Contents

The Kelvin equation and adsorption hysteresis	1
AJ Brown, CGV Burgess, DH Everett, S Nuttall	
Micropore size distribution in carbon molecular sieves by immersion calorimetry	9
JC Gonzáles, A Sepúlveda-Escribano, M Molina-Sabio, F Rodríguez-Reinoso	
Magic angle spinning NMR studies of adsorption onto activated carbons	17
RK Harris, TV Thompson, J Shaw, PR Norman	
Analysis of HRADS adsorption	25
E Maglara, R Kaminsky, WC Conner	
Neutron scattering investigations of adsorption in porous solids	33
JDF Ramsay, E Hoinkis	
A pore width sensitive ordered structure of water molecules in a carbon micropore	41
T Iijama, K Nishikawa, T Otowa, T Suzuki, K Kaneko	
Computer simulation study of sorption in cylindrical pores with varying pore wall heterogeneity	49
WA Steele, MJ Bojan	
Transport diffusion of adsorbates in micropores: simulation in model systems	57
D Nicholson, RW Adams, RF Cracknell, GK Papadopoulos	
Simulation studies of pore blocking phenomena in model porous networks	65
MW Maddox, N Quirke, KE Gubbins	
Characterisation of microporous carbons by using molecular simulation to analyse the adsorption of molecules of different sizes	73
MV López-Ramón, J Jagiello, TJ Bandoz, NA Seaton	
Ordered mesoporous MCM-41 adsorbents: novel routes in synthesis, product characterisation and specification	81
M Grün, KK Unger, A Matsumoto, K Tsutsumi	
Characterisation of zirconia-based ordered mesoporous materials	90
U Ciesla, KK Unger, F Schüth	
Physisorption of gases by MCM-41	98
PJ Branton, PG Hall, KSW Sing	

Characterisation of porosity during thermal decomposition of nickel hydroxide	103
MML Ribeiro-Carrott, PJM Carrott, AJEG Candeias	
A thermodynamic investigation of physisorbed phases within the model mesoporous material: MCM-41	111
PL Llewellyn, C Sauerland, C Martin, Y Grillet, J-P Coulomb, F Rouquérol, J Rouquérol	
Helium adsorption on mesoporous solids at 4.2K - density of adsorbed helium in porous systems	118
N Setoyama, S Inoue, Y Hanzawa, PJ Branton, K Kaneko, RW Pekala, MS Dresselhaus, KSW Sing	
Estimating the dimensions of ultramicropores using molecular probes	125
B McEnaney, TJ Mays, YF Yin, XS Chen, F Rodríguez-Reinoso	
Off-lattice reconstructed biphasic media using Gaussian random fields: evaluation for different disordered porous solids	133
P Levitz, V Pasquier, I Cousin	
Micropore size distributions from experimental isotherm data and grand canonical Monte Carlo simulations	141
S Samios, AK Stubos, NK Kanellopoulos, R Cracknell, G Papadopoulos, D Nicholson	
Measuring and modelling the pore-level properties of meso- and macro-porous media - an overview	149
GP Matthews	
Pore formation in carbons derived from phenol resin and their gas adsorption	156
M Inagaki, M Sunahara	
Characterisation of porous solids: adsorption potential distribution and its thermodynamic implications	163
M Jaroniec, M Kruk, J Choma	
Within the hysteresis: insight into the bi-modal pore size distribution of close-packed spheres	171
H Giesche	
Properties of nanoengineered two-dimensional silica-based porous networks	180
PA Sermon, MSW Vong, D Grosso	
The presence of "shadowed" macropores in the porous network of an activated alumina	189
MS Goldstein, JD Carruthers	

Nuclear magnetic relaxation study of water adsorbed in mesoporous activated carbons	196
SV Mikhalovsky, VA Trikhleb, VV Strashko	
Analysis of the topological and geometrical characteristics of the pore space of permeable solids using serial tomography, mercury porosimetry and theoretical simulation	204
CD Tsakiroglu, AC Payatakes	
Morphology of biphasic random media: chord distributions and two-point correlation functions	213
P Levitz	
Interparticle capillary condensation and the pore size distribution of several adsorbents	221
WD Machin, RJ Murdey	
Dual site bond models in the presence of correlations	229
A Adrover, M Giona	
Determination of the micropore size in carbons by means of experimental and calculated isotherm derivatives	237
F Ehrburger-Dolle, MT Gonzalez, M Molina-Sabio, F Rodríguez-Reinoso	
Study of activated physical adsorption by ESR method	245
VV Strelko	
Synthesis and characterisation of a zeolite A with detergent characteristics	253
MJ Pérez Zurita, M Matjushi, G Gianetto, C Urbina, L Garcia, C Boliver, C Scott, P Bosch, VH Lara	
Gravimetric and volumetric measurements of helium adsorption equilibria on different porous solids	261
R Staudt, S Bohn, F Dreisbach, JU Keller	
Multiscaling texture characterisation of freeze-dried resorcinol-formaldehyde aerogels	267
B Mathieu, S Blacher, F Brouers, JP Pirard, B Diez, R Sobry, G Van den Bosshe	
Comparison of t-plots for carbons, silicas and aluminas	275
DR Millburn, BH Davis	
Fractal analysis of aerogels and carbon blacks using nitrogen adsorption data: comparative study of two methods	283
B Sahouli, S Blacher, F Brouers	

