Table of Contents

Preface	xiii
---------------	------

I. Overview

Chapter 1. Combustion Instabilities: Basic Concepts	3
Ben T. Zinn and Timothy C. Lieuwen, <i>Georgia Institute of Technology, Atlanta, Georgia</i>	
Introduction	3
Historical Overview	5
Causes of Instabilities	8
Growth and Saturation of Instabilities	16
Conclusion	22
References	24

II. Case Studies

Chapter 2. Combustion Instabilities in Industrial Gas Turbines: Solar Turbines' Experience	29
Kenneth O. Smith and James Blust, <i>Solar Turbines, Inc., San Diego, California</i>	
Introduction	29
Lean Premixed Combustion System Configurations and Operating Conditions	30
Commercial Introduction at 42 ppmv NOx	33
Emissions Reduction to 25 ppmv NOx	35
Combustor Pressure Oscillation Model	37
Centaur CPO Reduction	37
Mars CPO Reduction	38
Recent Experience	40
Conclusion: Needs and Future Challenges	40
References	41

Chapter 3. Incorporation of Combustion Instability Issues into	
Design Process: GE Aeroderivative and Aero Engines Experience ...	43
H. C. Mongia, T. J. Held, G. C. Hsiao, and R. P. Pandalai, <i>GE Transportation, Cincinnati, Ohio</i>	
Introduction	43
Fundamental Causes of Combustion Dynamics	45
Control Strategies	45
Examples of Combustion Dynamics	46
Combustion-Acoustic Modeling	51
Acoustic Modeling Results	57
Conclusion	61
References	61
Chapter 4. Combustion Instability and Its Passive Control:	
Rolls-Royce Aeroderivative Engine Experience	65
Tomas Scarinci, <i>Rolls-Royce Canada, Quebec, Canada</i>	
Overview of the Trent 60 Aeroderivative	66
Oscillatory Combustion in the Trent 60 DLE	68
Combustion System Design Modifications	87
Acknowledgments	87
References	88
Chapter 5. Thermoacoustic Design Tools and Passive Control:	
Siemens Power Generation Approaches	89
Werner Krebs, Sven Bethke, Joachim Lepers, Patrick Flohr, and Bernd Prade, <i>Siemens AG, Mülheim, Germany</i> and Cliff Johnson and Stan Sattinger, <i>Siemens AG, Orlando, Florida</i>	
Introduction	89
Siemens Gas-Turbine Products	89
Phenomenological Description	90
Solution Methods	93
Application	100
Conclusion	110
References	111
Chapter 6. Characterization and Control of Aeroengine Combustion	
Instability: Pratt & Whitney and NASA Experience	113
Jeffrey M. Cohen and William Proscia, <i>Pratt & Whitney, East Hartford, Connecticut</i> and John DeLaat, <i>NASA Glenn Research Center, Cleveland, Ohio</i>	
Introduction	113
Engine Combustion Instability	115
Engine Acoustic Analysis	116
Fuel Injector-Air Swirler Dynamic Response	118
Subscale Combustor Experiment	127

Active-Control Demonstration	135
Conclusion	143
Acknowledgments	144
References	144

Chapter 7. Monitoring of Combustion Instabilities:

Calpine's Experience 147

Jesse B. Sewell and Peter A. Sobieski, *Calpine Turbine Maintenance Group,
Pasadena, Texas*

Introduction	147
Combustion-Dynamics Monitoring System	148
General Instability Characteristics and Tuning Considerations	151
Detrimental Impacts of Combustion Dynamics	153
CDM for Combustor Health Monitoring: Case Studies	154
References	162

Chapter 8. Monitoring Combustion Instabilities: E.ON

UK's Experience 163

Catherine J. Goy, Stuart R. James and Suzanne Rea, *E.ON UK, England,
Nottingham, United Kingdom*

Introduction	163
Why Monitor Combustion Dynamics?	163
Description of the On-Line Combustion-Monitoring System	164
Benefits of Combustion-Dynamics Monitoring	165
Case Studies	166
Impact of Ambient Conditions on Dynamic Response	166
Impact of Operating Regime on Dynamic Response	167
Combustion Liner Failure	168
Burner Assembly Failure	171
Conclusion	175
References	175

III. Fundamental Processes and Mechanisms

Chapter 9. Combustion Instability Mechanisms in

Premixed Combustors 179

Sébastien Ducruix, Thierry Schuller, Daniel Durox, and Sébastien Candel,
CNRS and Ecole Centrale Paris, Châtenay-Malabry, France

Introduction	179
Acoustics for Reacting Flows	183
Heat Release as a Pressure Source	187
Heat-Release Fluctuations Driven by Waves	197
Conclusion	206
References	207

