

ADVANCES IN CRYOGENIC ENGINEERING

Transactions of the
Cryogenic Engineering Conference—CEC

Spokane, Washington, USA 13 – 17 June 2011

VOLUME 57A

EDITORS

J.G. Weisend II, Chief Technical Editor

John Barclay

Susan Breon

Jonathan Demko

Michael DiPirro

Peter Kittel

Arkadiy Klebaner

Jennifer Marquardt

Gregory Nellis

Thomas Peterson

John Pfothenauer

Andrew Rowe

Steven Van Sciver

Sidney Yuan

Mark Zagarola

Al Zeller

All papers have been peer reviewed.

Advances in Cryogenic Engineering
Transactions of the Cryogenic Engineering Conference—CEC

Table of Contents

PART A

| | |
|---|-------|
| Preface: Advances in Cryogenic Engineering (Chief Technical Editor: J. G. Weisend) Al Zeller and Kenneth Marken | 1 |
| CEC Awards | P IC |
| In Memoriam | P IC |
| 2011 Cryogenic Engineering Conference Board | P IC |
| CEC Technical Editors | 10 |
| Acknowledgments | "P IC |

**100 YEARS OF SUPERCONDUCTING MATERIALS,
MACHINES, AND CRYOGENICS**

| | |
|--|----|
| Cryogenics for superconductors: Refrigeration, delivery, and preservation of the cold Venkatarao Ganni and James Fesmire | 15 |
|--|----|

THERMAL INSULATION SYSTEMS—I

| | |
|---|----|
| Improving MRI magnet thermal performance using variable density multilayer insulation Jalal Zia, William Rutherford, and William Einziger | 31 |
| Thermal performance of low layer density multilayer insulation using liquid nitrogen Wesley Johnson and James Fesmire | 39 |

| | |
|---|-----|
| Dependence of multi-layer insulation thermal performance on interstitial gas pressure | |
| Jeffrey Robert Feller and Wesley Johnson | 47 |
| Vibration considerations for cryogenic tanks using glass bubbles insulation | |
| Rudy John Werlink, James Fesmire, and Jared P. Sass | 55 |
| LARGE SCALE SYSTEMS—I | |
| Cryogenic studies for the proposed CERN large hadron electron collider (LHEC) | |
| F. Haug and The LHeC Study Team | 69 |
| Cryogenic requirements for the JT-60SA Tokamak | |
| Frederic Michel, D. Hitz, Christine Hoa, Valerie Lamaison, Koji Kamiya, Pascal Roussel, Manfred Wanner, and Kiyoshi Yoshida | 78 |
| First operational experience and performance optimization of the ATLAS magnet cryogenic system | |
| Nicolas Delruelle, Klaus Barth, Alexey Dudarev, Giorgio Passardi, and Herman ten Kate | 86 |
| Conceptual design of the FRIB cryogenic system | |
| J. G. Weisend II, Dana Arenius, Brad Bull, Chris Burns, Adam Fila, Patrick Kelley, Helmut Laumer, Thomas Mann, Allyn McCartney, S. Jones, and Al Zeller | 94 |
| Ras Laffan helium recovery unit 2 | |
| Eric Arnaud Fauve, Veronique Grabié, David Grillot, Franck Delcayre, and Cindy Deschildre | 102 |
| The cryogenic system for NEUROSPIN laboratory: Main features and Refrigerator commissioning | |
| Simon Crispel, Philippe Bredy, Florence Gratiot, David Grillot, H. Lannou, Christophe Mantileri, Gilles Flavien, Cindy Deschildre, and Thierry Roussel | 110 |

AEROSPACE CRYOCOOLERS

| | |
|--|-----|
| Future trends of AFRL cryocooler research Erin Pettyjohn | 121 |
| Modified methodology for technology trending: Case study of cryocooler efficiency Darryl Webb, Elaine Lim, Jeff Cha, and Sidney W. Yuan | 129 |
| On-Orbit performance of the TES pulse tube cryocooler system and the instrument - six years in space Jose Israel Rodriguez and Arthur Na-Nakornpanom | 137 |
| Qualification test results for the TIRS cryocooler Eric Marquardt, Wilfred Gully, Jennifer Marquardt, Robert Boyle, and Taylor Hale | 147 |
| Test results for a high capacity cryocooler with internal thermal storage Ted Bertele, Dave Glaister, Wilfred Gully, Paul Hendershott, Robert Levenduski, Eric Marquardt, and Colin Wilson | 154 |
| Very high capacity aerospace cryocooler Jeffrey Olson, Patrick Champagne, Eric Roth, and Ted Nast | 161 |

PULSE TUBE CRYOCOOLERS—I

| | |
|--|-----|
| Cryocoolers for aircraft superconducting generators and motors Ray Radebaugh | 171 |
| Co-Axial pulse tube for oxygen liquifaction Nick Emery, Alan Caughley, Neil Glasson, and J. Meier | 183 |
| Study of low vibration 4 K pulse tube cryocoolers Mingyao Xu, Kyosuke Nakano, Motokazu Saito, Hirokazu Takayama, Akihiro Tsuchiya, and Hiroki Maruyama | 190 |
| Study on G-M type pulse tube cryocooler with a novel active gas distribution system L. M. Qiu, C. Wang, Zhihua Gan, and W.Q. Dong | 198 |

Preliminary results of a single stage stirling-type pulse tube cooler for multi-hundred watt cooling power at 80 K
Lihong Yu, Wei Dai, Xiaotao Wang, Jianying Hu, and Ercang Luo 206

A novel Stirling type pulse tube cryocooler suppressing the third type of dc gas flow
Chao Gu, Hai Jin, Y. Zhou, Wenxiu Zhu, and Junjie Wang 214

HELIUM II PROPERTIES AND SYSTEMS

Modeling and development of a superfluid magnetic pump with no moving parts
Amir Eshraghniaie Jahromi, Franklin Miller, and Gregory Nellis 223

Steady-State heat transfer through micro-channels in pressurized He II
Pier Paolo Granieri, Bertrand Baudouy, Aurelian Four, F. Lentijo, Alessandro Mapelli, P. Petagna, and Davide Tommasini 231

