Acknowledgements

This study uses data from Growing Up in Australia, the Longitudinal Study of Australian Children (LSAC). The LSAC is conducted in partnership between the Department of Families, Housing, Community Services and Indigenous Affairs (FaHCSIA), the Australian Institute of Family Studies (AIFS) and the Australian Bureau of Statistics (ABS). The findings and views reported in this paper are those of the authors and should not be attributed to FaHCSIA, AIFS or the ABS.

This paper uses unit record data from the LSAC, initiated, funded and managed by the Australian Government. The findings and views reported in this paper, however, are those of the authors and should not be attributed to DSS or the people and their communities involved in the study. The authors wish to acknowledge and thank the Steering Committees and

This is the author manuscript accepted for publication and has undergone full peer review but has not been through the copyediting, typesetting, pagination and proofreading process, which may lead to differences between this version and the [Version of Record](#).
