# Contents

---

## 1 CONCEPTS AND EXAMPLES OF RESEARCH 1

---

- 1-1 Concepts 1
- 1-2 Examples 2
- 1-3 Concluding Remarks 5
- References 6

## 2 CLASSIFICATION OF VARIABLES AND THE CHOICE OF ANALYSIS 7

---

- 2-1 Classification of Variables 7
- 2-2 Overlapping of Classification Schemes 11
- 2-3 Choice of Analysis 11
- References 13

## 3 BASIC STATISTICS: A REVIEW 14

---

- 3-1 Preview 14
- 3-2 Descriptive Statistics 15
- 3-3 Random Variables and Distributions 16
- 3-4 Sampling Distributions of  $t$ ,  $\chi^2$ , and  $F$  19
- 3-5 Statistical Inference: Estimation 21
- 3-6 Statistical Inference: Hypothesis Testing 24

3-7 Error Rates, Power, and Sample Size	28
Problems	30
References	33

## 4 INTRODUCTION TO REGRESSION ANALYSIS 34

4-1 Preview	34
4-2 Association versus Causality	35
4-3 Statistical versus Deterministic Models	37
4-4 Concluding Remarks	38
References	38

## 5 STRAIGHT-LINE REGRESSION ANALYSIS 39

5-1 Preview	39
5-2 Regression with a Single Independent Variable	39
5-3 Mathematical Properties of a Straight Line	42
5-4 Statistical Assumptions for a Straight-line Model	43
5-5 Determining the Best-fitting Straight Line	47
5-6 Measure of the Quality of the Straight-line Fit and Estimate of $\sigma^2$	51
5-7 Inferences About the Slope and Intercept	52
5-8 Interpretations of Tests for Slope and Intercept	54
5-9 Inferences About the Regression Line $\mu_{Y X} = \beta_0 + \beta_1 X$	57
5-10 Prediction of a New Value of $Y$ at $X_0$	59
5-11 Assessing the Appropriateness of the Straight-line Model	60
Problems	60
References	87

## 6 THE CORRELATION COEFFICIENT AND STRAIGHT-LINE REGRESSION ANALYSIS 88

6-1 Definition of $r$	88
6-2 $r$ as a Measure of Association	89
6-3 The Bivariate Normal Distribution	90
6-4 $r$ and the Strength of the Straight-line Relationship	93
6-5 What $r$ Does Not Measure	95
6-6 Tests of Hypotheses and Confidence Intervals for the Correlation Coefficient	96
6-7 Testing for the Equality of Two Correlations	99
Problems	101
References	103

## **7** THE ANALYSIS-OF-VARIANCE TABLE 104

- 7-1 Preview 104
- 7-2 The ANOVA Table for Straight-line Regression 104
  - Problems 108

## **8** MULTIPLE REGRESSION ANALYSIS: GENERAL CONSIDERATIONS 111

- 8-1 Preview 111
- 8-2 Multiple Regression Models 112
- 8-3 Graphical Look at the Problem 113
- 8-4 Assumptions of Multiple Regression 115
- 8-5 Determining the Best Estimate of the Multiple Regression Equation 118
- 8-6 The ANOVA Table for Multiple Regression 119
- 8-7 Numerical Examples 121
  - Problems 123
  - References 135

## **9** TESTING HYPOTHESES IN MULTIPLE REGRESSION 136

- 9-1 Preview 136
- 9-2 Test for Significant Overall Regression 137
- 9-3 Partial  $F$  Test 138
- 9-4 Multiple Partial  $F$  Test 143
- 9-5 Strategies for Using Partial  $F$  Tests 145
- 9-6 Tests Involving the Intercept 150
  - Problems 151
  - References 159

## **10** CORRELATIONS: MULTIPLE, PARTIAL, AND MULTIPLE PARTIAL 160

- 10-1 Preview 160
- 10-2 Correlation Matrix 161
- 10-3 Multiple Correlation Coefficient 162
- 10-4 Relationship of  $R_{Y|X_1, X_2, \dots, X_k}$  to the Multivariate Normal Distribution 164
- 10-5 Partial Correlation Coefficient 165
- 10-6 Alternative Representation of the Regression Model 172

10-7	Multiple Partial Correlation	172
10-8	Concluding Remarks	174
	Problems	174
	Reference	185

