

# **COMPUTERS IN ENGINEERING 1994**

## **VOLUME 2**

Finite Element Analysis

CAD/CAM

Fluid Mechanics and Energy Systems

AI/Feature-Based Design and Manufacturing

Computers in Engineering Education

Robotics and Controls

Multimedia Application/Interface

TECHNISCHE  
INFORMATIONSBIBLIOTHEK  
UNIVERSITÄTSBIBLIOTHEK  
HANNOVER

*proceedings of*  
THE 1994 ASME INTERNATIONAL  
COMPUTERS IN ENGINEERING CONFERENCE AND EXHIBITION  
SEPTEMBER 11-14, 1994  
MINNEAPOLIS, MINNESOTA

*sponsored by*  
THE COMPUTERS IN ENGINEERING DIVISION, ASME

*editor*  
KOSUKE ISHII

*associate editors*

KENNETH BANNISTER

RICHARD CRAWFORD

ASHWANI K. GUPTA

YONG SE KIM

MOHAMMED KHOSROWJERDI

ANTHONY DE SAM LAZARO

T. GARY YIP

TOC

Maximum Stress at Intersecting Bores of Pressurized Blocks <i>Ajay Garg</i> .....	463
<b>APPLICATIONS OF CAD AND CAGD</b>	
Anthropometry-Based Surface Modeling of the Human Torso <i>Peng Li and Peter R. M. Jones</i> .....	469
CAD Based Inspection Analysis and Error Display <i>Michael J. Cardew-Hall and Phillip Dench</i> .....	475
Computer Aided Local Modifications for the Transition From Part Design to Die Design <i>Shao-Chiung Lu, R. Allen Miller, and Gary L. Kinzel</i> .....	483
An Off-Line Graphical Environment for Programming Robots Using Commercial CAD Systems <i>Karim A. Abdel-Malek</i> .....	491
<b>VOLUME 2</b>	
<b>FINITE ELEMENT TECHNOLOGIES FOR SOLUTION OF MILITARY PROBLEMS</b>	
Nonlinear Shell Deflections With Thickness Updating <i>C. W. S. To and M. L. Liu</i> .....	501
Effective Properties of 3D Laminated Composites for Finite Element Applications <i>Amos Alexander, Jerome T. Tzeng, William H. Drysdale, and Bruce P. Burns</i> .....	507
Analysis of a Balanced Breech System for the M1A1 Main Gun System Using Finite Element Techniques <i>David A. Hopkins and Stephen A. Wilkerson</i> .....	519
Use of Finite-Element Stress Analysis in the Design of a Tank-Cannon-Launched Training Projectile <i>Michael S. L. Hollis</i> .....	533
<b>NEW ADVANCES IN FINITE ELEMENT ANALYSIS</b>	
A Comparative Study of Flux Projection Type Error Estimators in Elasto-Plastic Finite Element Analysis <i>Ravi P. Tetambe and Sunil Saigal</i> .....	545
Estimation of Error in Acoustic Analysis <i>Ravi P. Tetambe and C. Rajakumar</i> .....	555
Adaptivity and Mesh Generation in 2-D Finite Element Analysis <i>C. A. Almeida</i> .....	561
<b>APPLIED COMPUTATIONAL MECHANICS</b>	
An Efficient Numerical Method for Dynamic Interaction Analysis of High-Speed Shinkansen Vehicles, Rail, and Bridge <i>Makoto Tanabe, Hajime Wakui, and Nobuyuki Matsumoto</i> .....	567
A General Finite Element Approach for Porous and Non-Porous Metal-Forming Processes <i>B. Sudhakar, John E. Jackson, Jr., William K. Rule, and Imtiaz Haque</i> .....	573
3-D Finite Element Modeling and Analysis of an Armored Vehicle Hull With Multiple Access Openings <i>Aaron D. Gupta, Joseph M. Santiago, and Christopher Meyer</i> .....	581

Complex Modal Analysis of a Flat Belt Pulley System With Belt Damping and Coulomb Damped Tensioner <i>Theodore C. Kraver, G. William Fan, and Jami Shah</i> .....	589
<b>COMPUTATIONAL TECHNOLOGIES ON HIGH PERFORMANCE COMPUTERS</b>	
Computer Simulations for Frontal Impact <i>Jiamaw Doong and James C. Cheng</i> .....	597
Challenge Face by Truck Frontal Crash Analysis <i>James C. Cheng and Jialiang Le</i> .....	607
Dynamic Response of Composites to Impact Loading <i>Wing L. Cheng</i> .....	615
Bulk Forming Simulation on High Performance Computers <i>Wing L. Cheng</i> .....	629
<b>ADVANCES IN NUMERICAL ALGORITHMS FOR SOLVING FINITE ELEMENT PROBLEMS</b>	
Analysis of Linear Nonconservative Vibrations <i>Fai Ma</i> .....	649
Banded Doolittle's Method for the Solutions of Large Systems of Equations <i>Cemil Bagci</i> .....	655
A Surface Interpolation Scheme Based on the Theory of Conjugate Surfaces <i>Chih-Hsin Chen</i> .....	663
On the Finite Element Solution of Frictional Contact Problems Using Variational Inequalities <i>M. H. Refaat and S. A. Meguid</i> .....	669
<b>COMBUSTION AND CHEMICAL REACTION</b>	
Influence of PVC on the Product Composition of Solid Waste During Thermal Destruction <i>A. K. Gupta, E. Ilanchezhian, and E. L. Keating</i> .....	679
Three-Dimensional Flowfield Prediction <i>T.-K. Lin and D. G. Lilley</i> .....	689
Simulation of Two-Dimensional Turbulent Recirculating Flow Field Behind a V-Shaped Bluff Body <i>Z. Gu and M. A. R. Sharif</i> .....	695
Adiabatic Flame Temperature and Product Composition for Lean Combustion of Hydrogen-Methane Combination <i>Zafer Dülger</i> .....	707
<b>FLOWFIELD SIMULATION</b>	
Numerical Solution to the Radial Sink Flow Between Two Disks <i>Georgios H. Vatistas, Abdurazag Ghila, and Gley Zitouni</i> .....	713
Flowfield Prediction and Color Graphic Interpretation <i>M. Dong, T.-K. Lin, and D. G. Lilley</i> .....	719
Axially Lumped Versus Axially Distributed Modeling of Liquid-To-Gas Cross-Flow Heat Exchanger Transients <i>M. G. Elissa and S. P. Rooke</i> .....	725
Computer Simulation of Aerosol Motion <i>Bruce S. MacGibbon and Ahmed A. Busnaina</i> .....	733
Finite Element Analysis for a CAD of a Concrete Mixer Drum <i>Hossam S. Badawi, Sherif A. Mourad, and Sayed M. Metwalli</i> .....	741
Computer Aided Simulation of Turbulent Flow in Pulsate Jet Nozzle <i>Zheng Li and E. S. Geskin</i> .....	749