Hydraulic characteristics and thermal counterflow in helium II forced flow through orifice plates
Hyung Jin Kim and Steven Van Sciver 239

A method for numerical simulation of superfluid helium
Christine Darve, Luca Bottura, N. A. Patankar, and Steven Van Sciver 247

Heat transfer through Rutherford superconducting cable with novel pattern of polyimide electrical insulation in pressurized superfluid helium environment
Maciej Chorowski, Jaroslaw Polinski, and Michal Strychalski 255

CRYOGENIC POWER CABLES

Evaluating cryostat performance for naval applications
David Knoll, Dag Willen, James Fesmire, Wesley Johnson, Jonathan Smith, Barry Meneghelli, Jonathan Demko, Daniel George, Brian Fowler, and Patti Huber 265

Liquid air as a coolant for thermal management of long-length HTS cable systems
Jonathan Demko and William Hassenzahl 273

| | |
|--|-----|
| Experimental study of counterflow cooling using a test loop to simulate the thermal characteristics of a HTS cable system | 283 |
| Jonathan Demko | |

THERMAL AND FLUID MANAGEMENT FOR AEROSPACE

| | |
|--|-----|
| Methane cryogenic heat pipe for space use with a liquid trap for on-off switching | 293 |
| Juan Cepeda-Rizo, Jose Israel Rodriguez, and David Bugby | |

| | |
|--|-----|
| Airborne earth-observing imaging spectrometers utilizing commercial cryocoolers | 301 |
| Christopher Paine, Juan Cepeda-Rizo, Michael Eastwood, Sven Geier, and Jason Zan | |

| | |
|--|-----|
| Large volume liquid helium relief device verification apparatus for the alpha magnetic spectrometer | 309 |
| Richard John Klimas, Peter McIntyre, John Colvin, John Zeigler, Steven Van Sciver, and Samuel Ting | |

| | |
|--|-----|
| Experimental and numerical investigation of reduced gravity slosh dynamics for the characterization of cryogenic launch and space vehicle propellants | 317 |
| Laurie Walls, Daniel Kirk, and Javier de Luis | |

AMR AND THERMOACOUSTIC COOLERS

| | |
|---|-----|
| A modeling study on the geometry of active magnetic regenerator | 327 |
| Jing Li, Takenori Numazawa, Koichi Mastumoto, Yoshinori Yanagisawa, and Hideki Nakagome | |

| | |
|--|-----|
| Numerical simulation for hydrogen magnetic refrigeration | 335 |
| Yiyin Zhu, Jing Li, Hideyuki Hattori, Koichi Matsumoto, Yoshinori Yanagisawa, Hideki Nakagome, and Takenori Numazawa | |

| | |
|--|-----|
| A high-efficiency traveling-wave thermoacoustic refrigerator for cryogenic cooling operation: thermodynamic design and preliminary experiment | 343 |
| Jia Ren, Ercang Luo, Liming Zhang, Jianying Hu, and Wei Dai | |

| | |
|---|-----|
| A standing-wave thermoacoustic engine driven by liquid nitrogen | 351 |
| K. Wang, L. M. Qiu, B. Wang, Daming Sun, Ping Lou, J.F. Rao, and X.J. Zhang | |

HYDROGEN AND PROPELLANT SYSTEMS

Operational characteristics of the helium refrigeration system at HANARO-CNS

Mun Lee, Ho Young Choi, Jae Sam Han, Sung Hwan Cho, Min Su Kim, Soon Ock Hur, Wu Jung Son, Guk Hoon Ahn, and In-Cheol Lim 361

Design of a compact type cryogenic accumulator to mitigate a pressure fluctuation caused by a sudden KW-order heat load

Hideki Tatsumoto, Tomokazu Aso, Kiichi Ohtsu, Toshiaki Uehara, H. Sakurayama, Y. Kawakami, T. Kato, and M. Futakawa 368

Diagnosis of a poorly performing liquid hydrogen bulk storage sphere

Angela Gray Krenn 376

Design of a solid hydrogen target cryostat for positron moderation studies

Chad Nixon and Jacob Leachman 384

Dynamic behavior of the cryogenic hydrogen system using only a heater control

Hideki Tatsumoto, Tomokazu Aso, Kiichi Ohtsu, H. Sakurayama, Y. Kawakami, and M. Futakawa 391

HEAT TRANSFER SYSTEMS

Flexible cryogenic thermosyphon

Dogan Celik and Thomas Painter 401

Effect of shroud temperature on performance of a cryogenic loop heat pipe

Ya'nan Zhao, Tao Yan, and Jingtao Liang 409

A 100-W grade closed-cycle thermosyphon cooling system used in HTS rotating machines

Brice Felder, Motohiro Miki, Keita Tsuzuki, Nobuyuki Shinohara, Hironao Hayakawa, and Mitsuru Izumi 417

Design of a thermosiphon for cooling low-background HPGe arrays

Estanislao Aguayo, James Fast, and Doug James Reid 425

PULSE TUBE CRYOCOOLERS—II

- The effect of component junction tapering on miniature cryocooler performance**
Ted Conrad, Mihir G. Pathak, S. Mostafa Ghiaasiaan, and Carl Kirkconnell 435
- Experimental studies of thermoacoustic drive for the development of a pulse tube cryocooler**
Bharatbhushan Vishnu Kamble, Biju T. Kuzhiveli, Srinivasan Kasthuriangan, Upendra Behera, V. Krishnamoorthy, N. M. Hariharan, and P. Sivashanmugam 443
- Numerical analysis on thermoacoustic prime movers for development of pulse tube cryocoolers**
Upendra Behera, Srinivasan Kasthuriangan, Mathew Skaria, K. A. Shafi, Bharatbhushan Vishnu Kamble, and Biju Kuzhiveli 451
- Onset behavior of standing wave thermoacoustic pressure wave generator**
Shreya Mehta, Keyur Desai, Hemant Bhimbhai Naik, and Milind Atrey 459
- Coupling research in the thermoacoustically driven pulse tube cooler**
Gang Zhou, Xin Huang, and Zhengyu Li 467
- Coupling of regenerator and end load in a standing wave thermoacoustic engine**
Xin Huang, Gang Zhou, Qing Li, and Zhongjun Hu 475

