

Chemistry and Technology of Agrochemical Formulations

Edited by

D. A. Knowles
FORM-AK Formulation Consultancy Services,
Tonbridge, Kent, UK

Kluwer Academic Publishers
Dordrecht / Boston / London

Contents

Preface	xiii
List of contributors	xv
1 Introduction	1
D. A. KNOWLES	
References	7
2 Review of major agrochemical classes and uses	8
L. G. COPPING	
2.1 Introduction	8
2.2 Future needs	9
2.3 World markets, 1996	9
2.4 Sales by category, 1995	10
2.5 Sales by crop, 1995	12
2.6 Sales by region, 1995	13
2.7 Herbicides	13
2.7.1 Photosynthesis	15
2.7.2 Amino acid biosynthesis	17
2.7.3 Lipid biosynthesis	17
2.7.4 Interference with plant hormones	18
2.7.5 Cell division	19
2.7.6 Cellulose biosynthesis	19
2.7.7 Respiratory uncouplers	19
2.8 Insecticides	20
2.8.1 Organophosphorus insecticides (OPs)	21
2.8.2 Carbamate insecticides	22
2.8.3 Insecticides that interact with neurotransmitter ligand recognition sites	22
2.8.4 Insecticides that interfere with ion channels	23
2.8.5 Inhibition of oxidative phosphorylation	24
2.8.6 Insect growth and regulation	25
2.8.7 Compounds with uncertain modes of action	26
2.9 Fungicides	27
2.9.1 Protectant fungicides	27
2.9.2 Protein biosynthesis	28
2.9.3 Nucleic acid metabolism	28
2.9.4 Cell division	28
2.9.5 Sterol biosynthesis	28
2.9.6 Triglyceride biosynthesis	29
2.9.7 Chitin biosynthesis	29
2.9.8 Respiration	29
2.9.9 Indirectly acting fungicides	30
2.10 Plant growth regulators	30
2.11 Biological screening: discovery and development of a new agrochemical	30
2.11.1 Chemical synthesis	31
2.11.2 Biological evaluation	35
References	38

3	Formulation of agrochemicals	41
	D. A. KNOWLES	
3.1	Introduction	41
3.2	Conventional formulations	43
3.2.1	Granules (GR)	43
3.2.2	Solution concentrates (SL)	44
3.2.3	Emulsifiable concentrates (EC)	45
3.2.4	Wettable powders (WP)	46
3.2.5	Suspension concentrates (SC)	47
3.2.6	Seed treatments (DS, WS, LS, FS)	49
3.3	New-generation formulations	50
3.3.1	General trends	50
3.3.2	Oil-in-water emulsions (EW)	51
3.3.3	Suspoemulsions (SE)	52
3.3.4	Microemulsions (ME)	53
3.3.5	Controlled-release formulations	53
3.3.6	Water-dispersible granules (WG)	55
3.3.7	Formulations using a built-in wetter	56
3.4	Surfactants for agrochemicals	57
3.4.1	General characteristics	57
3.4.2	Adsorption and surface tension	59
3.4.3	Micellization	61
3.4.4	Krafft temperature and cloud point	61
3.4.5	Wetting and contact angle	61
3.4.6	Particle and droplet stabilization	62
3.4.7	Wetting agents	63
3.4.8	Dispersion	64
3.4.9	Emulsification	65
3.4.10	Solubilization	66
3.4.11	Bioenhancement	67
3.4.12	Conventional surfactants	67
3.4.13	Recent surfactant developments	70
3.5	Other formulation additives	71
3.5.1	Carriers and diluents	71
3.5.2	Solvents	71
3.5.3	Anti-settling agents	73
3.5.4	Water-soluble polymers	74
3.5.5	Preservatives	75
3.5.6	Anti-freeze agents	78
3.5.7	Anti-foam agents	78
3.5.8	Anti-caking agents	78
	References	79
4	Water-dispersible granules	80
	G. A. BELL	
4.1	Introduction	80
4.2	Manufacturing methods	83
4.3	Physical properties	87
4.3.1	Granule size and shape	88
4.3.2	Particle assemblies and structures	91
4.3.3	Quantity and type of binders	98
4.4	Design: modern methods	112
	References	114