Chapter 10. Flow and Flame Dynamics of Lean Premixed Swirl Injectors	213
Ying Huang, Shanwu Wang, and Vigor Yang, <i>Pennsylvania State University, University Park, Pennsylvania</i>	
Introduction	213
Cold Flow Characteristics of Swirl Injectors	216
Flame Dynamics of Axial-Entry Swirl Injector	250
Conclusion	269
Acknowledgments	270
References	270
Chapter 11. Acoustic-Vortex-Flame Interactions in Gas Turbines	277
Suresh Menon, <i>Georgia Institute of Technology, Atlanta, Georgia</i>	
Introduction	277
Length and Time Scales	278
Theoretical Considerations	280
Factors Affecting AVF Interactions	287
Conclusion	310
Acknowledgments	310
References	310
Chapter 12. Physics of Premixed Combustion-Acoustic Wave Interactions	315
Timothy C. Lieuwen, <i>Georgia Institute of Technology, Atlanta, Georgia</i>	
Introduction	317
Background	318
Heat-Release Response to Flow and Mixture Perturbations	323
Conclusion	361
Acknowledgments	362
References	362
IV. Modeling and Diagnostics	
Chapter 13. Acoustic Analysis of Gas-Turbine Combustors	369
Ann P. Dowling and Simon R. Stow, <i>University of Cambridge, Cambridge, England, United Kingdom</i>	
Introduction	369
Linearized Equations of Motion	371
One-Dimensional Disturbances	374
Modal Solutions	389
Application to Gas-Turbine Combustors	394
Modal Coupling	401
Acoustic Absorbers	403

Limit-Cycle Prediction	406
Conclusion	409
Appendix: Derivation of Eq. (13.41)	410
References	411
 Chapter 14. Three-Dimensional Linear Stability Analysis of Gas Turbine Combustion Dynamics	 415
Danning You, Vigor Yang, and Xiaofeng Sun, <i>Pennsylvania State University, University Park, Pennsylvania</i>	
Introduction	417
Theoretical Formulation	418
Solution Procedure	433
Sample Studies	433
Conclusion	442
Acknowledgments	442
References	442
 Chapter 15. Implementation of Instability Prediction in Design: ALSTOM Approaches	 445
Christian Oliver Paschereit, <i>Hermann-Föttinger-Institute, Berlin University of Technology, Berlin, Germany</i> and Bruno Schuermans, Valter Bellucci, and Peter Flohr, <i>ALSTOM Power Ltd, Baden, Switzerland</i>	
Introduction	445
Network Representation of Thermoacoustic Systems	447
Experimental Determination of Transfer Matrices and Source Terms	449
Modeling the Burner Transfer Matrix	454
Reduced-Order Modeling of Complex Thermoacoustic Systems	461
Application to a Gas-Turbine Combustor	475
Conclusion	478
References	479
 Chapter 16. Experimental Diagnostics of Combustion Instabilities ...	 481
Jong Guen Lee and Domenic A. Santavicca, <i>Pennsylvania State University, University Park, Pennsylvania</i>	
Introduction	481
Pressure Measurements	482
Chemiluminescence Measurements	485
Infrared-Absorption Measurements	500
Laser-Induced Fluorescence Measurements	506
Laser Mie Scattering	517
Phase Doppler Particle Analysis	521
Conclusion	522
Acknowledgments	524
References	524

V. Combustion Instability Control

Chapter 17. Passive Control of Combustion Instabilities in Stationary Gas Turbines	533
Geo A. Richards and Douglas L. Straub, <i>U.S. Department of Energy, Morgantown, West Virginia</i> and Edward H. Robey, <i>Parsons Project Services, Morgantown, West Virginia</i>	
Introduction	534
Control-System Models	534
Methods to Improve Combustion Stability	550
Acoustic Dampers	560
Conclusion	569
Acknowledgments	570
Appendix	570
References	575
Chapter 18. Factors Affecting the Control of Unstable Combustors	581
Jeffrey M. Cohen, <i>Pratt & Whitney, East Hartford, Connecticut</i> and Andrzej Banaszuk, <i>United Technologies Research Center, East Hartford, Connecticut</i>	
Introduction	582
Description of the Combustor	585
Actuated Fuel Mixing	588
Actuation Time Delay	594
Fundamental Limitations of Achievable Performance	601
Conclusion	606
Acknowledgments	606
References	607
Chapter 19. Implementation of Active Control in a Full-Scale Gas-Turbine Combustor	611
Jakob Hermann, <i>IfTA GmbH, Groebenzell, Germany</i> and Stefan Hoffmann, <i>Siemens AG, Mülheim, Germany</i>	
Introduction	611
Implementation of AIC on Siemens-Type Vx4.3A Land-Based Gas Turbines	613
Results and Experiences with AIC during Gas-Turbine Operation	620
AIC Fault Tolerance and Long-Term Experiences	631
Advantages of Active Measures	632
Conclusion	632
References	633
Subject Index	635
Author Index	657
Supporting Materials	659
