Contents

PART I	MATRIX THEORY	1
1	PRELIMINARIES FROM THE THEORY OF MATRICES	3
1.1	Similarity and the complex Jordan form	3
1.2	Invariant subspaces	9
1.3	Projectors and invariant subspaces	13
1.4	Real matrices and canonical forms	16
1.5	Square roots of definite matrices	20
1.6	Regular matrix pencils	22
1.7	Functions of matrices	26
1.8	Exercises	29
1.9	Notes	30
2	INDEFINITE SCALAR PRODUCTS	31
2.1	Definitions and classifications of subspaces	31
2.2	Selfadjoint and unitary matrices	36
2.3	Canonical forms for H -selfadjoint and H -unitary matrices	41
2.4	Invariant nonnegative subspaces	46
2.5	Invariant neutral subspaces	52
2.6	H -symmetric matrices	55
2.7	H -skew-symmetric matrices	60
2.8	H -self-adjoint pencils	62
2.9	H -unitary pencils	64
2.10	Exercises	68
2.11	Notes	70

3	SKEW-SYMMETRIC SCALAR PRODUCTS	71
3.1	Definitions and basic properties	71
3.2	H -skew-symmetric matrices	74
3.3	Invariant neutral subspaces	78
3.4	Connections between sign characteristics	79
3.5	Skew-symmetric and orthogonal pencils	80
3.6	Exercises	82
3.7	Notes	82
4	MATRIX THEORY AND CONTROL	83
4.1	Controllable pairs	83
4.2	Observable pairs	86
4.3	Two characterizations of controllable pairs	87
4.4	Stabilizable and detectable pairs	89
4.5	The control normal form	92
4.6	Real matrix pairs	95
4.7	Exercises	95
4.8	Notes	96
5	LINEAR MATRIX EQUATIONS	97
5.1	The Kronecker product	97
5.2	Linear equations in matrices	99
5.3	Lyapunov and symmetric Stein equations	101
5.4	Continuous and analytic dependence	105
5.5	Notes	106
6	RATIONAL MATRIX FUNCTIONS	107
6.1	Realizations of rational matrix functions	107
6.2	Partial multiplicities and minimal realizations	113
6.3	Locally minimal realizations	116
6.4	Minimal factorization for rational matrix functions	122
6.5	Nonnegative rational matrix functions	130
6.6	Rational matrix functions which are hermitian on the unit circle	137
6.7	The real case	141
6.8	Exercises	144
6.9	Notes	145

PART II	CONTINUOUS ALGEBRAIC RICCATI EQUATIONS	147
7	GEOMETRIC THEORY: THE COMPLEX CASE	149
7.1	Solutions and invariant subspaces	149
7.2	Symmetric equations and invariant semidefinite subspaces	151
7.3	Existence of hermitian solutions and partial multiplicities	158
7.4	Special and hermitian solutions	167
7.5	Extremal solutions	168
7.6	Partial order	177
7.7	Continuity	184
7.8	Analyticity	189
7.9	Relaxing the controllability condition	192
7.10	The LQR form and matrix pencils	200
7.A	Appendix: the metric space of subspaces	205
7.11	Exercises	210
7.12	Notes	212
8	GEOMETRIC THEORY: THE REAL CASE	215
8.1	Solutions and invariant subspaces	215
8.2	Existence of symmetric solutions	221
8.3	Special and extremal symmetric solutions	222
8.4	Partial order, continuity, and analyticity	223
8.5	Relaxing the controllability assumption	226
8.6	The pencil approach	227
8.7	Exercises	228
8.8	Notes	229
9	CONSTRUCTIVE EXISTENCE AND COMPARISON THEOREMS	231
9.1	Comparison theorems	231
9.2	The rate of convergence	236
9.3	Stabilizing and almost stabilizing solutions	238
9.4	Comparison theorems: the LQR form	241
9.5	The real case	244
9.6	Exercises	244
9.7	Notes	245

