Contents

<i>Preface</i>	iii
<i>Contributors</i>	vii
1. Controlled Release of Bioactive Agents from Lactide/ Glycolide Polymers <i>Danny H. Lewis</i>	1
2. Polyanhydrides as Drug Delivery Systems <i>Mark Chasin, Abraham Domb, Eyal Ron, Edith Mathiowitz, Kam Leong, Cato Laurencin, Henry Brem, Stuart Grossman, and Robert Langer</i>	43
3. Poly- ϵ -Caprolactone and Its Copolymers <i>Colin G. Pitt</i>	71
4. Poly(ortho esters) <i>Jorge Heller, Randall V. Sparer, and Gaylen M. Zentner</i>	121
5. Polyphosphazenes as New Biomedical and Bioactive Materials <i>Harry R. Allcock</i>	163
6. Pseudopoly(amino acids) <i>Joachim Kohn</i>	195

7. Natural Polymers as Drug Delivery Systems <i>Simon Bogdansky</i>	231
8. Liposomes <i>Ulla K. Nässander, Gert Storm, Pierre A. M. Peeters, and Daan J. A. Crommelin</i>	261
<i>Index</i>	339
