KLUWER ACADEMIC PUBLISHERS
DORDRECHT / BOSTON / LONDON

Contents

Contributors	xi
Foreword	xiii
Preface	xv

1. Cadmium in Soils and Plants

M. J. McLAUGHLIN and B. R. SINGH

1. Introduction	1
2. Accumulation of cadmium in soils and plants	2
3. World fertiliser supply — cadmium issues	5
4. Re-use of waste materials — cadmium issues	7

2. The Environmental Chemistry of Cadmium

S. J. TRAINA

1. Basic chemical properties	11
2. Aqueous complexation	12
3. Abundance and form in natural environments	17
4. Cadmium concentrations in soils	24
5. Analytical approaches for cadmium speciation in the environment	28
6. Conclusions	33

3. Chemistry of Cadmium in Soil Solution

P. A. HELMKE

- | | |
|--|----|
| 1. Introduction | 39 |
| 2. Properties of cadmium | 40 |
| 3. Cadmium in soil solution | 40 |
| 4. Measured and calculated speciation of cadmium in soil solutions | 45 |
| 5. Phenomena controlling the concentration of cadmium and zinc in soil solutions | 55 |
| 6. Conclusions | 61 |

4. Solid Phase Cadmium and the Reactions of Aqueous Cadmium with Soil Surfaces

T. H. CHRISTENSEN and P. M. HAUNG

- | | |
|------------------------------------|----|
| 1. Introduction | 65 |
| 2. Solid phases | 66 |
| 3. Adsorption-desorption processes | 77 |
| 4. Conclusions | 90 |

5. Anthropogenic Additions of Cadmium to Soils

B. J. ALLOWAY and E. STEINNES

- | | |
|-------------------------------------|-----|
| 1. Introduction | 97 |
| 2. Cadmium concentrations in soils | 98 |
| 3. Anthropogenic sources of cadmium | 98 |
| 4. Conclusions | 118 |

6. Mechanisms of Cadmium Uptake, Translocation and Deposition in Plants

R. M. WELCH and W. A. NORVELL

- | | |
|--|-----|
| 1. Introduction | 125 |
| 2. Availability of cadmium in soil | 126 |
| 3. Uptake of cadmium by roots | 128 |
| 4. Transport and deposition | 139 |
| 5. Bioavailability of cadmium in plant foods | 144 |
| 6. Conclusions | 144 |

7. Management Factors which Influence Cadmium Concentrations in Crops

C. A. GRANT, L. D. BAILEY, M. J. McLAUGHLIN and B. R. SINGH

1. Introduction	151
2. Site selection	152
3. Crop selection and cultivar development	154
4. Fertiliser management	158
5. Soil pH and liming	173
6. Other soil amendments	176
7. Irrigation water quality	179
8. Phytoremediation	184
9. Other management factors	185
10. Conclusions	187

8. Adverse Effects of Cadmium on Soil Microflora and Fauna

S. P. McGRATH

1. Introduction	199
2. Data sources	202
3. Effects on microbes and microbial processes	205
4. Evidence from field experiments	210
5. Effects on earthworms	211
6. Other invertebrates	212
7. Comparison with Dutch soil quality values	213
8. Conclusions	214

9. Soil Cadmium as a Threat to Human Health

R. L. CHANEY, J. A. RYAN, Y-M. LI and S. L. BROWN

1. Introduction	219
2. Diagnosis of human cadmium toxicity	229
3. Interpretation of epidemiological survey data	235
4. Reducing cadmium levels in crops	236
5. Have crop cadmium levels increased over time?	240
6. Common errors in evaluation of plant absorption of soil cadmium	241
7. Livestock food-chains usually exclude cadmium effectively	242
8. High risk crops	243

9. Reducing food chain cadmium risk	244
10. Research on food-chain cadmium risk is still needed	245
11. Does ingested cadmium increase cancer risk?	245
12. Conclusions	246

10. Cadmium in Soils and Plants

B. R. SINGH and M. J. McLAUGHLIN

1. Introduction	257
2. Cadmium in soils	258
3. Cadmium in plants	260
4. Adverse effects of cadmium on biota and human health	262
5. Knowledge gaps and research priorities	263

Index	269
