# Contents

	<b>Introduction from a Physicist's Viewpoint</b> .....	1
<b>1</b>	<b>Manifolds</b> .....	7
	1.1 Generalities .....	7
	1.2 Complex Manifolds .....	9
	1.3 The Classification Problem .....	13
	Hints for Further Reading .....	14
<b>2</b>	<b>Topology of Riemann Surfaces</b> .....	17
	2.1 Fundamental Group .....	17
	2.2 Simplicial Homology .....	21
	2.3 Universal Covering Space .....	28
	Hints for Further Reading .....	29
<b>3</b>	<b>Analytic Structure</b> .....	31
	3.1 Holomorphic and Meromorphic Functions .....	31
	3.2 Divisors and the Theorem of Riemann–Roch .....	35
	3.3 Meromorphic Functions on the Torus .....	38
	Hints for Further Reading .....	41
<b>4</b>	<b>Differentials and Integration</b> .....	43
	4.1 Tangent Space and Differentials .....	43
	4.2 Differential Forms of Second Order .....	48
	4.3 Integration .....	50
	Hints for Further Reading .....	52
<b>5</b>	<b>Tori and Jacobians</b> .....	53
	5.1 Higher Dimensional Tori .....	53
	5.2 Jacobians .....	55
	Hints for Further Reading .....	59

<b>6</b>	<b>Projective Varieties</b> . . . . .	61
	6.1 Generalities . . . . .	61
	6.2 Embedding of One-Dimensional Tori . . . . .	65
	6.3 Theta Functions . . . . .	67
	Hints for Further Reading . . . . .	69
<b>7</b>	<b>Moduli Spaces of Curves</b> . . . . .	71
	7.1 The Definition . . . . .	71
	7.2 Methods of Construction . . . . .	74
	7.3 The Geometry of the Moduli Space and Its Compactification . . . . .	78
	Hints for Further Reading . . . . .	85
<b>8</b>	<b>Vector Bundles, Sheaves and Cohomology</b> . . . . .	87
	8.1 Vector Bundles . . . . .	87
	8.2 Sheaves . . . . .	91
	8.3 Cohomology . . . . .	95
	Hints for Further Reading . . . . .	100
<b>9</b>	<b>The Theorem of Riemann–Roch for Line Bundles</b> . . . . .	103
	9.1 Divisors and Line Bundles . . . . .	103
	9.2 An Application: The Krichever–Novikov Algebra . . . . .	109
	Hints for Further Reading . . . . .	117
<b>10</b>	<b>The Mumford Isomorphism on the Moduli Space</b> . . . . .	119
	10.1 The Mumford Isomorphism . . . . .	119
	10.2 The Grothendieck–Riemann–Roch Theorem . . . . .	125
	Hints for Further Reading . . . . .	131
<b>11</b>	<b>Modern Algebraic Geometry</b> . . . . .	133
	11.1 Varieties . . . . .	133
	11.2 The Spectrum of a Ring . . . . .	139
	11.3 Homomorphisms . . . . .	146
	11.4 Noncommutative Spaces . . . . .	149
	Hints for Further Reading . . . . .	153
<b>12</b>	<b>Schemes</b> . . . . .	155
	12.1 Affine Schemes . . . . .	155
	12.2 General Schemes . . . . .	159
	12.3 The Structure Sheaf $\mathcal{O}_R$ . . . . .	162
	12.4 Examples of Schemes . . . . .	164
	Hints for Further Reading . . . . .	167

**13 Hodge Decomposition and Kähler Manifold** . . . . . 169

13.1 Some Introductory Remarks on Mirror Symmetry . . . . . 169

13.2 Compact Complex Manifolds and Hodge Decomposition . . . . . 171

13.3 Kähler Manifolds . . . . . 177

13.4 Hodge Numbers of the Projective Space . . . . . 181

Hints for Further Reading . . . . . 182

**14 Calabi-Yau Manifolds and Mirror Symmetry** . . . . . 183

14.1 Calabi-Yau Manifolds . . . . . 183

14.2 K3 Surfaces, Hypersurfaces and Complete Intersections . . . . . 187

14.3 Geometric Mirror Symmetry . . . . . 192

14.4 Example of a Calabi-Yau Three-fold and Its Mirror: Results  
of Givental . . . . . 196

Hints for Further Reading . . . . . 200

**Appendix  $p$ -adic Numbers** . . . . . 203

**Index** . . . . . 213