INSTRUMENTATION—I

- SRF test areas cryogenic system controls graphical user interface**
Brian Degraff, Gary Ganster, Arkadiy Klebaner, Andrey D. Petrov, and William Miles Soyars 485
- The CERN revamping project of the obsolete cryogenic control systems: Strategy and results**
Vitaliano Inglese, Marco Pezzetti, and Edouard Rogez 491

Calibration and linearity verification of capacitance type cryo level indicators using cryogenically multiplexed diode array
R. Karunanithi, Subhash Jacob, Abhay Singh Gour, M. Das,
Durgesh Shrikantiah Nadig, and M. V. N. Prasad 499

Directional oriented magnetic field induced temperature error of PT-500 sensor at cryogenic environment
Rajinikumar Ramalingam and Michael Schwartz 507

Reliability and stability of three cryogenic temperature sensor models subjected to accelerated thermal cycling
S. Scott Courts and John Krause 515

PULSE TUBE CRYOCOOLERS—III

Development of moving magnet type linear motor for dual piston compressor for pulse tube cryocooler
R. Karunanithi, Subhash Jacob, Abhay Singh Gour, C. Damu, and
M. Das 525

Development of high efficiency 4 K two-stage pulse tube cryocoolers with split valve unit
Kyosuke Nakano, Mingyao Xu, Hirokazu Takayama, Akihiro Tsuchiya,
and Motokazu Saito 532

Design of a large-capacity multi-piston pulse tube cryocooler
Jianning Hu, Ercang Luo, Zhanghua Wu, Guoyao Yu, and Wei Dai 540

Experimental investigation of a u-shape pulse tube cryocooler with one regenerator and two pulse tubes
Chuanlin Yin, Houlei Chen, Miguang Zhao, Qingsheng Fei, Jinghui Cai,
and Yali Li 547

Measurement and analysis of energy flow in Stirling-type pulse tube refrigerator
Taekyung Ki, Sangkwon Jeong, Mansu Seo, and Inmyong Park 555

CURRENT LEADS

Numerical model for conduction cooled current lead heat loads
Michael Joseph White, Heiner Brueck, and Xilong Wang 565

| | |
|--|-----|
| Hts tape-based multi-line current lead Michael Merker, Jean Delmas, and Robert Webber | 573 |
| Tests of copper and HTS leads with a two-stage pulse tube drop-in cooler Michael Green and Bert Wang | 581 |
| Using a single-stage GM cooler to augment the cooling of the shields and leads of a magnet cooled with two-stage coolers Michael Green and Steve Virostek | 589 |
| Performance test and thermal analysis of conduction-cooled optimized current leads at non-optimum operation Soumen Kar, Phaneendra Konduru, Rajesh Kumar, Manoj Kumar, Anup Choudhury, Ram Gopal Sharma, and Tripti Sekhar Datta | 597 |

HEAT TRANSFER—I

| | |
|--|-----|
| Development and test of a cryogenic pulsating heat pipe and a pre-cooling system Fabien Bonnet, Philippe Gully, and Vadim Nikolayev | 607 |
| Plate fin heat exchanger model with axial conduction and variable properties Benjamin Jacob Hansen, Michael Joseph White, and Arkadiy Klebaner | 615 |
| A method for estimating cryogenic cooling load in an infrared payload Jeff Cha and Ed Fong | 623 |
| Elongating axial conduction path design to enhance performance of cryogenic compact pche (printed circuit heat exchanger) Seungwhan Baek, Jinhyuck Kim, Gyuwan Hwang, and Sangkwon Jeong | 631 |

LTS SUPERCONDUCTING MAGNET SYSTEMS—I

| | |
|--|-----|
| Nb₃Sn Cable Development for the 11 T DS Dipole Demonstration Model Emanuela Barzi, Vito Lombardo, Alfred Nobrega, Daniele Turrioni, Ryuji Yamada, Alexander Zlobin, and Mikko Karppinen | 641 |
|--|-----|

| | |
|---|-----|
| Construction and component testing of TAMU3, a 14 Tesla stress-managed Nb₃Sn model dipole | |
| Eddie Frank Holik III, Chris Benson, Raymond Blackburn, Nick Diaczenko, Timothy Elliott, Andrew Jaisle, Alfred McInturff, Peter McIntyre, and Akhdiyov Sattarov | 649 |
| Quench Protection Challenges in Long Nb₃Sn Accelerator Magnets | |
| Tiina-Mari Salmi, Giorgio Ambrosio, S. Caspi, Guram Chlachidze, Marc Dhallé, Helene Felice, Paolo Ferracin, M. Marchevsky, G. Sabbi, and Herman ten Kate | 656 |
| STIRLING/G-M/JT COOLERS | |
| Novel diaphragm based Stirling cryocooler | |
| Alan Caughley, Alan Tucker, Michael Gschwendtner, and Mathieu Sellier | 667 |
| Scaling STI's sapphire cryocooler for applications requiring higher heat loads | |
| Abhijit Karandikar and Andreas Fiedler | 675 |
| Experimental investigations and improvements for the 10 K G-M refrigerator | |
| Xihuan Hao and Yonglin Ju | 683 |
| Temperature instability comparison of micro- and mesoscale Joule-Thomson cryocoolers employing mixed refrigerants | |
| Peter Bradley, Ray Radebaugh, R.J. Lewis, M.-H. Lin, and Y.C. Lee | 690 |
| Performance analysis of small capacity liquid nitrogen generator based on Joule-Thomson refrigerator coupled with air separation membrane | |
| Agnieszka Piotrowska-Hajnus and Maciej Chorowski | 698 |
| Investigations on two-phase heat exchanger for mixed refrigerant Joule-Thomson cryocooler | |
| Purushottam Ardhapurkar, Arunkumar Sridharan, and Milind Atrey | 706 |

