Acknowledgments	x	2.6.1 Continental drainage	42
<b>1 Coastline variability and functions in the global environment</b>	<b>1</b>	2.6.2 Location of rivers	43
1.1 Introduction	2	2.6.3 Continental shelf width	45
1.2 Coastal settings	2	2.7 Summary	45
1.3 Population and the coast	3	Suggested reading	46
1.3.1 History of coastal occupation	4	<b>3 Sediments and rocks: materials of coastal environments</b>	<b>47</b>
1.4 General coastal conditions	6	3.1 Introduction	48
1.5 Coastal environments	6	3.2 Rock types	48
1.6 Historical trends in coastal research	7	3.3 Sediment texture	49
Suggested reading	10	3.3.1 Grain size	50
<b>2 The Earth's mobile crust</b>	<b>11</b>	3.3.2 Statistical analysis of grain size data	50
2.1 Introduction	12	3.3.3 Grain shape	51
2.2 The Earth's interior	15	3.4 Mineralogy	52
2.3 Plate boundaries	17	3.4.1 General origin and distribution of sediments	53
2.3.1 Divergent boundaries	18	3.4.2 Composition	53
2.3.2 Convergent boundaries	20	3.4.3 Texture	55
2.3.3 Transform boundaries	24	3.5 Summary	55
2.3.4 Plate movement	25	Suggested reading	55
2.4 Continental margins	27	<b>4 Sea-level change and coastal environments</b>	<b>56</b>
2.4.1 Tectonic evolution of continental margins	29	4.1 Introduction	57
2.5 Tectonic coastline classification	31	4.2 Changing the size and shape of the container: tectonic causes	57
2.5.1 Collision coasts	32	4.2.1 Local and regional changes	57
2.5.2 Trailing edge coasts	34	4.2.2 Eustatic tectonic changes	58
2.5.3 Marginal sea coasts	39		
2.6 Tectonic effects on coastal sediment supply	42		

4.3	Climate and sea-level change	58	6.3	Wind wave types	106
4.3.1	Seasonal changes	58	6.4	Distribution and transfer of wave energy	108
4.3.2	Nonseasonal cyclic changes	59	6.5	Other types of waves	110
4.3.3	Long-term climatic effects	60	6.5.1	Tsunamis	110
4.4	Sea-level rise due to sediment compaction and fluid withdrawal	62	6.5.2	Standing waves	111
4.5	Isostasy	63	6.6	Wave-generated currents	112
4.6	Changes in the volume of the world ocean	64	6.6.1	Longshore currents	112
4.6.1	Advance and retreat of ice sheets	64	6.6.2	Rip currents	113
4.6.2	Continental rebound	67	6.6.3	Undertow	114
4.7	Holocene rise in sea level	68	6.7	Summary	114
4.8	Current and future sea-level changes	69	Suggested reading	114	
4.9	The impact of increasing sea-level rise on modern coastal environments	74	<b>7 Beach and nearshore environment</b>	<b>115</b>	
4.10	Summary	74	7.1	Introduction	116
Suggested reading		74	7.2	Beach and nearshore morphology	116
			7.2.1	Nearshore	116
			7.2.2	Beach	118
<b>5 Weather systems, extratropical storms, and hurricanes</b>	<b>75</b>		7.3	Beach types	123
5.1	Introduction	76	7.4	Beach materials	123
5.2	Basic atmospheric circulation and weather patterns	77	7.5	Beach dynamics	125
5.2.1	Wind	77	7.5.1	Beach processes	125
5.2.2	Atmospheric circulation	77	7.5.2	Beach cycles	126
5.2.3	Prevailing winds	79	7.6	Summary	128
5.2.4	Cyclonic and anticyclonic systems	81	Suggested reading	129	
5.2.5	Land breezes and sea breezes	81	<b>8 Barrier systems</b>	<b>130</b>	
5.3	Mid-latitude storms	82	8.1	Introduction	131
5.3.1	Frontal weather	82	8.2	Physical description	131
5.3.2	Cyclogenesis	84	8.3	Distribution and coastal setting	133
5.3.3	Extratropical storms	84	8.3.1	General	133
5.4	Hurricanes and tropical storms	87	8.3.2	Tectonic controls	134
5.4.1	Low latitude storms	87	8.3.3	Climatic controls	135
5.4.2	Origin and movement of hurricanes	89	8.3.4	Summary	136
5.4.3	Anatomy of a hurricane	90	8.4	Barrier types	137
5.4.4	Hurricanes at the coast	92	8.4.1	Barrier spits	137
5.5	Summary	100	8.4.2	Welded barriers	143
Suggested reading		100	8.4.3	Barrier islands	144
			8.5	Prograding, retrograding, and aggrading barriers	148
<b>6 Waves and the coast</b>	<b>101</b>		8.5.1	Prograding barriers	148
6.1	Introduction	102	8.5.2	Retrograding barriers	149
6.2	Water motion and wave propagation	104	8.5.3	Aggrading barriers	152
			8.6	Barrier stratigraphy	153

