An Enhanced Spatial Smoothing Technique With ESPRIT Algorithm for Direction of Arrival Estimation in Coherent Scenarios — [Source link](#)

Jingjing Pan, Meng Sun, Yide Wang, Xiaofei Zhang

Institutions: Nanjing University of Aeronautics and Astronautics, University of Nantes

Published on: 18 May 2020 - IEEE Transactions on Signal Processing (Institute of Electrical and Electronics Engineers (IEEE))

Topics: Smoothing, Signal subspace, Covariance, Direction of arrival and Subspace topology

Submitted on 16 Jun 2020

HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.
