CONTENTS

PREFACE TO THE IEEE PRESS EDITION	ix
PREFACE	x
ERRATA	xi
CHAPTER 1. INTRODUCTION	1
1-1. Communications Systems and Statistics, 1-2. The Book	
CHAPTER 2. PROBABILITY	5
2-1. Introduction, 2-2. Fundamentals, 2-3. Joint Probabilities, 2-4. Conditional Probabilities, 2-5. Statistical Independence, 2-6. Examples, 2-7. Problems	
CHAPTER 3. RANDOM VARIABLES AND PROBABILITY DISTRIBUTIONS	19
3-1. Definitions, 3-2. Probability Distribution Functions, 3-3. Discrete Random Variables, 3-4. Continuous Random Variables, 3-5. Statistically Independent Random Variables, 3-6. Functions of Random Variables, 3-7. Random Processes, 3-8. Problems	
CHAPTER 4. AVERAGES	45
4-1. Statistical Averages, 4-2. Moments, 4-3. Characteristic Functions, 4-4. Correlation, 4-5. Correlation Functions, 4-6. Convergence, 4-7. Integrals of Random Processes, 4-8. Time Averages, 4-9. Problems	
CHAPTER 5. SAMPLING	76
5-1. Introduction, 5-2. The Sample Mean, 5-3. Convergence of the Sample Mean, 5-4. The Central Limit Theorem, 5-5. Relative Frequency, 5-6. Problems	
CHAPTER 6. SPECTRAL ANALYSIS	87
6-1. Introduction, 6-2. The Spectral Density of a Periodic Function, 6-3. Spectral Density of a Periodic Random Process, 6-4. Orthogonal Series Expansion of a Random Process, 6-5. Spectral Density for an Arbitrary Function, 6-6. Spectral Analysis of a Wide-sense Stationary Random Process, 6-7. Cross-spectral Densities, 6-8. Problems	

CHAPTER 7. SHOT NOISE	112
7-1. Electronics Review, 7-2. The Probability Distribution of Electron-emission Times, 7-3. Average Current through a Temperature-limited Diode, 7-4. Shot-noise Spectral Density for a Temperature-limited Diode, 7-5. Shot-noise Probability Density for a Temperature-limited Diode, 7-6. Space-charge Limiting of Diode Current, 7-7. Shot Noise in a Space-charge-limited Diode, 7-8. Shot Noise in Space-charge-limited Triodes and Pentodes, 7-9. Problems	
CHAPTER 8. THE GAUSSIAN PROCESS	145
8-1. The Gaussian Random Variable, 8-2. The Bivariate Distribution, 8-3. The Multivariate Distribution, 8-4. The Gaussian Random Process, 8-5. The Narrow-band Gaussian Random Process, 8-6. Sine Wave plus Narrow-band Gaussian Random Process, 8-7. Problems	
CHAPTER 9. LINEAR SYSTEMS	171
9-1. Elements of Linear-system Analysis, 9-2. Random Inputs, 9-3. Output Correlation Functions and Spectra, 9-4. Thermal Noise, 9-5. Output Probability Distributions, 9-6. Problems	
CHAPTER 10. NOISE FIGURE	204
10-1. Definitions, 10-2. Noise Figure, 10-3. Cascaded Stages, 10-4. Example, 10-5. Problems	
CHAPTER 11. OPTIMUM LINEAR SYSTEMS	219
11-1. Introduction, 11-2. Smoothing and Predicting of Stationary Inputs Using the Infinite Past, (Wiener Theory), 11-3. Pure Prediction: Non-deterministic Processes, 11-4. Solution of the Equation for Predicting and Filtering, 11-5. Other Filtering Problems Using Least-mean-square Error Criterion, 11-6. Smoothing and Predicting with a Finite Observation Time, 11-7. Maximising Signal-to-Noise Ratio: The Matched Filter, 11-8. Problems	
CHAPTER 12. NONLINEAR DEVICES: THE DIRECT METHOD	250
12-1. General Remarks, 12-2. The Square-law Detector, 12-3. The Square-law Detector: Signal-plus-Noise Input, 12-4. The Half-wave Linear Detector, 12-5. Problems	
CHAPTER 13. NONLINEAR DEVICES: THE TRANSFORM METHOD	277
13-1. The Transfer Function, 13-2. ν th-Law Devices, 13-3. The Output Autocorrelation Function, and Spectral Density 13-4. The Output Spectral Density, 13-5. Narrow-band Inputs, 13-6. ν th-law Detectors, 13-7. Problems	

CHAPTER 14. STATISTICAL DETECTION OF SIGNALS	312
14-1. Application of Statistical Notions to Radio and Radar, 14-2. Testing of Statistical Hypotheses, 14-3. Likelihood Tests, 14-4. Statistical Estima- tion, 14-5. Communication with Fixed Signals in Gaussian Noise, 14-6. Signals with Unknown Parameters in Gaussian Noise, 14-7. Radar Signals in Gaussian Noise, 14-8. Problems	
APPENDIX 1. THE IMPULSE FUNCTION	365
A1-1. Definitions, A1-2. The Sifting Integral, A1-3. Fourier Transforms, A1-4. Derivatives of Impulse Functions	
APPENDIX 2. INTEGRAL EQUATIONS	371
A2-1. Definitions, A2-2. Theorems, A2-3. Rational Spectra