HEAT TRANSFER—II

- Modeling of a vertical circulation open loop in two-phase helium**
Bertrand Baudouy 717
- Wall shape optimization for a thermosyphon loop featuring corrugated pipes**
Patricio I. Rosen Esquivel, Jan H.M. ten Thije Boonkkamp, Jacques A. M. Dam, and Robert M. M. Mattheij 724
- Experimental investigation of free convective heat transfer along inclined pipes in high-pressure cryogenic storage tanks**
Robin Langebach and Christoph Haberstroh 732
- Flow boiling heat transfer characteristics of hexafluoroethane in a horizontal tube**
S. Wang, Maoqiong Gong, G. F. Chen, J. F. Wu, Zhaohu Sun, and X. Zou 740
- Forced convection heat transfer of subcooled liquid hydrogen in horizontal tubes**
Hideki Tatsumoto, Yasuyuki Shirai, Masahiro Shiotsu, Koichi Hata, Yoshihiro Naruo, Hiroyuki Kobayashi, Yoshifumi Inatani, and K. Kinoshita 747

CRYOGENIC FUELS AND STORAGE

- Modified-Collins cryocooler for zero-boiloff storage of cryogenic fuels in space**
Charles L. Hannon, Brady Krass, Jake Hogan, and John Brisson 757
- Modeling and testing of cryo-adsorbent hydrogen storage tanks with improved thermal isolation**
Alexander William Raymond and Joseph Reiter 765
- Design, fabrication and testing of a liquid hydrogen fuel tank for a long duration aircraft**
Gary L. Mills, Brian Buchholtz, and Al Olsen 773

LARGE SCALE SYSTEMS—THEORY AND PROCESS

| | |
|--|-----|
| Theory of cascade refrigeration Hans H. Quack | 783 |
| Options for cryogenic load cooling with forced flow helium circulation Peter Knudsen, Venkatarao Ganni, and Roberto Than | 790 |
| Process options for nominal 2-K helium refrigeration system designs Peter Knudsen and Venkatarao Ganni | 800 |
| Dynamic gas bearing turbine technology in hydrogen plants Klaus Ohlig and Stefan Bischoff | 814 |
| Recent developments on Air Liquide advanced technologies turbines Franck Delcayre, Cecile Gondrand, Luc Drevard, Fabien Durand, and Gerard Marot | 820 |
| Remarks about efficient control of the cryogenic power of a helium refrigeration plant G. M. Gistau Baguer | 828 |
| Response to remarks regarding the optimal design and operation of helium refrigeration systems Venkatarao Ganni and P. Knudsen | 832 |

AEROSPACE COOLER COMPONENTS

| | |
|--|-----|
| Development of the cold end of a gravity-insensitive closed cycle dilution refrigerator Gunaranjan Chaudhry, Angela Volpe, Philippe Camus, Sebastian Triqueneaux, and Gerard Vermeulen | 837 |
| Nitrogen activated-carbon sorption compressor Nir Tzabar and Gershon Grossman | 845 |
| Heat switches providing low-activation power and quick-switching time for use in cryogenic multi-stage refrigerators Mark Oliver Kimball and Peter J. Shirron | 853 |

LTS SUPERCONDUCTING MAGNET SYSTEMS—II

| | |
|---|-----|
| Refurbishment and testing of the 1970's era LASS solenoid coils for Jlab's Hall D Joshua Ballard, George Herman Biallas, Paul Brindza, Thomas Carstens, Jonathan Creel, Hovanes Egiyan, Floyd Martin, Yi Qiang, Scot Spiegel, Mark Stevens, Mark Wissmann, and Elliott Wolin | 861 |
| Fabrication and test of 4M long Nb₃Sn quadrupole coil made of RRP-114/127 strand Rodger Bossert, Giorgio Ambrosio, Nikolai Andreev, Emanuela Barzi, Guram Chlachidze, Vadim Kashikhin, Michael Lamm, Alfred Nobrega, Igor Novitski, Darryl Orris, Mike Tartaglia, Daniele Turrioni, Ryuji Yamada, and Alexander Zlobin | 869 |
| Cryogenic system design of 11 GEV/C super high momentum spectrometer superconducting magnets at Jefferson Lab Eric Sun, Paul Brindza, Steven Lassister, and Mike Fowler | 877 |
| Mu2e production solenoid cryostat conceptual design Thomas H. Nicol, Vadim Kashikhin, Tom Page, and Thomas J. Peterson | 885 |
| Conceptual design of the Mu2e production solenoid cold mass Vadim Kashikhin, Giorgio Ambrosio, Nikolai Andreev, Michael Lamm, Nikolai Mokhov, Thomas H. Nicol, Tom Page, and Vitaly Pronskikh | 893 |
| Cryostat design and development for a superconducting undulator for the APS Joel Fuerst, Charles Doose, Quentin Hasse, Yury Ivanyushenkov, Matthew Kasa, Elizabeth Moog, John Pfothenauer, Daniel Potratz, Denise Skiadopoulos, Vasily Syrovatin, and Emil Trakhtenberg | 901 |
| Experimental studies on thermal behavior of 6 Tesla cryogen-free superconducting magnet system Soumen Kar, Phaneendra Konduru, Rajesh Kumar, Manoj Kumar, Anup Choudhury, Ram Gopal Sharma, and Tripti Sekhar Datta | 909 |
| Thermal design of an Nb₃Sn high field accelerator magnet Slawomir Pietrowicz and Bertrand Baudouy | 918 |