Certification of reference materials for pore analysis by the gas adsorption method	291
B Röhl-Kuhn, K Meyer, P Klobs, K-F Krebs, Th Fritz	
Adsorption and displacement of formic acid and acetic acid on microporous phenolic resin carbons	299
WH Lawnik, O Dietsche, A Fritz, GH Findenegg, SR Tennison	
Characterisation of sulphated oxides of titanium: infra-red, adsorption and related studies	306
CA Philip, SA Selim, N Yacoub, J Ragai	
Analysis of pore properties from low pressure hysteresis in nitrogen adsorption isotherms	314
RR Mather	
Adsorption characterisation of H-ZSM-5	319
L Abrams	
Surface functional groups and texture characterisation of catalytic supports based on activated carbon	327
G de la Puente, A Centeno, A Gil, P Grange, B Delmon	
Modelling stratified porous media	335
TJ Mathews, GP Matthews	
Modelling of pore level properties	343
CJ Ridgway, GP Matthews	
Sorptive properties of cloverite	351
W Schmidt, F Schüth	
Comparison of the translational mobility D_t of hydrogen, methane and neo-pentane molecules sorbed on $AlPO_4-5$	359
C Martin, JP Coulomb, Y Grillet, R Kahn	
Characterisation of the solid texture of porous particles by application of a non-catalytic gas-solid reaction in a thermobalance	366
G Aichinger, G Staudinger	
Retention mechanisms of phenol on activated carbon in a cement environment studied by high resolution argon adsorption and controlled transformation rate thermal analysis	374
LJ Michot, F Didier, F Villiéras, JM Cases, Y Grillet, A Bouchelaghem	
A model of mercury intrusion in an elliptical or rectangular parallel crack and its influence on porosity histograms of granite	382
P Couchot, C Dubois, E Boeglin, A Chambaudet	

Characterisation of single pores and porous solids Z Sobotka	390
Polymeric materials with a novel type of porosity MP Tsyurupa, AS Shabaeva, LA Pavlova, TA Mrachkovskaya, VA Davankov	398
Processing of microporous/mesoporous sub-micron size silica spheres by means of a template-supported synthesis Ch Kaiser, G Büchel, S Lüdtkke, I Lauer, KK Unger	406
Observation of interface curvature of capillary condensed phase in slit-shaped nanopore with a new MD simulation method M Miyahara, T Yoshioka, M Okazaki	413
Textural adsorption characterisation according to the two-fold description of porous media V Mayoitia, F Rojas, I Kornhauser, J Salmones	421
Determination of the surface areas and pore sizes of organic matter in soils MC Mittelmeijer-Hazeleger, H de Jonge, A Blik	429
Pore structure and phenol adsorption characteristics of carbonaceous adsorbents prepared from coal reject F Haghseresht, GQ Lu, HY Zhu, J Keller	437
Characterisation of silica obtained from the dissolution of olivine: a nitrogen physisorption and thermoporometric study DJ Liefink, P van Os, BG Dekker, H Talsma, JW Geus	445
Characterisation of the porosity of M41S silicate by adsorption and Xe NMR MA Springuel-Huet, J Fraissard, R Schmidt, M Stöcker, WC Conner	452
Mercury porosimetry applied to low density xerogels R Pirard, B Heinrichs, JP Pirard	460
Study of Kelex 100 (metallic ion extractant) impregnated in porous organic polymers using nitrogen adsorption at 77 K, water adsorption and 129-Xe NMR spectroscopy S Esteban, JL Bonnardet, G Cote	467
An anomalous adsorption of ZSM-5 zeolites ME Eleftheriou, CR Theocharis	475
Effect of thermal treatment on the porosity of silica gels: studies by thermal desorption of liquids J Goworek, W Stefaniak, T Goworek	481

Generation of radially non-uniform porous particles - the influence of non-uniformity and of correlation properties on fluid-solid non-catalytic reactions	489
A Adrover, M Giona	
Effects of carbon surface chemistry on adsorption of polar molecules	497
RH Bradley, A Cuesta	
Effect of assumed pore shape and interaction parameters on obtaining pore size distributions from adsorption measurements	504
KL Boulton, MV López-Ramón, GM Davies, NA Seaton	
Adsorbent applications for mesoporous silicate	512
A Yasutake, N Tomonaga, J Izumi, UM Setogushi, M Iwamoto	
Characterisation by thermoporometry of the influence of additives on the porous structure of gels derived from tetraethoxysilane	519
A Julbe, JF Quinson, A El Mansouri, C Guizard	
Reduction of octahedral Fe(III) in saponite: influence in the pillaring ability of the clay	527
MA Vincente, MA Bañares-Muñoz, M Suárez, JMM Pozas, RM Martín, ML Rojas	
Texture of impregnated active carbon: effect of burn-off	535
B Buczek, A Swiatkowski, S Zietek	
Pore volume and apparent density of fine porous particles	543
B Buczek, E Vogt, W Stefaniak	
A simulation study of nitrogen adsorption in magnesium oxide pores	549
D Nicholson, NA Freeman, MA Day	
Adsorption and thermogravimetric characterisation of selected M41S samples	557
A Sayari, C Danumah, P Liu, M Jaroniec	
Analysis of pore structure of isotropic graphite using image processing	565
K Oshida, T Nakazawa, N Ekinaga, M Endo, M Inagaki	
Adsorption studies of carbon dioxide on KF1500, X2MH6/8 and PX21 by means of a high-pressure volumetric device	573
A Guillot, S Follin, L Poujardieu	
Comparison between different techniques to determine the porosity of aerogels	581
JF Quinson, B Chevalier, E Elaloui, R Begag	

Multistep porosity development in clinochlore upon heating	588
