Preface	vii
Glossary	ix
1 Introduction to catalysis	1
1.1 Historical	1
1.2 The basis of catalytic action	1
1.3 Catalysts in action	6
1.4 Concluding remarks	10
2 General aspects of catalysis at surfaces	11
2.1 General classification of bulk-solid materials as catalysts	11
2.2 Nature and classification of enzymes	14
2.3 Basic thermodynamics of heterogeneous catalysis	17
2.4 Aspects of the kinetics of surface catalysed reactions	36
2.5 Concluding remarks	51
3 The constitution of catalytic surfaces	52
3.1 Basic physical forms of catalytic surfaces	52
3.2 The creation of catalytic surfaces	67
3.3 Concluding remarks	83
4 The detection of adsorbates on solid surfaces	85
4.1 Crystal faces and cleaved surfaces of metals	86
4.2 The effects of pressure on surface phenomena	90
4.3 Destructive techniques for surface investigation	91
4.4 Non-destructive techniques for surface investigation	100
4.5 Concluding remarks	130

5	Chemisorption processes at solid surfaces	132
5.1	Transition metal surfaces	132
5.2	Redox oxide surfaces	142
5.3	Solid acid surfaces	145
5.4	Concluding remarks	159
6	Catalytic actions on solid surfaces	161
6.1	Reactions catalysed by transition metals	161
6.2	Oxidation reactions on redox catalysts	168
6.3	Hydrocarbon conversions on solid acid surfaces	174
6.4	Reforming catalysts	178
6.5	Concluding remarks	182
7	Catalytic action by enzymes	183
7.1	Origin of reactivity at the active site	183
7.2	The pH-sensitivity of enzyme catalysis	186
7.3	Roles of metal centres in enzymes	190
7.4	Examples of enzymes in industrial use	193
7.5	Concluding remarks	198
8	Industrial processes based on solid catalysts	200
8.1	Hydrogenation of vegetable oils	200
8.2	Ammonia and nitric acid productions	203
8.3	Methanol synthesis	205
8.4	Synthesis gas conversion processes	209
8.5	Ethylene oxide production	215
8.6	Sulphuric acid production	217
8.7	Linear polyethylene production	220
8.8	Catalytic cracking	223
8.9	Synthetic gasoline production	224
8.10	Some processes using zeolite catalysts	233
8.11	Concluding remarks	238
	Further reading	239
	Index	245