8.7 Barrier coast morphology	156	11.3 Equilibrium tide	192
8.7.1 Hayes models	156	11.3.1 Tidal cycle	192
8.7.2 Georgia Bight	161	11.3.2 Orbiting moon	193
8.8 Barrier coasts: morphology and evolution	163	11.3.3 The Moon's declination	193
8.8.1 Eastern shore of Nova Scotia	163	11.4 Interaction of the Sun and the Moon	194
8.8.2 Mississippi River delta barriers	165	11.5 Effects of orbital geometry	195
8.9 Summary	166	11.6 Effects of partitioning oceans	196
Suggested reading	166	11.7 Tidal signatures	198
<b>9 Coastal dunes</b>	<b>167</b>	11.8 Tides in shallow water	200
9.1 Introduction	168	11.8.1 Continental shelf effects	200
9.2 Types of coastal dunes and their distribution	168	11.8.2 Coriolis effect	201
9.3 Dune formation	170	11.8.3 Funnel-shaped embayments	202
9.4 Dune dynamics	172	11.8.4 Tidal bore	203
9.5 Summary	174	11.8.5 Tidal currents	203
Suggested reading	174	11.9 Summary	207
<b>10 Coastal lagoons</b>	<b>175</b>	Suggested reading	208
10.1 Introduction	176	<b>12 Tidal inlets</b>	<b>209</b>
10.2 Definition	176	12.1 Introduction	210
10.3 Morphology and setting	176	12.2 What is a tidal inlet?	210
10.4 General characteristics	177	12.3 Inlet morphology	212
10.4.1 Salinity	177	12.3.1 Tidal deltas	212
10.4.2 Organisms	177	12.3.2 Ebb-tidal delta morphology	216
10.4.3 Chemical precipitates	178	12.4 Tidal inlet formation	217
10.4.4 Physical processes	178	12.4.1 Breaching of a barrier	217
10.4.5 Lagoonal sediments	180	12.4.2 Spit building across a bay	217
10.5 Example lagoons	183	12.4.3 Drowned river valleys	223
10.5.1 Laguna Madre	183	12.4.4 Ephemeral inlets	224
10.5.2 Lake Reeve	183	12.5 Tidal inlet migration	225
10.5.3 The Coorong	186	12.6 Tidal inlet relationships	226
10.6 Summary	187	12.6.1 Inlet throat area–tidal prism relationship	227
Suggested reading	187	12.6.2 Ebb-tidal delta volume–tidal prism relationship	228
<b>11 Tides of the ocean</b>	<b>188</b>	12.7 Sand transport patterns	229
11.1 Introduction	189	12.7.1 General sand dispersal trends	229
11.2 Tide-generating forces	189	12.7.2 Inlet sediment bypassing	230
11.2.1 Gravitational force	189	12.8 Tidal inlet effects on adjacent shorelines	234
11.2.2 Centrifugal force	190	12.8.1 Number and size of tidal inlets	234
11.2.3 Tide-producing force	191	12.8.2 Tidal inlets as sediment traps	236
		12.8.3 Changes in ebb-tidal delta volume	236
		12.8.4 Wave sheltering	237

12.8.5 Effects of inlet sediment bypassing	240	14.3 Mangrove coasts	273
12.8.6 Human influences	241	14.3.1 Mangrove distribution	273
12.9 Summary	242	14.3.2 Mangroves and coastal processes	275
Suggested reading	244	14.4 Summary	277
		Suggested reading	277
<b>13 Intertidal flats</b>	245	<b>15 Estuaries</b>	278
13.1 Introduction	246	15.1 Introduction	279
13.2 Morphology of tidal flats	246	15.2 Estuarine hydrology	280
13.3 Sediments	247	15.3 Classification of estuaries	280
13.4 Organisms	248	15.4 Estuarine processes	281
13.4.1 Vagrant organisms	248	15.5 Time-velocity relationships	283
13.4.2 Sessile organisms	248	15.6 Model estuary	284
13.4.3 Limiting factors	248	15.7 Estuary types	286
13.4.4 Bioturbation	249	15.7.1 Tide-dominated estuaries	286
13.5 Sedimentary structures	250	15.7.2 Wave-dominated estuaries	286
13.6 Tidal flat processes	252	15.8 Summary	288
13.6.1 Tides	253	Suggested reading	288
13.6.2 Waves	255		
13.7 Tidal channels	255	<b>16 River deltas: the source of most of our coastal sediments</b>	289
13.8 Some examples	256	16.1 Introduction	290
13.8.1 German Wadden Sea and Jade Bay	257	16.2 How deltas develop	291
13.8.2 The Wash	257	16.3 Deltas and sea level	293
13.8.3 Bay of Saint Malo	259	16.4 Delta environments	295
13.8.4 Bay of Fundy	260	16.4.1 Delta plain	295
13.9 Summary	261	16.4.2 Delta front	297
Suggested reading	262	16.5 Delta processes	298
		16.5.1 River processes	298
<b>14 Coastal wetlands</b>	263	16.5.2 Human influence	300
14.1 Introduction	264	16.6 Delta classification	301
14.2 Salt marshes	264	16.6.1 River-dominated deltas	302
14.2.1 Characteristics of a coastal marsh	264	16.6.2 Tide-dominated deltas	303
14.2.2 Marsh plants	265	16.6.3 Wave-dominated deltas	303
14.2.3 Global distribution	266	16.6.4 Intermediate deltas	304
14.2.4 Marsh characteristics	266	16.7 Summary	305
14.2.5 Marsh classification	267	Suggested reading	306
14.2.6 Marsh sedimentation	268		
14.2.7 Sediments	271	<b>17 Glaciated coasts</b>	307
14.2.8 Sea level and marsh development	271	17.1 Introduction	308
14.2.9 Marsh summary	272	17.2 The world's glaciers	309
		17.2.1 Glacier formation	309
		17.2.2 Glacier movement	309
