

D. Bump
J.W. Cogdell
E. de Shalit
D. Gaitsgory
E. Kowalski
S.S. Kudla

An Introduction to the Langlands Program

Joseph Bernstein
Stephen Gelbart
Editors

Birkhäuser
Boston • Basel • Berlin

Contents

Preface	vii
1. Elementary Theory of L -Functions I <i>E. Kowalski</i>	1
2. Elementary Theory of L -Functions II <i>E. Kowalski</i>	21
3. Classical Automorphic Forms <i>E. Kowalski</i>	39
4. Artin L Functions <i>Ehud de Shalit</i>	73
5. L -Functions of Elliptic Curves and Modular Forms <i>Ehud de Shalit</i>	89
6. Tate's Thesis <i>Stephen S. Kudla</i>	109
7. From Modular Forms to Automorphic Representations <i>Stephen S. Kudla</i>	133
8. Spectral Theory and the Trace Formula <i>Daniel Bump</i>	153
9. Analytic Theory of L -Functions for GL_n <i>J.W. Cogdell</i>	197
10. Langlands Conjectures for GL_n <i>J.W. Cogdell</i>	229
11. Dual Groups and Langlands Functoriality <i>J.W. Cogdell</i>	251
12. Informal Introduction to Geometric Langlands <i>D. Gaitsgory</i>	269