SRF—I

- Study of thermal radiation shields for the ILC cryomodule**
Norihito Ohuchi, Tug Arkan, Serena Barbanotti, Harry Carter, James Kerby, Hirotaka Nakai, Carlo Pagani, Thomas J. Peterson, Paolo Pierini, Kiyosumi Tsuchiya, Akira Yamamoto, and Zhanguo Zong 929
- Design and development of a new SRF cavity cryomodule for the ATLAS intensity upgrade**
Mark Kedzie, Zachary Conway, Joel Fuerst, Scott Gerbick, Michael Kelly, James Morgan, Peter Ostroumov, Michael O'Toole, and Kenneth Shepard 937
- Measurement of the dielectric properties of high-purity sapphire at 1.865 GHz from 2-10 Kelvin**
Nathaniel Johnston Pogue, Peter McIntyre, Akhdiyov Sattarov, and Charles Reece 945
- High-RRR thin-films of NB produced using energetic condensation from a coaxial, rotating vacuum ARC plasma (CEDTM)**
Enrique Francisco Valderrama, Colt James, Mahadevan Krishnan, Xin Zhao, Larry Phillips, Charles Reece, and Kang Seo 953
- New injector cryostat module based on 3 GHz SRF cavities for the S-Dalinac**
Thorsten Kuerzeder, Jens Conrad, Ralf Eichhorn, Florian Hug, Achim Richter, and Sven Sievers 961
- The injector cryomodule for E-Linac at TRIUMF**
Manir Ahammed, C.D. Beard, Alexey Koveshnikov, S.R. Koscielniak, Robert Laxdal, A. Mitra, M. Mondal, V. Naik, T. Ries, Igor Sekachev, and V. Zvyagintsev 969
- Phonon scattering in the thermal conductivity of large-grain superconducting niobium as a function of heat treatment temperature**
Saravan Kumar Chandrasekaran, Tom Bieler, Chris Compton, and Neil T. Wright 976

PART B

CABLES AND CURRENT LEADS

- Compact 8-lead unit for the SC correction coils of the SuperKEKB IR magnet system**
Zhanguo Zong, Narihito Ohuchi, Kiyosumi Tsuchiya, Norio Higashi, Masako Iwasaki, Hiroshi Yamaoka, and Masafumi Tawada 985
- Evaluation of turbo-Brayton cycle for cooling current leads: Integrated current lead/heat exchanger**
Leslie Bromberg, Philip Michael, Joseph Minervini, and Anthony Dietz 993
- Current distribution and re-distribution in HTS cables made from 2nd generation tapes**
Leslie Bromberg, Makoto Takayasu, Philip Michael, Joseph Minervini, and Anthony Dietz 1001
- Superconducting link bus design for the accelerator project for upgrade of LHC**
Alfred Nobrega, Jeff Brandt, Sergey Cheban, Sandor Feher, Mark Kaducak, Vadim Kashikhin, and Thomas J. Peterson 1009
- Optimization of Peltier current lead for applied superconducting systems with optimum combination of cryo-stages**
Toshio Kawahara, Masahiko Emoto, Hirofumi Watanabe, Makoto Hamabe, Jian Sun, Yury Ivanov, and Satarou Yamaguchi 1017
- Cryogenic lifetime tests on a commercial epoxy resin high voltage bushing**
S. W. Schwenterly, E. F. Pleva, and T. T. Ha 1025

PULSE TUBE CRYOCOOLERS—IV

- Miniature pulse tube cooler at 100Hz**
Houlei Chen, Nana Xu, Chuanlin Yin, Jinghui Cai, and Jingtao Liang 1033
- Development and experimental results on a 15 K high frequency pulse tube cold finger**
Jean-Marc Duval and Ivan Charles 1040

HEAT TRANSFER—III

- Two-phase frictional pressure drop of methane in a horizontal tube:
Experimental investigation and comparison with correlations**
G. F. Chen, Maoqiong Gong, S. Wang, J. F. Wu, X. Zou, and Zhaohu Sun 1051
- Transient heat transfer from a horizontal flat plate in a pool of liquid hydrogen**
Masahiro Shiotsu, Hiroto Kobayashi, Taiki Takegami, Yasuyuki Shirai, Hideki Tatsumoto, Koichi Hata, Hiroyuki Kobayashi, Yoshihiro Naruo, and Yoshifumi Inatani 1059
- DNB heat flux in forced flow of subcooled liquid hydrogen under pressures**
Yasuyuki Shirai, Masahiro Shiotsu, Hiroto Kobayashi, Taiki Takegami, Hideki Tatsumoto, Koichi Hata, Hiroyuki Kobayashi, Yoshihiro Naruo, Yoshifumi Inatani, and Katsuhiko Kinoshita 1067
- Nucleate pool boiling heat transfer characteristics of tetrafluoromethane and methane binary mixtures**
Yufeng WU, Maoqiong Gong, Li Ding, P. Guo, and J. F. Wu 1075
- ### SRF—II
- Status of cryogenic system for spallation neutron source's superconducting radiofrequency test facility at Oak Ridge National Lab**
Ting Xu, Fabio Casagrande, Venkatarao Ganni, Peter Knudsen, and William Herb Strong 1085
- Specification and design of a 2 K helium system for cryomodule and cavity tests at FRIB**
Cory S. Waltz, Steve Bricker, Chris Compton, A. Fila, Matt Johnson, S. Jones, Helmut Laumer, Allyn McCartney, John Popielarski, Laura Popielarski, J. G. Weisend II, Jon Wlodarczak, and Al Zeller 1092
- Test stands for testing serial XFEL accelerator modules**
Yury Bozhko, Vadim Anashin, Lyudmila Belova, Torsten Axel Boeckmann, Michail Kholopov, Valeriy Konstantinov, Bernd Petersen, Sergey Pivovarov, Eugeny Pyata, Detlef Sellmann, Xilong Wang, Anatoly Zhirnov, and Anatoly Zolotov 1100

| | |
|--|------|
| SRF cavity testing status and operating experience William Miles Soyars, Richard Bossert, Christine Darve, Brian Degraff, Andrew A. Dalesandro, Benjamin Jacob Hansen, Arkadiy Klebaner, Thomas H. Nicol, Liujin Pei, and Michael Joseph White | 1108 |
| Dynamics of a liquid helium I SRF cryostat at the Canadian Light Source Chris Regier | 1115 |
| Fermilab SRF cryomodule operational experience Alexander Martinez, Arkadiy Klebaner, Jay Theilacker, Brian Degraff, Michael Joseph White, and G. S. Johnson | 1123 |

