

PROCEEDINGS OF THE XIII INTERNATIONAL CONFERENCE ON COMPUTATIONAL
METHODS IN WATER RESOURCES/CALGARY/ALBERTA/CANADA/25 – 29 JUNE 2000

Computational Methods in Water Resources

Edited by

L.R. Bentley

University of Calgary, Alb., Canada

J.F. Sykes

University of Waterloo, Ont., Canada

C.A. Brebbia

Wessex Institute of Technology, UK

W.G. Gray

University of Notre Dame, South Bend, Ind., USA

G.F. Pinder

University of Vermont, Burlington, Vt., USA

VOLUME 2

Computational Methods, Surface Water Systems and Hydrology

A.A. BALKEMA/ROTTERDAM/BROOKFIELD/2000

Table of contents

8 Eulerian-Lagrangian Local Adjoint Method

ELLAM first decade: A review <i>I.Herrera, G.Herrera & J.Garfias</i>	591
Propagation properties of Eulerian Lagrangian localized adjoint methods <i>A.A.Aldama & V.Arroyo</i>	597
Three-dimensional finite-volume ELLAM implementation <i>C.I.Heberton, T.F.Russell, L.F.Konikow & G.Z.Hornberger</i>	603
A three-dimensional forward particle tracking Eulerian Lagrangian localized adjoint method for solution of the contaminant transport equation <i>P.Binning & M.A.Celia</i>	611
Treatment of internal sources in the finite-volume ELLAM <i>R.W.Healy & T.F.Russell</i>	619
An accurate simulator of compressible flow in porous media with wells <i>H.Wang, D.Liang, R.E.Ewing, S.L.Lyons & G.Qin</i>	623
Analytical tracking along streamlines in temporally linear Raviart-Thomas velocity fields <i>T.F.Russell & R.W.Healy</i>	631
A forward particle tracking technique in an Eulerian Lagrangian numerical scheme for the solute transport simulation in an unsaturated porous medium <i>M.L.Deangelis & M.G.Tanda</i>	639
A local streamline Eulerian-Lagrangian method for two-phase flow <i>A.K.Ask, H.K.Dahle, K.H.Karlsen & H.F.Nordhaug</i>	645
CFL-free, explicit schemes for advection-reaction equations <i>H.Wang & J.Liu</i>	651

9 Numerical methods

Collocation from a broad perspective <i>I.Herrera</i>	661
Efficient solver for mixed and control-volume mixed finite element methods <i>J.D.Wilson & T.F.Russell</i>	669

Test functions for three-dimensional control-volume mixed finite-element methods on irregular grids	677
<i>R.L.Naff, T.F.Russell & J.D.Wilson</i>	
Automatic time stepping with error control for numerical solution of nonlinear PDEs:	685
1. Algorithm development	
<i>P.Binning, D.N.Kavetski & S.W.Sloan</i>	
Automatic time stepping with error control for numerical solution of nonlinear PDEs:	693
2. Application to Richards equation	
<i>D.N.Kavetski, P.Binning & S.W.Sloan</i>	
A comparison of the finite difference technique with lattice gas and lattice Boltzmann automata for fluid flow in different geometries	701
<i>M.T.Shevalier, S.R.Sreenivasan & I.E.Hutcheon</i>	
The random walk particle tracking method revisited: The problem of variance reduction	709
<i>F.Konecny & J.Fürst</i>	
Meshless methods in contaminant hydrology	713
<i>H.W.Reeves & B.Moran</i>	
10 Scaling and heterogeneity	
Wavelet construction based on homogenization	721
<i>J.Koebbe & R.Thomas</i>	
Evaluation of computationally efficient percolation cluster metrics as hydrologic predictors in geologic media exhibiting multiple scales of heterogeneity	729
<i>C.T.Shirley</i>	
Scaling-up of groundwater flow equations via Butterworth filtering	735
<i>A.A.Aldama, M.Mejia & R.Beckie</i>	
Upscaling of conductivity in three-dimensional, heterogeneous, bounded formations	743
<i>E.K.Paleologos & T.S.Sarris</i>	
Two-phase flow upscaling with heterogeneous tensorial relative permeability curves	749
<i>A.Genty, C.Le Potier & P.Renard</i>	
Effective two-phase flow parameters for heterogeneous porous media	755
<i>B.Ataie-Ashtiani, S.M.Hassanizadeh, M.A.Celia, M.Ostrom & M.D.White</i>	
Methods for the identification of geostatistical model parameters: A reliability study by numerical analysis	763
<i>I.Butera</i>	
Simulation of random velocity fields: Comparison of Gaussian conditioning and a method of partitioning and sampling of the spectrum	771
<i>J.Fürst & F.Konecny</i>	
A latin-hypercube method for evaluation of hydraulic conductivity random fields	779
<i>Y.Zhang & G.Pinder</i>	

