

Bone Research in Biomechanics

Edited by

G. Lowet

*Division of Biomechanics and Engineering Design,
Katholieke Universiteit Leuven, Belgium*

P. Rügsegger

*Institute for Biomedical Engineering,
University of Zürich, Switzerland*

H. Weinans

*Biomechanics Section, Institute of Orthopaedics,
University of Nijmegen, The Netherlands*

and

A. Meunier

*Laboratoire de Recherches Orthopédiques,
Université Denis Diderot, Paris, France*

Contents

Introduction, <i>G. Lowet, P. Rügsegger, H. Weinans and A. Meunier</i>	v
Symposium: Validation of computer simulations of bone adaptation	
Finite element analyses to study periprosthetic bone adaptation, <i>H. Weinans and D.R. Sumner</i>	3
Diaphyseal bone growth and adaptation: Models and data, <i>M.C.H. Van der Meulen</i>	17
Prospects of computer models for the prediction of osteoporotic bone fracture risk, <i>B. Van Rietbergen, H. Weinans and R. Huiskes</i>	25
Validation of adaptive bone-remodeling simulation models, <i>R. Huiskes</i>	33
Symposium: Bone architecture and the competence of bone	
The significance of histology in relation to non-invasive techniques in the evaluation of bone tissue, <i>M. Hahn, M. Vogel, H. Ritzel and G. Delling</i>	51
Micro-tomographic imaging for the nondestructive evaluation of trabecular bone architecture, <i>R. Müller and P. Rügsegger</i>	61
Assessment of trabecular structure using high resolution magnetic resonance imaging, <i>S. Majumdar and H.K. Genant</i>	81
The quality of trabecular bone evaluated with micro-computed tomography, FEA and mechanical testing, <i>D. Ulrich, T. Hildebrand, B. Van Rietbergen, R. Müller and P. Rügsegger</i>	97
CT and mini-CT 2D-image analysis for the quantitation of vertebral trabecular architecture, <i>A.M. Laval-Jeantet, A. Elmoutaouakkil, J.P. Roux, G. Lowet, J.P. Houssard, G. Peix and F. Peyrin</i>	113
Symposium: Ultrasound research in bone	
Scanning acoustic microscopy of human and canine cortical bone microstructure at high frequencies, <i>J.L. Katz and A. Meunier</i>	123
Ultrasonic wave propagation in porous media: Determination of acoustic parameters and high frequency limit of the classical models, <i>P. Leclaire, L. Kelders, W. Lauriks, C. Glorieux and J. Thoen</i>	139
Anatomical variation of human cancellous bone mechanical properties in vitro, <i>M.-C. Hobatho, J.Y. Rho and R.B. Ashman</i>	157
The in vitro measurement of ultrasound in cancellous bone, <i>C.M. Langton and R. Hodgkinson</i>	175
In vivo and in vitro measurement of ultrasound velocity in cortical bone, <i>G. Lowet and G. Van der Perre</i>	201
Author Index	221