COOLER COMPONENTS AND RELIABILITY

| | |
|--|------|
| Experimental study on neon refrigeration system using commercial helium compressor Junseok Ko, Hyobong Kim, Yong-Ju Hong, Hankil Yeom, Deuk-Yong Koh, and Seong-Je Park | 1133 |
| Second-law analysis and optimization of reverse brayton cycles of different configurations for cryogenic applications James Ryder Streit and Arsalan Razani | 1140 |
| The performance comparison of Oxford and triangle flexure bearings Wenjie Zhou, Longyi Wang, Zhihua Gan, Renzhuo Wang, L. M. Qiu, and John Pfothenauer | 1149 |
| Comparison of 1D and 2D flow numerical analysis applied to two stage pulse tube cryocooler G. B. Krishnappa, D. Madhu, and Srinivasan Kasthuriangan | 1157 |

NOVEL CONCEPTS AND INDUSTRY APPLICATIONS

| | |
|---|------|
| Coupled non-uniform bi-squid: A numerical investigation Patrick Longhini, Susan Berggren, Antonio Palacios, Visarath In, and Anna Leese de Escobar | 1167 |

THERMAL INSULATION SYSTEMS—II

An approach for measuring the thermal conductivity of in situ foamed insulated pipe transporting liquid nitrogen
Dong Xu, Heng Wu, Huiming Liu, Linghui Gong, Xiangdong Xu, and Laifeng Li 1271

Performance measurements of multilayer insulation at variable cold temperature
Thomas Funke and Christoph Haberstroh 1279

Development of experimental setup for study of adsorption characteristics of porous materials down to 4.2 K
Upendra Behera, Srinivasan Kasthuriangan, V. Krishnamoorthy, A. Senthil Kumar, Biju T. Kuzhiveli, and Ranjana Gangradey 1285

Wrapped multilayer insulation for cryogenic piping
Scott Dye, Alan Kopelove, and Gary L. Mills 1293

Heat shields: Materials and cost considerations
Mikell Lee Seely, Edward Bonnema, and Eileen Cunningham 1299

Thermal property of insulation material for HTS power cable
Yeon Suk Choi, D. L. Kim, D. W. Shin, and S. D. Hwang 1305

An apparatus to measure the apparent thermal conductivity of multilayer insulation (MLI)
Dogan Celik, Richard John Klimas, Steven Van Sciver, and Jalal Zia 1313

Thermal conductivity of spray-on foam insulations for aerospace applications
Matt Barrios, Mark Vanderlaan, and Steven Van Sciver 1319

INSTRUMENTATION—II

- Effects of room temperature aging on two cryogenic temperature sensor models used in aerospace applications**
S. Scott Courts and John Krause 1329
- Improved capacitive stress transducers for high-field superconducting magnets**
Christopher Pete Benson, Eddie Frank Holik III, Andrew Jaisle, Alfred McInturff, and Peter McIntyre 1337
- Operational experience and consolidations for the current lead control valves of the large hadron collider**
Antonio Perin, Krzysztof Brodzinski, Olivier Pirotte, Bernd Krieger, and Alexandre Widmer 1345
- Performance of classical Venturi tubes for application in cryogenic facilities**
Manfred Suesser 1353
- Dismountable sample holder apparatus for rapid thermal conductivity measurements based on cryocooler**
Huiming Liu, Dong Xu, Peng xu, Rongjin Huang, Xiangdong Xu, Laifeng Li, and Linghui Gong 1363

YBCO MAGNET DEVELOPMENT

- Effect of coil current sweep cycle and temperature change cycle on the screening current-induced magnetic field for YBCO-coated conductor coils**
Yoshinori Yanagisawa, Yasuaki Kominato, Hideki Nakagome, Tatsuhiko Fukuda, Takuya Takematsu, Tomoaki Takao, Masato Takahashi, and Hideaki Maeda 1373
- Insert coil test for HEP high field magnets using $\text{YBa}_2\text{Cu}_3\text{O}_{7-\delta}$ coated conductor tapes**
Vito Lombardo, Emanuela Barzi, Daniele Turrioni, and Alexander Zlobin 1381
- Driving stability of superconducting magnetic bearing system**
Ahmet Cansiz, Emin Argun Oral, and Omer Gundogdu 1389

LARGE SCALE SYSTEMS, FACILITIES, AND TESTING

First assessment of reliability data for the LHC accelerator and detector cryogenic system components

Goran Perinic, Serge Claudet, Irene Alonso-Canella, Christoph Balle, Klaus Barth, Jean-François Bel, Vladislav Benda, Johan Bremer, Krzysztof Brodzinski, Juan Casas-Cubillos, Giovanni Cuccuru, Michel Cugnet, Dimitri Delikaris, Nicolas Delruelle, Laetitia Dufay-Chanat, Caroline Fabre, Gerard Ferlin, Czeslaw Fluder, Emmauelle Gavard, Roger Girardot, F. Haug, Lionel Herblin, S. Junker, Tahar Klabi, Sigrid Knoops, Jean-Paul Lamboy, Dominique Legrand, Jos Metselaar, Adam Park, Antonio Perin, Marco Pezzetti, Gonzalo Penacoba Fernandez, Olivier Pirotte, Edouard Rogez, Antonio Suraci, Laura Stewart, Laurent Tavian, Antonio Tovar-Gonzales, Rob van Weelderen, Nicolas Vauthier, Bruno Vullierme, and Udo Wagner 1399

Operational experience with the supercritical helium during the TF coils tests campaign of SST-1

Rohitkumar Natvarlal Panchal, Rakesh Patel, Jignesh Tank, Gaurang Mahesuria, Dashrath Sonara, Vipul Tanna, Jayant Patel, G. L. N. Srikanth, Manoj Singh, Ketan Patel, Dickens Christian, Atul Garg, Nitn Bairagi, Manoj Kumar Gupta, Hiren Nimavat, Pankil Shah, Rajiv Sharma, and Subrata Pradhan 1407

ITER cryogenic system validation tests at HELIOS test facility

Roser Vallcorba-Carbonell, Bernard Rousset, Jean-Marc Poncet, Hyun-Sik Chang, Adrien Forgeas, Ryugi Maekawa, Luigi Serio, Patrick Bonnay, Michel Bon-Mardion, Alain Girard, Christine Hoa, Benjamin Lagier, Frederic Michel, and Pascal Roussel 1415

Possible cryogenic configurations for the superconducting magnets of the damping rings of the Compact Linear Collider (CLIC)