Direct solution of unsaturated flow in randomly heterogeneous soils <i>Z.Lu, S.P.Neuman, A.Guadagnini & D.M.Tartakovsky</i>	785
Parameterization alternatives for inverse stochastic simulation of heterogeneous formations <i>J.J.Gómez-Hernández</i>	793
Scale up of hydraulic conductivities: Comparison of laboratory experiments and numerical analyses <i>P.Renard, E.Ledoux & P.Ackerer</i>	799
Modeling environmental tracer-based groundwater ages in heterogeneous aquifers <i>G.S.Weissmann, E.M.LaBolle & G.E.Fogg</i>	805
Particle's tracking in 3-D heterogeneous porous media transport models <i>P.Salandin, V.Fiorotto & L.Da Deppo</i>	813
Zonation through seismic cluster analysis <i>L.R.Bentley, C.Laflamme, H.B.Mekki, M.Powojowski, K.Schaus & X.Huang</i>	819
Reconstruction of 3D porous media using simulated annealing <i>Z.Liang, M.A.Ioannidis & I.Chatzis</i>	825
Hydraulic and electrical conductivity of porous rock from 3D stochastic models of the microstructure <i>Z.Liang, M.A.Ioannidis & I.Chatzis</i>	833
Simulating basalt lava flows using a structure imitation approach <i>T.Clemo & J.Welhan</i>	841
Using fractal functions to capture subgridscale dynamics in porous flow and transport numerical models <i>B.J.Travis</i>	849
 11 Coastal and estuarine flow	
Current simulations and biological transport for the western continental margin of Vancouver Island <i>M.G.G.Foreman, C.L.Smith & P.Chandler</i>	857
Issues in hurricane surge computations using a GWCE-based f.e. model <i>J.C.Feyen, J.H.Atkinson & J.J.Westerink</i>	865
Evaluation of spatial discretizations of the shallow water equations <i>J.H.Atkinson & J.J.Westerink</i>	873
Simulation of two-dimensional density currents developing on a slope <i>S.-U.Choi & J.Chung</i>	881
On the representation of bathymetry by unstructured grids <i>A.B.Fortunato & A.Oliveira</i>	889

12 *Flow in surface water*

- A look back at 20 years of GWC-based shallow water models 899
R.L. Kolar & J.J. Westerink
- A mass conservation analysis of the GWCE formulation 907
A.A. Aldama, A. Aguilar, R.L. Kolar & J.J. Westerink
- An implicit time-marching algorithm for 2-D GWC shallow water models 913
K.M. Dresback & R.L. Kolar
- Phase behavior of a finite volume shallow water algorithm 921
C.M. Gossard & R.L. Kolar
- On spurious oscillations in primitive shallow water equations 929
J.-M. Hervouet
- A 2D-adaptive curvilinear grid method for shallow water flows 937
G. Soto & M. Berezowsky
- Large eddy simulation of compound channel flows with the Boltzmann scheme 943
J.Q. Deng, M.D. Su, M.S. Ghidaoui & W.G. Gray
- Unconditionally stable explicit schemes for non-linear diffusion wave routing 951
R.I. Patel & R. Misra
- Numerical modeling of depth-averaged turbulent flow in general coordinates 959
A.A. Jiménez & M. Berezowsky
- Numerical modeling of convective exchange processes in lakes 967
D.L. Stefanovic & H.G. Stefan
- Sequential polyhedral relaxations for solving water distribution network design problems to global optimality 975
H.D. Sherali, S. Subramanian & G.V. Loganathan
- Approximators for the Colebrook-White formula obtained through a hybrid regression method 983
J.W. Davidson, D.A. Savic & G.A. Walters
- Operation of Bighorn/Brazeau hydro power system of Transalta Utilities Corporation 991
N. Ilich, R. Drury, P. Godman & S. Simonovic

