Preface	ix
Chapter 1. Introduction to the Time Scales Calculus	1
<i>by Martin Bohner, Gusein Guseinov, and Allan Peterson</i>	
1.1. Basic Definitions	1
1.2. Differentiation	2
1.3. Mean Value Results	4
1.4. Integration	7
1.5. The Regressive Group	10
1.6. Alpha Dynamic Equations	12
Chapter 2. Some Dynamic Equations	17
<i>by Elvan Akin-Bohner and Martin Bohner</i>	
2.1. Introduction	17
2.2. Linear Equations	19
2.3. Euler Equations	23
2.4. Logistic Equations	30
2.5. The Regressive Vector Space	34
2.6. Bernoulli Equations	38
2.7. Riccati Equations	40
2.8. Clairaut Equations	43
Chapter 3. Nabla Dynamic Equations	47
<i>by Douglas Anderson, John Bullock, Lynn Erbe, Allan Peterson, and HoaiNam Tran</i>	
3.1. Introduction to Nabla Equations	47
3.2. The Nabla Exponential Function	49
3.3. Examples of Exponential Functions	55
3.4. Nonhomogeneous First Order Linear Equations	58
3.5. Wronskians	61
3.6. Nabla Hyperbolic and Trigonometric Functions	65
3.7. Reduction of Order	70
3.8. Nabla Riccati Equations	73

3.9. Regressive Matrices	73
3.10. Polynomials and Taylor's Formula	79
Chapter 4. Second Order Self-Adjoint Equations with Mixed Derivatives by <i>Kirsten Messer</i>	85
4.1. Introduction	85
4.2. Preliminary Results	85
4.3. Second Order Linear Dynamic Equations	92
4.4. Abel's Formula and Reduction of Order	96
4.5. Oscillation and Disconjugacy	100
4.6. The Riccati Equation	108
Chapter 5. Riemann and Lebesgue Integration by <i>Martin Bohner and Gusein Guseinov</i>	117
5.1. Introduction	117
5.2. The Riemann Delta and Nabla Integrals	118
5.3. Properties of the Riemann Integral	127
5.4. The Fundamental Theorem of Calculus	137
5.5. Mean Value Theorems for Integrals	142
5.6. Improper Integrals	145
5.6.1. Improper Integrals of First Kind	145
5.6.2. Examples	149
5.6.3. Improper Integrals of Second Kind	155
5.7. The Lebesgue Delta and Nabla Integrals	157
Chapter 6. Lower and Upper Solutions of Boundary Value Problems by <i>Elvan Akin-Bohner, Ferhan Merdivenci Atıcı, and Billür Kaymakçalan</i>	165
6.1. Introduction	165
6.2. Separated Boundary Value Problems	166
6.2.1. The Method of Upper and Lower Solutions	166
6.2.2. The Quasilinearization Method	169
6.2.3. Mixed Derivative Problems	175
6.3. Periodic Boundary Value Problems	177
6.3.1. The Method of Upper and Lower Solutions	177
6.3.2. The Quasilinearization Method	181
6.3.3. A Note on Reversed Order Upper and Lower Solutions	186
Chapter 7. Positive Solutions of Boundary Value Problems by <i>Douglas Anderson, Richard Avery, John Davis, Johnny Henderson, and William Yin</i>	189
7.1. Background	189
7.2. Eigenvalue Comparisons	189

7.2.1. Cones, u_0 -Positive Operators, and Krein–Rutman Theory	189
7.2.2. Eigenvalue Problems	191
7.3. Existence of at Least One Solution	194
7.3.1. Fixed Point Theory and Topological Transversality Methods	194
7.3.2. Intervals of Eigenvalues	210
7.4. Existence of at Least Two Solutions	225
7.4.1. Cone Expansion/Compression Methods	225
7.4.2. The Avery–Henderson Fixed Point Theorem and Applications	229
7.5. Existence of at Least Three Solutions	235
7.5.1. The Leggett–Williams Fixed Point Theorem	236
7.5.2. More General Triple Fixed Point Theorems	240
7.5.3. Applications to Boundary Value Problems	241
Chapter 8. Disconjugacy and Higher Order Dynamic Equations	251
<i>by Paul Eloe</i>	
8.1. Introduction	251
8.2. Initial Value Problems	252
8.3. Generalized Zeros of Higher Order	254
8.4. Wronskian Determinants	256
8.5. Interpolating Families of Functions	257
8.6. Disconjugacy	258
8.7. A Trench Factorization and Principal Solutions	264
8.8. A Boundary Value Problem and Green's Function	267
8.9. Monotone Methods	271
8.10. Open Problems	272
Chapter 9. Boundary Value Problems on Infinite Intervals	275
<i>by Ravi Agarwal, Martin Bohner, and Donal O'Regan</i>	
9.1. Introduction	275
9.2. Fixed Point Theory in Fréchet Spaces	275
9.3. Applications to Boundary Value Problems	279
9.4. Systems on Infinite Intervals	285
Chapter 10. Symplectic Dynamic Systems	293
<i>by Ondřej Došlý, Stefan Hilger, and Roman Hilscher</i>	
10.1. Introduction	293
10.2. Preliminaries	293
10.2.1. Symplectic Matrices and Matrix Notation	293
10.2.2. Symplectic Dynamic System	294
10.2.3. Conjoined Bases	295
10.3. Vector Solutions and Generalized Zeros	297

10.4. Riccati Operators, Quadratic Functionals, and Picone's Identity	299
10.4.1. Riccati Equations	299
10.4.2. Quadratic Functionals	300
10.4.3. Picone's Identity	304
10.5. First Results on Positive Definiteness	308
10.6. Sturmian Theorems	316
10.7. Quadratic Functionals with Boundary Conditions	318
10.7.1. Joint Boundary Conditions	318
10.7.2. Separated Boundary Conditions	321
10.8. Roundabout Theorem	328
10.9. Flow of Symplectic Systems	329
10.10. Prüfer Transformation	331
Bibliography	335
Index	345