Antonio Perin, Yannis Papaphilippou, Stephan Russenschuck, and Daniel Schoerling 1425

Overview of the cryogenic system for the ariel e-linac at TRIUMF

Iouri Bylinskii, David Kishi, Alexey Koveshnikov, Robert Laxdal, Igor Sekachev, Alexandre Sitnikov, and Dimo Yosifov 1432

TAURUS II launch vehicle lox subcooler

|--|------|
| Using a multi-parameter monitoring methodology to predict failures in the cryogenic plant of the cold neutron source at Australia's OPAL reactor Weijian Lu and Russell Thiering | 1537 |
| Helium refrigerator maintenance and reliability at the OPAL cold neutron source Russell Thiering, David Taylor, and Weijian Lu | 1543 |
| RAMI analysis of the ITER cryoplant and cryodistribution systems Denis Henry, Julien Trouve, Chakrapani Chodimella, Nicolas Navion-Maillot, Francois Sagot, and Luigi Serio | 1551 |
| Risk analysis of the ITER cryogenic system Maciej Chorowski, Jaroslaw Fydrych, Maciej Grabowski, and Luigi Serio | 1559 |
| Experiment for transient effects of sudden catastrophic loss of vacuum on a scaled superconducting radio frequency cryomodule Andrew A. Dalesandro, Jay Theilacker, and Steven Van Sciver | 1567 |
| A survey of pressure vessel code compliance methods for superconducting radio frequency cryomodules Thomas J. Peterson, Hitoshi Hayano, Kay Jensch, Eiji Kako, Arkadiy Klebaner, John Mammosser, Axel Matheisen, Hirotaka Nakai, Thomas H. Nicol, Jay Theilacker, and Akira Yamamoto | 1575 |
| Intermediate quality control tests in the development of a superconducting RF cryomodule for CW operation Shrikant Pattalwar, Thomas Jones, John Strachan, Robert Bate, Phil Davies, and Peter McIntosh | 1583 |

PULSE TUBE CRYOCOOLERS—V

- High-frequency pulse tubes can't always be tipped**
Adam Bryce Berryhill and Philip Spoor 1593
- Experiments with linear compressors for phase shifting in pulse tube cryocoolers**
Michael Lewis, Peter Bradley, and Ray Radebaugh 1600
- Analytical model for a pulse tube cryocooler bellows phase shifter and experimental results**
Michael Cheadle, Gregory Nellis, and Sanford Klein 1608
- The performance of a linear compressor with triangle flexure bearings**
Wenjie Zhou, Longyi Wang, Zhihua Gan, L. M. Qiu, and John Pfothenauer 1616
- Performance testing of linear compressors with RC approach**
Longyi Wang, Wenjie Zhou, and Zhihua Gan 1624
- Performances of single and two-stage pulse tube cryocoolers under different vacuum levels with and without thermal radiation shields**
Srinivasan Kasthuriengan, Upendra Behera, Durgesh Shrikantiah Nadig, and V. Krishnamoorthy 1632
- A helium liquefier/recondenser using three pulse tube cryocoolers**
Chao Wang and Abner Oviedo 1640

HTS COOLING SYSTEMS

- Consideration of sub-cooled LN₂ circulation system for HTS power machines**
Shigeru Yoshida, Hirokazu Hirai, N. Nara, T. Nagasaka, M. Hirokawa, H. Okamoto, H. Hayashi, and Y. Shiohara 1649
- Installation and performance test of cooling system for HTS cable in ICHEON substation**
Ji Hyun Lim, H.S. Yang, Song Ho Sohn, S.R. Oh, Y.H. Kim, G.T. Lee, H.M. Jang, S.G. Lee, and Si Dole Hwang 1657
- Thermodynamic design of 10 kW Brayton cryocooler for HTS cable**
Ho-Myung Chang, C.W. Park, H.S. Yang, Song Ho Sohn, Ji Hyun Lim, S.R. Oh, and Si Dole Hwang 1664

Neon turbo-Brayton cycle refrigerator for HTS power machines
Hirokazu Hirai, M. Hirokawa, Shigeru Yoshida, N. Nara, S. Ozaki, H.
Hayashi, H. Okamoto, and Y. Shiohara 1672

Development of cryostat for 5 T HTS insert magnet
Yeon Suk Choi, D. L. Kim, and D. W. Shin 1680

CRYOGENIC SYSTEMS FOR ITER

Operation mode studies of the ITER cryodistribution system
Hyun-Sik Chang, Luigi Serio, Denis Henry, Michel Chalifour, and
Adrien Forgeas 1691

TIMO-2-A cryogenic test bed for the ITER cryosorption pumps
Horst Haas, Christian Day, and Friedhelm Herzog 1699

**Thermo-hydraulic analysis of cooldown for ITER toroidal field coils
from 80 K to 6 K**
Nan Peng, Lianyou Xiong, Liqiang Liu, Luigi Serio, and Liang Zhang 1706

**Thermal mechanical analysis on the ACB-CP valve box of ITER
cryogenic system**
Jiancheng Tang, Lianyou Xiong, Nan Peng, Yongcheng Jiang, Liqiang
Liu, and Liang Zhang 1714

Conceptual design of ACB-CP for ITER cryogenic system
Yongcheng Jiang, Lianyou Xiong, Nan Peng, Jiancheng Tang, Liqiang
Liu, and Liang Zhang 1720

LARGE SCALE SYSTEMS—II

The cryogenic system for the SCH and the 45 T hybrid at the NHMFL
Hongyu Bai, Mark Bird, Scott Hannahs, John Kynoch, and John Pucci 1729

Cryogenic adsorber design in a helium refrigeration system
Zhongjun Hu, Ning Zhang, Zhengyu Li, and Q. Li 1737

Dynamic modeling of a supercritical helium closed loop with the 4C code
Roberto Zanino, Roberto Bonifetto, Laura Savoldi Richard, and
Francesco Casella 1743

Performance validation of refrigeration recovery for experimental hall high target loads
Errol Yuksek, Peter Knudsen, Robert Norton, and Venkatarao Ganni 1751

