Contents

<i>Preface to the first edition</i>	ix
<i>Preface to the second edition</i>	xi
1 Introduction and overview	1
1.1 Some history	1
1.2 Examples of chaotic behavior	2
1.3 Dynamical systems	6
1.4 Attractors	10
1.5 Sensitive dependence on initial conditions	15
1.6 Delay coordinates	19
Problems	21
Notes	22
2 One-dimensional maps	24
2.1 Piecewise linear one-dimensional maps	24
2.2 The logistic map	32
2.3 General discussion of smooth one-dimensional maps	45
2.4 Examples of applications of one-dimensional maps to chaotic systems of higher dimensionality	57
Appendix: Some elementary definitions and theorems concerning sets	65
Problems	66
Notes	69
3 Strange attractors and fractal dimension	71
3.1 The box-counting dimension	71

10.4	Synchronization of chaotic systems	393
10.5	Stability of a chaotic set on an invariant manifold	402
10.6	Generalized synchronization of coupled chaotic systems	409
10.7	Phase synchronization of chaos	411
	Problems	419
	Notes	420
11	Quantum chaos	421
11.1	The energy level spectra of chaotic, bounded, time-independent systems	423
11.2	Wavefunctions for classically chaotic, bounded, time-independent systems	439
11.3	Temporally periodic systems	442
11.4	Quantum chaotic scattering	449
	Problems	450
	Notes	450
	<i>References</i>	452
	<i>Index</i>	475