Examination of a "Map-Based" Approach to Modeling Steady State Heat Pump Performance With Variable Air Flow Rates <i>P. Mawasha, S. P. Rooke, and R. Gross</i> .....	753
<b>THERMAL SYSTEMS</b>	
A New Method and Device for Temperature Measurement Using One-Dimensional Heat Equation <i>Nicolae A. Damean</i> .....	763
CAD and Optimization of Helical Torsion Springs <i>Sayed M. Metwalli, M. Alaa Radwan, and Abdel Aziz M. Elmeligy</i> .....	767
Boundary Layers on a Rotating Rough Disk <i>Ali Heydari, Ramin Miryan, and Saeid Sharifi</i> .....	775
<b>APPLICATIONS AND TESTING OF GRAPHICAL USER INTERFACES</b>	
Process Improvement Using Design by Experiments <i>Hsien-chen Li and Fuyau Lin</i> .....	779
Hypermedia Programs for Mechanical Engineering <i>Timothy K. Hight, Lee E. Hornberger, Elizabeth Lawrence, and Matthew W. Gawlowski</i> .....	785
<b>MULTIMEDIA AND VISION TECHNOLOGY</b>	
Storage of Spatial Data in Semantic Databases <i>Naphtali Rishe and Qiang Li</i> .....	793
SCI Lamp for Multimedia Applications <i>Qiang Li</i> .....	801
<b>FUZZY LOGIC SIMULATION AND ROBOTICS</b>	
A Self-Organizing Fuzzy Controller Using Neural Networks <i>Wei Li and Zuowei Wu</i> .....	807
Sensor-Based Robot Navigation in Uncertain Environments Using Fuzzy Logic <i>Wei Li and Kezhong He</i> .....	813
Computer Simulations for Design and Optimization of a Fuzzy Control System <i>Dean B. Edwards, John R. Canning, and Anthony de Sam Lazaro</i> .....	819
<b>INTELLIGENT SYSTEMS</b>	
Zero Turn Radius Vehicle Incorporating Computer-Controlled "Intelligent Castors" <i>I. J. Spark and B. C. Besselink</i> .....	825
The Control of Multi-Bending: A Flexible Method to Fabricate Complex Structural Parts <i>Jack X. Luo and Kim A. Stelson</i> .....	829
Detailed Transportation Simulation for Improved Logistics Quality <i>Harry C. Petersen and Amy Rummel</i> .....	839
Orientation and Trajectory Determination for a Robot With a Laser Distance-Meter as End Effector <i>Luciano E. Chiang and Eugenio Stamm</i> .....	845
<b>MICROCOMPUTERS IN A CLASSROOM</b>	
On Development of Engineering Animation Software <i>Y. C. Pao</i> .....	851
The Use of Spreadsheets in Compressible Flow Courses <i>Edward F. Young</i> .....	857

Integrating Microcomputer Applications Into Engineering Technology Programs <i>Kathleen L. Kitto</i> .....	863
Effective Integration of Computer Programming in Engineering Education <i>Joseph A. Untener</i> .....	873
Restructuring Applied Thermodynamics: Exploratory Thermodynamics <i>John S. Morse</i> .....	879
<b>CAD IN HIGHER EDUCATION</b>	
Using Exponential Cubic Splines to Predict Low Temperature Behavior of Elastomeric Materials <i>Terry E. Shoup and George R. Fegan</i> .....	891
Engineering Analysis and Simulation Using Visual BASIC <i>Kelvin Ng, Walter M. Presz, Jr., and M. Khosrowjerdi</i> .....	897
Principal Elements of Solid Modeling <i>Y. C. Pao</i> .....	913
Design and Analysis of a Mobile Robotic Wheel by Nonlinear Programming <i>Prabhudutt Jha</i> .....	919
<b>PARAMETRIC AND OBJECT-ORIENTED SYSTEMS</b>	
Linking Expert Group Technology With Parametric Design <i>Joon Seok Lee, Kang J. Chang, and Larry Lichten</i> .....	931
Concept, Development and Implementation of DAMOS-C: The Object Oriented Approach to Multibody Systems <i>Andreas Daberkow and Werner Schiehlen</i> .....	937
<b>Author Index</b> .....	953
