the Trapping Reaction	254
8.3. Reunions and Reactions of Three Diffusing Particles	262
8.4. Diffusion-Controlled Reactions	272
8.5. Ballistic Annihilation	288