INDUSTRIAL SCALE CRYOGENIC OPERATIONS

Experimental investigation of mobile small-scale liquefier for 10000 NM³/D of coal bed methane gas
Zhaohu Sun, J. F. Wu, Maoqiong Gong, and Ping Guo 1759

Fractional consumption of liquid hydrogen and liquid oxygen during the space shuttle program
Jonathan K. Partridge 1765

Liquid natural gas regasification combined with adsorbed natural gas filling system.
Eliza Anna Roszak and Maciej Chorowski 1771

Combined Brayton-JT cycles with refrigerants for natural gas liquefaction
Ho-Myung Chang, Jae Hoon Park, Sanggyu Lee, and Kun Hyung Choe 1779

J-T COOLERS

Optimization of the working fluid for a sorption-based Joule-Thomson cooler
Y. Wu, D.R. Zalewski, and Marcel ter Brake 1789

Characterization of sorption compressor for mixed refrigerant J-T cryocooler
Rohitkumar Mehta, Shridhar Bapat, and Milind Atrey 1797

Effects of environmental temperature on performance of the Joule-Thomson refrigerator
Yong-Ju Hong, Hyobong Kim, and Seong-Je Park 1805

DILUTION REFRIGERATORS AND REGENERATORS

- Application of cryocoolers to a vintage dilution refrigerator**
Richard L. Schmitt, Gary Smith, Mark Ruschman, and Jim Beaty 1815
- Cryogen-free dilution refrigerator with separate 1K cooling circuit.**
Kurt Uhlig 1823
- Exergy-Based figure of merit for regenerative and recuperative heat exchangers with application to multistage cryocoolers**
Arsalan Razani, Christopher Dodson, and Thomas Fraser 1830

PROPERTIES AND SYSTEMS

- Thermodynamic properties status of deuterium and tritium**
Ian Andrew Richardson and Jacob Leachman 1841
- Thermal conductivity of helium-3 between 3 mK and 300 K**
Yonghua Huang, Lei Fang, Xiaojian Wang, Ruzhu Wang, and Lie Xu 1849
- Apparatus for accurate density measurements of fluids based on a magnetic suspension balance**
Maoqiong Gong, Huiya Li, Hao Guo, Xueqiang Dong, and J. F. Wu 1857
- Performance of an ortho-para concentration measurement cryostat for hydrogen**
Juergen Essler and Christoph Haberstroh 1865

REGENERATORS AND COOLER MODELING

- Hydrodynamic and thermal effects of drag and heat transfer coefficients under laminar unsteady flow conditions in porous media**
Mihir G. Pathak, Thomas Mulcahey, and S. Mostafa Ghiaasiaan 1875
- Ideal thermodynamic processes of oscillatory-flow regenerative engines will go to ideal stirling cycle?**
Ercang Luo 1883
- Numerical simulations of oscillating flow and heat transfer in porous media by lattice boltzmann method**
Qunte Dai, Houlei Chen, and L.W. Yang 1891

A thermodynamic model for the effect of thermal boundary resistance on multistage thermoelectric cryogenic refrigerators
Arsalan Razani, Thomas Fraser, and Christopher Dodson 1899

Thermodynamic analysis and experimental verification on a novel looped pulse tube cryocooler
Xiaotao Wang, Ercang Luo, Wei Dai, Jianying Hu, and Yuan Zhou 1908

LARGE SCALE SYSTEMS—DISTRIBUTED SYSTEMS

Cryogenic distribution for the Facility for Rare Isotope Beams
S. Jones, Dana Arenius, Adam Fila, P. Geutschow, Helmut Laumer, Matt Johnson, Cory S. Waltz, and J. G. Weisend II 1919

Second law analysis and optimization of cryogenic transfer lines
Maciej Chorowski, Pawel Duda, Jaroslaw Fydrych, and Jaroslaw Polinski 1927

Preliminary system design and analysis of an optimized infrastructure for ITER prototype cryoline test
Nitin Dineshkumar Shah, Ritendra Nath Bhattacharya, Biswanath Sarkar, Satish Badgular, Hitensinh Vaghela, and Pratik Patel 1935

Forced flow supercritical helium in a closed heat transfer loop subjected to pulsed heat loads
Christine Hoa, Patrick Bonnay, Michel Bon-Mardion, Philippe Charvin, Jean-Noel Cheynel, Alain Girard, Benjamin Lagier, Frederic Michel, Lionel Monteiro, Jean-Marc Poncet, Pascal Roussel, Bernard Rousset, and Roser Vallcorba-Carbonell 1943

Adaptability of optimization concept in the context of cryogenic distribution for superconducting magnets of fusion machine
Biswanath Sarkar, Ritendra Nath Bhattacharya, Hitensinh Vaghela, Nitin Dineshkumar Shah, Ketan Choukekar, and Satish Badgular 1951

The experiments of 200-meter superconducting DC power cable in Chubu university and the estimation for longer cable cooling
Satarou Yamaguchi, Yury Ivanov, Jian Sun, Hirofumi Watanabe, Makoto Hamabe, Toshio Kawahara, and Atsuo Iiyoshi 1959

HEAT TRANSFER—SUPERCONDUCTING MAGNETS

| | |
|---|-------|
| Heat dissipation in accelerator superconducting cables with ceramic insulation in normal and supercritical helium Slawomir Pietrowicz, Aurelian Four, Bertrand Baudouy, Nobuhiro Kimura, and Akira Yamamoto | 1969 |
| Heat transfer through cyanate ester epoxy mix and epoxy TGPAP - DETDA electrical insulations at superfluid helium temperature Slawomir Pietrowicz, Aurelian Four, Simon Canfer, Stephanie Jones, and Bertrand Baudouy | 1976 |
| Effect of superfluid helium at the inner coil face on cooling and stability in superconducting accelerator magnets Erwin Bielert, Arjan Verweij, and Herman ten Kate | 1983 |
| A helium thermosiphon cooling loop for the APS superconducting undulator Daniel Potratz, John Pfothauer, Quentin Hasse, Yury Ivanyushenkov, Elizabeth Moog, and Robert Kustom | 1991 |
| Author Index | 1999 |
