

### Supplement: Complete Results of Multiple Logistic Regression and Classification and Regression Tree Models

Supplementary Table S.1. Complete results of multiple logistic regression (MLR) and classification and regression tree (CART) models in the D1 (all 359 lakes) scenario, including lake name, MLR and CART residuals, residual ranks, and mean rank value. Current Cisco lakes are highlighted in bold italics. Alternate lake names and/or additional descriptors (for multiple lakes with the same name in the same county) are provided in parentheses.

Lake name	County	MLR residual	MLR rank	CART residual	CART rank	Mean rank
Adams	Lagrange	-1.627	1	-0.308	1	1
Pretty	Lagrange	-1.492	2	-0.308	1	1.5
Round	Whitley	-1.369	3	-0.308	1	2

Supplementary Table S.2. Complete results of MLR and CART models in the D2 (Cisco lakes only) scenario, including lake name, MLR and CART residuals, residual ranks, and mean rank value. Current Cisco lakes are highlighted in bold italics. Alternate lake names and/or additional descriptors (for multiple lakes with the same name in the same county) are provided in parentheses.

Lake name	County	MLR residual	MLR rank	CART residual	CART rank	Mean rank
Green	Steuben	-1.349	1	-0.571	1	1
Atwood	Lagrange	-0.864	4	-0.571	1	2.5