## 11 CONFOUNDING AND INTERACTION IN REGRESSION 186

11-1	Preview	186
11-2	Overview	186
11-3	Interaction in Regression	188
11-4	Confounding in Regression	194
11-5	Summary and Conclusions	199
	Problems	199
	Reference	211

## 12 REGRESSION DIAGNOSTICS 212

12-1	Preview	212
12-2	Simple Approaches to Diagnosing Problems in Data	212
12-3	Residual Analysis	216
12-4	Treating Outliers	228
12-5	Collinearity	237
12-6	Scaling Problems	248
12-7	Treating Collinearity and Scaling Problems	248
12-8	Alternate Strategies of Analysis	249
12-9	An Important Caution	252
	Problems	253
	References	279

## 13 POLYNOMIAL REGRESSION 281

13-1	Preview	281
13-2	Polynomial Models	282
13-3	Least-squares Procedure for Fitting a Parabola	282
13-4	ANOVA Table for Second-order Polynomial Regression	284
13-5	Inferences Associated with Second-order Polynomial Regression	284
13-6	Example Requiring a Second-order Model	286
13-7	Fitting and Testing Higher-order Models	290
13-8	Lack-of-fit Tests	290
13-9	Orthogonal Polynomials	292

13-10	Strategies for Choosing a Polynomial Model	301
	Problems	302

## 14 DUMMY VARIABLES IN REGRESSION 317

14-1	Preview	317
14-2	Definitions	317
14-3	Rule for Defining Dummy Variables	318
14-4	Comparing Two Straight-line Regression Equations: An Example	319
14-5	Questions for Comparing Two Straight Lines	320
14-6	Methods of Comparing Two Straight Lines	321
14-7	Method I: Using Separate Regression Fits to Compare Two Straight Lines	322
14-8	Method II: Using a Single Regression Equation to Compare Two Straight Lines	327
14-9	Comparison of Methods I and II	330
14-10	Testing Strategies and Interpretation: Comparing Two Straight Lines	330
14-11	Other Dummy Variable Models	332
14-12	Comparing Four Regression Equations	334
14-13	Comparing Several Regression Equations Involving Two Nominal Variables	336
	Problems	338
	References	360

## 15 ANALYSIS OF COVARIANCE AND OTHER METHODS FOR ADJUSTING CONTINUOUS DATA 361

15-1	Preview	361
15-2	Adjustment Problem	361
15-3	Analysis of Covariance	363
15-4	Assumption of Parallelism: A Potential Drawback	365
15-5	Analysis of Covariance: Several Groups and Several Covariates	366
15-6	Comments and Cautions	368
15-7	Summary	371
	Problems	371
	Reference	385

## 16 SELECTING THE BEST REGRESSION EQUATION 386

16-1	Preview	386
16-2	Steps in Selecting the Best Regression Equation	387
16-3	Step 1: Specifying the Maximum Model	387
16-4	Step 2: Specifying a Criterion for Selecting a Model	390
16-5	Step 3: Specifying a Strategy for Selecting Variables	392

16-6	Step 4: Conducting the Analysis	401
16-7	Step 5: Evaluating Reliability with Split Samples	401
16-8	Example Analysis of Actual Data	403
16-9	Issues in Selecting the Most Valid Model	409
	Problems	409
	References	422

## 17 ONE-WAY ANALYSIS OF VARIANCE 423

17-1	Preview	423
17-2	One-way ANOVA: The Problem, Assumptions, and Data Configuration	426
17-3	Methodology for One-way Fixed-effects ANOVA	429
17-4	Regression Model for Fixed-effects One-way ANOVA	435
17-5	Fixed-effects Model for One-way ANOVA	438
17-6	Random-effects Model for One-way ANOVA	440
17-7	Multiple-comparison Procedures for Fixed-effects One-way ANOVA	443
17-8	Choosing a Multiple-comparison Technique	456
17-9	Orthogonal Contrasts and Partitioning an ANOVA Sum of Squares	457
	Problems	463
	References	483

## 18 RANDOMIZED BLOCKS: SPECIAL CASE OF TWO-WAY ANOVA 484

18-1	Preview	484
18-2	Equivalent Analysis of a Matched Pairs Experiment	488
18-3	Principle of Blocking	491
18-4	Analysis of a Randomized-blocks Experiment	493
18-5	ANOVA Table for a Randomized-blocks Experiment	495
18-6	Regression Models for a Randomized-blocks Experiment	499
18-7	Fixed-effects ANOVA Model for a Randomized-blocks Experiment	502
	Problems	503
	References	515

