Antagonistic Co-contraction Can Minimise Muscular Effort in Systems with Uncertainty — [Source link](#)

Anne D. Koelewijn, Anne D. Koelewijn, Antonie J. van den Bogert

Institutions: Cleveland State University, University of Erlangen-Nuremberg

Published on: 08 Jul 2020 - bioRxiv (Cold Spring Harbor Laboratory)

Topics: Control theory, Feed forward and Optimal control

Antagonistic Co-contraction Can Minimise Muscular Effort in Systems with Uncertainty

Anne D. Koelewijn and Antonie J. van den Bogert

anne.koelewijn@fau.de

The authors have withdrawn their manuscript after further simulations based on reviewer comments did not support the conclusions of the paper. Currently, we are performing additional simulations to understand these different results. Therefore, the authors do not wish this work to be cited as reference for the project. If you have any questions, please contact the corresponding author.