10	HERMITIAN SOLUTIONS AND FACTORIZATIONS OF RATIONAL MATRIX FUNCTIONS	247
10.1	Nonnegative rational matrix functions	247
10.2	The real case	253
10.3	Notes	256
11	PERTURBATION THEORY	257
11.1	Existence of hermitian solutions	257
11.2	Extremal solutions: continuous dependence	260
11.3	Extremal solutions: analytic dependence	263
11.4	The real case	266
11.5	Exercises	266
11.6	Notes	267
PART III DISCRETE ALGEBRAIC RICCATI EQUATIONS		269
12	GEOMETRIC THEORY FOR THE DISCRETE ALGEBRAIC RICCATI EQUATION	271
12.1	Preliminaries	271
12.2	Hermitian solutions and invariant Lagrangian subspaces	273
12.3	Description of solutions in terms of invariant subspaces	280
12.4	Positive definiteness of Ψ and existence of hermitian solutions	283
12.5	Relaxing the controllability condition	291
12.6	A more general DARE	295
12.7	The real case	301
12.8	Exercises	303
12.9	Notes	306
13	CONSTRUCTIVE EXISTENCE AND COMPARISON THEOREMS	307
13.1	Existence of maximal hermitian solutions	307
13.2	The rate of convergence	313
13.3	Comparison theorems	315
13.4	Inequalities for partitioned matrices	319
13.5	Stabilizing and positive semidefinite solutions	324
13.6	Exercises	327
13.7	Notes	327

14	PERTURBATION THEORY FOR DISCRETE ALGEBRAIC RICCATI EQUATIONS	329
14.1	Existence of hermitian solutions	329
14.2	Extremal solutions	330
14.3	Notes	332
15	DISCRETE ALGEBRAIC RICCATI EQUATIONS AND MATRIX PENCILS	333
15.1	The DARE and a symplectic matrix pencil	333
15.2	The DARE and a dilated matrix pencil	336
15.3	Stabilizing solutions	339
15.4	The real case	342
15.5	Exercises	344
15.6	Notes	345
	PART IV APPLICATIONS AND CONNECTIONS	347
16	LINEAR-QUADRATIC REGULATOR PROBLEMS	349
16.1	The optimization problem	349
16.2	Properties of the cost functional	351
16.3	Finding an optimal control	357
16.4	The differential and algebraic Riccati equations	359
16.5	The cost functional for the discrete LQR problem	362
16.6	Solution of the discrete LQR problem	366
16.7	Exercises	369
16.8	Notes	369
17	THE DISCRETE KALMAN FILTER	371
17.1	Some concepts and results concerning random vectors	372
17.2	Statement of the problem	375
17.3	The recursive process	377
17.4	Discussion	379
17.5	Time-invariant filters and a Riccati equation	380
17.6	Properties of the observer system	384
17.7	Exercises	385
17.8	Notes	385

18	THE TOTAL LEAST SQUARES TECHNIQUE	387
18.1	The total least squares problem	388
18.2	Total least squares with a symmetry constraint	391
18.3	Notes	395
19	CANONICAL FACTORIZATION	397
19.1	Canonical factorization in geometric terms	397
19.2	The real case	403
19.3	Spectral factorization	404
19.4	Notes	407
20	H^∞ CONTROL PROBLEMS	409
20.1	The bounded real lemma	410
20.2	An H^∞ control problem with state feedback	412
20.3	H^∞ filtering using state estimation	417
20.4	Notes	418
21	CONTRACTIVE RATIONAL MATRIX FUNCTIONS	421
21.1	Realizations of strict contractions	421
21.2	Inertia of solutions of a "CARE" and poles of strict contractions	426
21.3	Relaxing the minimality of realizations	428
21.4	Minimal unitary completions	430
21.5	The real case	433
21.6	Notes	435
22	THE MATRIX SIGN FUNCTION	437
22.1	Matrix sign function: definition and basic properties	438
22.2	Connection with the Riccati equation	440
22.3	The sign function and the DARE	444
22.4	The real case	445
22.5	Exercises	446
22.6	Notes	446
