About the Series	iii
Foreword (Harold Kalter)	v
Preface	vii
1. Principles of Teratogenesis Applicable to Human Exposure to Drugs and Chemicals	1
PART I. DRUGS	
2. Drug Usage in Pregnancy	49
3. Cardiovascular-Renal Drugs	61
4. Drugs Affecting Blood	87
5. Agents Used for Pain	107
6. Anesthetics	132
7. Drugs Affecting the Central Nervous System: Anticonvulsants	142
8. Drugs Affecting the Central Nervous System: Psychotropic Agents	190
9. Hormones and Hormone Antagonists	260
10. Drugs Used in Respiratory and Allergic Disorders	339
11. Antimicrobial Agents	360

12. Antiparasitical Drugs	403
13. Insulin and Oral Hypoglycemic Agents	421
14. Thyroid-Acting Agents	431
15. Drugs Affecting Muscular Action	441
16. Gastrointestinal Drugs	452
17. Cancer Chemotherapeutic Agents	467
18. Immunologic Agents	521
19. Chemical Antagonists	534
20. Miscellaneous Drugs	546
PART II. CHEMICALS	
21. Chemical Exposure in Pregnancy	565
22. Pesticides	577
23. Metals	618
24. Industrial Solvents	645
25. Diagnostic Agents, Dyes, and Radioactive Chemicals	659
26. Plastics	669
27. Toxins	679
28. Foods, Nutrients, and Dietary Factors	700
29. Food Additives	731
30. Air/Water/Soil Pollutants	748
31. Personal and Social Chemicals	763
32. Miscellaneous Chemicals	801
Index	843