5	Recent developments on safer formulations of agrochemicals	121
	P. J. MULQUEEN	
5.1	Introduction	122
5.2	Liquid formulations	125
	5.2.1 Emulsifiable concentrates (EC)	125
	5.2.2 Concentrated emulsions (CE)	126
	5.2.3 Suspension emulsions (or suspoemulsions)	130
	5.2.4 Microemulsions	131
	5.2.5 Multiple emulsions	131
	5.2.6 Suspension concentrates	132
5.3	Controlled-release formulations	132
	5.3.1 Methods of encapsulation	134
	5.3.2 Advantages of microencapsulation	142
	5.3.3 Microencapsulated products	146
	5.3.4 Future trends in microencapsulation	147
5.4	Water-soluble packaging	147
5.5	Dry products (water-dispersible granules)	148
5.6	Adjuvants	148
5.7	Other formulation types	149
	5.7.1 Seed treatment formulations	149
	5.7.2 Biotechnological improvements	149
5.8	Summary and future possibilities	152
	References	154
6	Agrochemical formulations using natural lignin products	158
	S. T. HUMPHREY	
6.1	Introduction	158
	6.1.1 <i>Lignosulphonates: some basic information</i>	158
	6.1.2 Lignin modification	159
6.2	Wettable powders (WP)	160
	6.2.1 Formulation	160
	6.2.2 Production methods	162
6.3	Water-dispersible granules (WG)	163
	6.3.1 Formulation	164
	6.3.2 Production methods	166
6.4	Suspension concentrates (SC)	167
	6.4.1 Formulation	167
	6.4.2 Production methods	170
6.5	Oil-in-water emulsions (EW)	172
	6.5.1 Formulation	172
	6.5.2 Production methods	172
6.6	Controlled release	172
	6.6.1 Granules	173
	6.6.2 Tablets	173
	6.6.3 Gels	173
	6.6.4 Microencapsulation	174
6.7	Ultraviolet protection	175
6.8	Compatibility agents	176
6.9	Adjuvants	176
6.10	Complexing agents	177
6.11	Environmental and regulatory information	177
	6.11.1 Personnel	177
	6.11.2 Environmental	177
	References	178

7	Novel surfactants and adjuvants for agrochemicals	179
	S. REEKMANS	
7.1	Polymeric surfactants and stability	179
7.1.1	Introduction	179
7.1.2	(De)stabilization of colloidal systems	179
7.1.3	Colloidal stabilization	180
7.1.4	Structure of polymeric surfactants for steric stabilization	183
7.1.5	Polymeric surfactants in agricultural formulations	187
7.1.6	Conclusion	195
7.2	Trends towards environmentally safer surfactants	196
7.2.1	Surfactants and the environment	196
7.2.2	Toxicity and biodegradation	197
7.2.3	Hazard labelling of surfactants	204
7.2.4	Effect of chemical structure	204
7.2.5	New-generation surfactants	209
7.2.6	Conclusion	211
7.3	Enhancing biological activity using adjuvants	212
7.3.1	Introduction	212
7.3.2	Relevance of a surfactant's properties	213
7.3.3	Built-in activators and spray-tank mixtures	220
7.3.4	Future trends in surfactants and adjuvants	221
7.3.5	Conclusion	226
	Acknowledgements	226
	References	226
8	Improving agrochemical performance: possible mechanisms for adjuvancy	232
	P. J. HOLLOWAY	
8.1	Introduction	232
8.2	Chemical composition of adjuvants	233
8.2.1	Surfactants	233
8.2.2	Emulsifiable oils	237
8.2.3	Polymers	239
8.2.4	Polymer-forming compounds	240
8.2.5	Phospholipids	240
8.2.6	Inorganic salts	241
8.2.7	Other ingredients	241
8.3	Mechanistic approaches for investigating adjuvancy	241
8.3.1	Atomization	241
8.3.2	Retention	244
8.3.3	Predicting retention performance	246
8.3.4	Spreading and coverage	250
8.3.5	Uptake and translocation	252
8.3.6	Predicting uptake enhancement performance	253
8.4	Future prospects	257
	Acknowledgements	259
	References	260
9	Packaging of agrochemicals	264
	P. D. CURLE, C. D. EMMERSON, A. H. GREGORY, J. HARTMANN and P. NIXON	
9.1	Selection of packaging types	264
9.1.1	Selection of packaging materials for solid formulations	264

9.1.2	Selection of packaging materials for liquid formulations	267
9.1.3	Plastics	267
9.1.4	Metal	269
9.1.5	Glass	269
9.1.6	Recommended tests to be carried out on the main types of containers	269
9.1.7	Specifications	271
9.1.8	Packaging instructions	271
9.2	Closures	272
9.2.1	Prevention of leakage	272
9.2.2	Tamper evidence	273
9.2.3	Closure diameter – liquid products	274
9.2.4	Dispensing liquid products from packs designed for pouring	275
9.3	Labelling	277
9.4	Shelf life	278
9.5	Pack design with regard to easy rinsing and disposal	279
9.6	Types of secondary packaging	279
9.6.1	Unit cartons	281
9.6.2	Combination with primary pack	281
9.6.3	Methods for protection of unit loads	281
9.7	United Nations performance tests	281
9.8	Rinsing methods	283
9.9	Closed transfer systems	285
9.10	Collection of containers after use	287
9.11	Summary of key design criteria	289
9.12	Returnable packaging systems	289
9.12.1	Small-volume returnable containers	289
9.12.2	SVR design criteria	290
9.12.3	Stewardship	290
9.12.4	Closures	291
9.12.5	Labelling and marking	291
9.12.6	Handling	291
9.12.7	Disposal	291
9.13	ECPA standard SVR interface	291
9.13.1	Container interface/extractor valve	291
9.13.2	Coupler	292
9.13.3	Extractor valve and coupler combined	293
9.14	Future direction	295
	Glossary of terms and definitions	295
	Bibliography	299

