Addendum: Anisotropic spheres in general relativity

by Sir Hermann Bondi

The paper 'Anisotropic spheres in general relativity' was published in Mon. Not. R. Astron. Soc. **259,** 365–368 (1992). In that paper, a number of references were unfortunately omitted. They all relate to the introductory section, as they deal with the subject in general and not with the specific problem addressed in the paper, although a remark after equation (21) in the paper by Cosenza et al. (1980) hints at its potential. The additional references to be added are set out below.

Chan R., Herrera L., Santos N. O., 1992, Class. Quantum Grav., 9, L133

Cosenza M., Herrera L., Esculpi M., Witten L., 1980, J. Math. Phys., 22, 118
