<i>Preface</i>	<i>page ix</i>
1 CLOSE BINARY STARS: A HISTORICAL REVIEW	1
1.1 Introduction	1
1.2 General results from binary stars	3
1.3 The historical context	7
1.4 Methods of analysis for close binary stars	17
1.5 Types of binaries: Present-day terminology	19
1.6 Evolutionary processes for binary stars	21
1.7 Summary	28
2 TWO-BODY ORBITAL MOTION	29
2.1 Introduction	29
2.2 Newtonian gravitation	29
2.3 Relationships between barycentric and relative orbits	34
2.4 Orbital speed as a function of position	35
2.5 Position as a function of time: Kepler's equation	37
2.6 Total angular momentum and energy: Orientation of the orbit	39
2.7 Applications to spectroscopic binaries	41
2.8 Applications to pulsar binaries	46
2.9 Applications to spatially resolved binaries	49
2.10 Applications to heliocentric corrections	52
3 THE DETERMINATION OF ORBITS	57
3.1 Introduction	57
3.2 Orbits from radial velocities: Spectroscopic binaries	57
3.3 Orbits from sources of pulsed radiation	99
3.4 Orbits from astrometric observations: Resolved binaries	111
3.5 Orbits from polarimetric observations	123
3.6 Combined solutions	128
4 PERTURBATIONS, THE ROCHE MODEL, AND MASS EXCHANGE/LOSS	130
4.1 Introduction	130
4.2 General perturbations	131
4.3 The Roche model for binary stars	156
4.4 Mass exchange/loss	162
4.5 Observed changes in orbital periods	169

5	PHOTOMETRY AND POLARIMETRY: STELLAR SIZES AND SHAPES	178
5.1	Introduction	178
5.2	Flux densities, magnitudes, and colour indices	179
5.3	Photometric systems and spectrophotometry	183
5.4	Ground-based photometric observations and reductions	205
5.5	Light curves of eclipsing and non-eclipsing binaries	214
5.6	Polarimetry and spectropolarimetry	274
6	MASSES AND ABSOLUTE DIMENSIONS FOR STARS IN BINARIES	279
6.1	Introduction	279
6.2	Detached binaries	282
6.3	Semidetached binaries	287
6.4	Contact binaries	291
6.5	Cataclysmic variables and related systems	294
6.6	X-ray binaries, black-hole binaries, and pulsar binaries	297
6.7	Other evolved binaries	299
7	THE IMAGING OF STELLAR SURFACES AND ACCRETION STRUCTURES	302
7.1	Introduction	302
7.2	Image reconstruction	304
7.3	Boundary layers in accreting CVs and x-ray binaries	337
7.4	Outflows (winds, jets, ejecta) from binary stars	341
	<i>Problems</i>	345
	<i>Outline Answers</i>	352
	<i>Bibliography</i>	355
	<i>Index</i>	373
