# Contents

<i>Contributors</i>	v
<i>Foreword</i>	vii
<i>Preface</i>	ix

## Part One Freshwater Ecosystems

1 Indicator algal assays: laboratory and field approaches F. R. TRAINOR	3
2 <i>In situ</i> and natural phytoplankton assemblage bioassays C. L. SCHELSKE	15
3 Qualitative characteristics of phytoplankton assemblages E. F. STOERMER	49

## Part Two Marine Ecosystems

4 Phytoplankton as indicators of sea water quality: bioassay approach and protocols S. Y. MAESTRINI, D. J. BONIN and M. R. DROOP	71
5 Test algae as indicators of sea water quality: prospects S. Y. MAESTRINI, M. R. DROOP and D. J. BONIN	133
6 The use of seaweeds for monitoring coastal waters H. G. LEVINE	189

## Part Three Terrestrial Ecosystems

7 The use of algae as indicators of soil fertility A. E. PIPE and L. E. SHUBERT	213
--	-----

## Part Four Toxic Substances, Heavy Metals and Vitamins

8 The effect of environmental contaminants on aquatic algae T. P. BOYLE	237
9 Algae as monitors of heavy metals B. A. WHITTON	257

10	Algal assays for vitamins D. G. SWIFT	281
<b>Part Five Industrial Applications</b>		
11	Utilization of algal cultures and assays by industry M. T. ELNABARAWY and A. N. WELTER	317
12	Algal bioassays of industrial and energy process effluents G. E. WALSH and R. G. MERRILL	329
<b>Part Six Modelling</b>		
13	Synthetic microcosms as biological models of algal communities F. B. TAUB	363
14	Simulating the effects of increased temperature in a plankton ecosystem: a case study V. H. DALE and G. L. SWARTZMAN	395
	<i>Subject Index</i>	429