## 19 TWO-WAY ANOVA WITH EQUAL CELL NUMBERS 516

19-1	Preview	516
19-2	Using a Table of Cell Means	518
19-3	General Methodology	522
19-4	$F$ Tests for Two-way ANOVA	527
19-5	Regression Model for Fixed-effects Two-way ANOVA	530
19-6	Interactions in Two-way ANOVA	534
19-7	Random- and Mixed-effects Two-way ANOVA Models	541
	Problems	544
	References	560

## 20 TWO-WAY ANOVA WITH UNEQUAL CELL NUMBERS 561

- 20-1 Preview 561
- 20-2 Problems with Unequal Cell Numbers: Nonorthogonality 563
- 20-3 Regression Approach for Unequal Cell Sample Sizes 567
- 20-4 Higher-way ANOVA 571
  - Problems 572
  - References 588

## 21 ANALYSIS OF REPEATED MEASURES DATA 589

- 21-1 Preview 589
- 21-2 Examples 590
- 21-3 General Approach for Repeated Measures ANOVA 592
- 21-4 Overview of Selected Repeated Measures Designs and ANOVA-based Analyses 594
- 21-5 Repeated Measures ANOVA for Unbalanced Data 611
- 21-6 Other Approaches to Analyzing Repeated Measures Data 612
  - Appendix 21-A Examples of SAS's GLM and MIXED Procedures 613
  - Problems 616
  - References 638

## 22 THE METHOD OF MAXIMUM LIKELIHOOD 639

- 22-1 Preview 639
- 22-2 The Principle of Maximum Likelihood 639
- 22-3 Statistical Inference via Maximum Likelihood 642
- 22-4 Summary 652
  - Problems 653
  - References 655

## 23 LOGISTIC REGRESSION ANALYSIS 656

- 23-1 Preview 656
- 23-2 The Logistic Model 656
- 23-3 Estimating the Odds Ratio Using Logistic Regression 658
- 23-4 A Numerical Example of Logistic Regression 664
- 23-5 Theoretical Considerations 671
- 23-6 An Example of Conditional ML Estimation
  - Involving Pair-matched Data with Unmatched Covariates 677
- 23-7 Summary 681
  - Problems 682
  - References 686

**24 POISSON REGRESSION ANALYSIS 687**

- 24-1 Preview 687
- 24-2 The Poisson Distribution 687
- 24-3 An Example of Poisson Regression 688
- 24-4 Poisson Regression: General Considerations 690
- 24-5 Measures of Goodness of Fit 694
- 24-6 Continuation of Skin Cancer Data Example 696
- 24-7 A Second Illustration of Poisson Regression Analysis 701
- 24-8 Summary 704
- Problems 705
- References 709

**A APPENDIX A—TABLES 711**

- A-1 Standard Normal Cumulative Probabilities 712
- A-2 Percentiles of the  $t$  Distribution 715
- A-3 Percentiles of the Chi-square Distribution 716
- A-4 Percentiles of the  $F$  Distribution 717
- A-5 Values of  $\frac{1}{2} \ln \frac{1+r}{1-r}$  724
- A-6 Upper  $\alpha$  Point of Studentized Range 726
- A-7 Orthogonal Polynomial Coefficients 728
- A-8 Bonferroni Corrected Jackknife and Studentized Residual Critical Values 729
- A-9 Critical Values for Leverages 730
- A-10 Critical Values for the Maximum of  $N$  Values of Cook's  $d(i)$  times  $(n - k - 1)$  731

**B APPENDIX B—MATRICES AND THEIR RELATIONSHIP TO REGRESSION ANALYSIS 732****C APPENDIX C—ANOVA INFORMATION FOR FOUR COMMON BALANCED REPEATED MEASURES DESIGNS 744**

- C-1 Balanced Repeated Measures Design with One Crossover Factor (Treatments) 744
- C-2 Balanced Repeated Measures Design with Two Crossover Factors 746
- C-3 Balanced Repeated Measures Design with One Nest Factor (Treatments) 750
- C-4 Balanced Repeated Measures Design with One Crossover Factor and One Nest Factor 752
- C-5 Balanced Two-group Pre/Posttest Design 755
- References 757

**D SOLUTIONS TO EXERCISES 758****INDEX 787**