13 *Water shed modeling*

- Laboratory validation of a pollution flushing model for small tidal harbours 1001
R.W. Barber & M.J. Wearing
- 2D numerical modelling of a contaminant spreading in a steady lengthy river flow 1009
A.V. Babayan & K.A. Nadolin
- Unsteady, dynamic water quality simulation in small rivers 1015
J. Schramm, P.M. Schäfer, F. Schlaeger & J. Köngeter
- Numerical modeling of reactive chemical transport in the shallow water domain 1023
H.-P. Cheng

Implementation of mixing-cell modeling for identifying and quantifying sources of recharge and pollution into a riverbed aquifer along an ephemeral stream <i>E.M.Adar & J.Laron</i>	1029
Estimating the risk of water contamination by <i>Cryptosporidium parvum</i> oocysts <i>L.L.Yeghiazarian & C.D.Montemagno</i>	1035
Two-dimensional simulation of bedload transport and bed evolution <i>F.Rivera & M.Berezowsky</i>	1043
Simulating sediment transport processes by means of numerical models <i>R.Klasinc, G.Goekler, H.Knoblauch & M.Sadrawetz</i>	1051
Concept for an integrated experimental and numerical investigation of cohesive sediment transport formulae <i>C.Schweim, V.Spork, J.V.Prochnow & J.Köngeter</i>	1059
Multi-parameter fingerprinting of sediment sources: Uncertainty estimation and tracer selection <i>S.W.Franks & J.S.Rowan</i>	1067
Front-fixing modeling of turbidity currents <i>S.Kostic & G.Parker</i>	1075
 14 Surface transport	
Uniqueness of place and non-uniqueness of models in assessing predictive uncertainty <i>K.Beven</i>	1085
A fully-coupled model of surface and subsurface water flow: Model overview and application to the Laurel Creek watershed <i>E.A.Sudicky, J.P.Jones, R.G.McLaren, D.S.Brunner & J.E.VanderKwaak</i>	1093
Numerical modeling of natural groundwater recharge <i>Y.Hamdi, J.-L.Robert & R.Therrien</i>	1101
Coupling of parallel river and groundwater models to simulate dynamic groundwater boundary conditions <i>G.Carabin & A.Dassargues</i>	1107
Physically-based distributed model for coupled surface runoff and subsurface flow simulation at the catchment scale <i>A.C.Bixio, S.Orlandini, C.Paniconi & M.Putti</i>	1115
Development of a watershed numerical model <i>G.Huang & G.-T.Yeh</i>	1123
Simulation of stream losses affected by the vadose zone <i>D.M.Peterson & H.Zhang</i>	1131
Vegetation-hydrology response to environmental change: Computational tools for scaling forest water use <i>D.S.Mackay</i>	1139

Spatial statistics of snowmelt <i>T.A. Erickson, M.W. Williams & R.A. Sommerfeld</i>	1147
Modelling long-term rainfall persistence at multiple sites <i>M. Thyer & G. Kuczera</i>	1153
Record-breaking behavior of floods in the United States <i>A. Zafirakou-Koulouris, R. M. Vogel & N.C. Matalas</i>	1161
Model appropriateness for simulation of climate change and river flooding <i>M.J. Booij</i>	1169
Author index	1177
