

An Introduction to the Uncertainty Principle

Hardy's Theorem on Lie Groups

Sundaram Thangavelu

Birkhäuser
Boston • Basel • Berlin

Contents

| | |
|--|-----|
| Foreword | ix |
| Preface | xi |
| 1 Euclidean Spaces | 1 |
| 1.1 Fourier transform on $L^1(\mathbb{R}^n)$ | 1 |
| 1.2 Hermite functions and L^2 theory | 7 |
| 1.3 Spherical harmonics and symmetry properties | 11 |
| 1.4 Hardy's theorem on \mathbb{R}^n | 18 |
| 1.5 Beurling's theorem and its consequences | 29 |
| 1.6 Further results and open problems | 38 |
| 2 Heisenberg Groups | 45 |
| 2.1 Heisenberg group and its representations | 45 |
| 2.2 Fourier transform on H^n | 48 |
| 2.3 Special Hermite functions | 52 |
| 2.4 Fourier transform of radial functions | 60 |
| 2.5 Unitary group and spherical harmonics | 62 |
| 2.6 Spherical harmonics and the Weyl transform | 69 |
| 2.7 Weyl correspondence of polynomials | 77 |
| 2.8 Heat kernel for the sublaplacian | 83 |
| 2.9 Hardy's theorem for the Heisenberg group | 87 |
| 2.10 Further results and open problems | 100 |
| 3 Symmetric Spaces of Rank 1 | 105 |
| 3.1 A Riemannian space associated to H^n | 105 |
| 3.2 The algebra of radial functions on S | 111 |
| 3.3 Spherical Fourier transform | 119 |
| 3.4 Helgason Fourier transform | 126 |
| 3.5 Hecke–Bochner formula for the Helgason Fourier transform | 136 |
| 3.6 Jacobi transforms | 141 |

viii Contents

| | | |
|-----|--|-----|
| 3.7 | Estimating the heat kernel | 146 |
| 3.8 | Hardy's theorem for the Helgason Fourier transform | 152 |
| 3.9 | Further results and open problems | 157 |
| | Bibliography | 169 |
| | Index | 173 |