10 Application techniques for agrochemicals **302**

G. A. MATTHEWS

10.1	Hydraulic nozzles	302
10.1.1	Types of hydraulic nozzle	308
10.2	Portable sprayers	312
10.3	Tractor sprayers	315
10.3.1	Portable lines	320
10.3.2	Orchard sprayers	320
10.4	Aerial application	321
10.5	ULV and CDA ground application	324
10.6	Fogs, mists and aerosols	327
10.6.1	Mists	328
10.7	Electrostatically charged applications	329
10.8	Chemigation	330
10.9	Granule, dust and seed treatments	331
10.9.1	Seed treatment	332

10.10	Miscellaneous	332
10.10.1	Weed wiper	332
10.10.2	Lure and kill	332
10.10.3	Tree injection	332
10.11	Standards	333
	References	333

11 Regulatory requirements in the European Union 337

W. K. DE RAAT, I. A. VAN DE GEVEL,
G. F. HOUBEN and B. C. HAKKERT

11.1	Introduction	337
11.2	Some basic features of 91/414/EEC	339
11.2.1	Which plant protection products?	339
11.2.2	Authorization of active substances and plant protection products	339
11.2.3	Existing and new active substances	340
11.2.4	Harmonization of methods and procedures	341
11.2.5	Quality standard	341
11.2.6	Mutual recognition	342
11.2.7	Data protection	342
11.2.8	Exemptions from the 'standard' authorization procedures	343
11.3	Overview of authorizations	344
11.4	Data requirements	345
11.5	Dossier preparation	348
11.6	Inclusion of active substances in Annex I of 91/414/EEC	353
11.6.1	Introduction	353
11.6.2	Initial evaluation	355
11.6.3	Detailed evaluation and the preparation of the monograph	356
11.6.4	Procedure	361
11.7	Authorization of plant protection products	361
11.7.1	General requirements	361
11.7.2	The Uniform Principles	362
11.7.3	Evaluation	363
11.7.4	Authorization criteria	366
11.8	Transitional measures and the review programme	370
11.8.1	Transitional authorizations	370
11.8.2	Review programme	371
11.9	Adjuvants	374
	Acknowledgements	374
Appendix 11.A	An overview of European Community general legislation associated with plant protection products	375

12 Regulatory requirements in the USA 377

J. M. WAGNER

12.1	Introduction	377
12.2	Federal pesticide laws	377
12.2.1	Federal Insecticide, Fungicide, and Rodenticide Act	378
12.2.2	Federal Food, Drug, and Cosmetic Act	379
12.2.3	Food Quality Protection Act, 1996	379
12.3	EPA Office of Pesticide Programs	383
12.3.1	Organization	384
12.3.2	Operating objectives	385
12.4	Product registration: obtaining a license to sell	386
12.4.1	Experimental Use Permit	386
12.4.2	Registration	387
12.4.3	Tolerances and exemptions from tolerances	393

12.5	Registration and tolerance data requirements	397
12.6	Data evaluation	397
	12.6.1 EPA risk assessment process	402
	12.6.2 Industry interaction with EPA: practical advice	403
12.7	Data protection and compensation	404
12.8	Reregistration and product defense	405
	12.8.1 Data Call-In and industry task force groups	406
	12.8.2 Special review process and cancellation of registrations	406
12.9	Product labeling	407
12.10	State registration requirements	409
12.11	Conclusions	411
	Acknowledgements	412
	Appendix 12.A Index of EPA study guidelines	412
	Appendix 12.B Sources of registration information	412
	Appendix 12.C Office of Pesticide Programs: senior EPA contacts	415
	References	416
13	Waste management and disposal of agrochemicals	418
	K. S. JOHNSON	
13.1	Introduction	418
13.2	Site management responsibilities	418
13.3	Waste minimization	419
	13.3.1 General principles and definitions	419
	13.3.2 Examples of source reduction options	420
	13.3.3 Example of recycling, use and reuse of waste and reclamation	421
13.4	Waste types	422
13.5	Waste handling	422
	13.5.1 Operator safety	422
	13.5.2 Workplace designated waste collection areas	423
	13.5.3 Site waste collection	423
	13.5.4 Secure waste storage	423
	13.5.5 Waste preparation prior to disposal	423
	13.5.6 Detoxification of containers	427
	13.5.7 Toxic wastes	428
13.6	Documentation and records	428
	13.6.1 Waste producer (originator)	428
	13.6.2 Identification	428
	13.6.3 Consignment	428
13.7	Waste disposal	428
	13.7.1 Waste disposal options	429
	13.7.2 Waste disposal contractors	429
	13.7.3 Waste transfer stations	429
	13.7.4 Transport	429
13.8	Treatment and disposal of aqueous effluents arising from formulation and packaging of agrochemical products	430
	13.8.1 Introduction	430
	13.8.2 Treatment process	430
	13.8.3 Plant details and layout	431
	13.8.4 Final effluent quality	431
	13.8.5 Effluent disposal	434
	13.8.6 Sludge disposal	434
	References	434
	Index	435
