Condition-based maintenance for complex systems

COORDINATING MAINTENANCE AND LOGISTICS PLANNING
FOR THE PROCESS INDUSTRIES

Publisher: University of Groningen
Groningen, The Netherlands

Printed by: Ipskamp Printing B.V.
Enschede, The Netherlands

ISBN (print): 978-90-367-9344-5

ISBN (Ebook): 978-90-367-9343-8

Condition-based maintenance for complex systems

Coordinating maintenance and logistics planning
for the process industries

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. E. Sterken
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op
donderdag 1 december 2016 om 12.45 uur

door

Minou Catharina Anselma Olde Keizer

geboren op 6 februari 1990
te Oldenzaal

Promotor

Prof. dr. R.H. Teunter

Copromotor

Dr. J. Veldman

Beoordelingscommissie

Prof. dr. A.A. Syntetos

Contents

1	Introduction	1
1.1	Maintenance in the process industries	2
1.2	Maintenance strategies	2
1.3	Condition monitoring and CBM	4
1.4	CBM for complex systems	5
1.4.1	Structural dependence	5
1.4.2	Stochastic dependence.	7
1.4.3	Resource dependence	7
1.4.4	Economic dependence.	8
1.5	Contribution	8
1.5.1	Scope	8
1.5.2	Thesis outline.	9
	References	12
2	CBM policies for complex systems: a review	15
2.1	Introduction	17
2.2	Structural dependence.	19
2.2.1	Technical dependence	19
2.2.2	Performance dependence	22
2.3	Stochastic dependence	25
2.3.1	Failure-induced damage	25
2.3.2	Load sharing	27
2.3.3	Common-mode deterioration	28
2.4	Resource dependence	29
2.4.1	Maintenance worker restrictions	29
2.4.2	Tool restrictions.	31
2.4.3	Spares restrictions	31
2.4.4	Transport restrictions	32
2.4.5	Budget restrictions	33
2.5	Economic dependence	33
2.5.1	Negative economic dependence	33
2.5.2	Positive economic dependence	34

2.6	Multiple types of dependencies	40
2.6.1	Economic dependence without performance dependence . .	42
2.6.2	Performance dependence without economic dependence . .	42
2.6.3	Both economic dependence and performance dependence .	44
2.7	Conclusion and future research directions	48
	References	51
3	CBM for a series system with economic dependence	57
3.1	Introduction	59
3.2	System description	60
3.2.1	Deterioration model	60
3.2.2	Maintenance actions and corresponding costs.	62
3.2.3	Performance criteria	63
3.3	Multi-threshold maintenance policy	63
3.4	Evaluation of the performance criteria	65
3.4.1	Stationary law.	65
3.4.2	Long-run average cost per time unit and system availability .	67
3.5	Numerical investigation	72
3.5.1	Comparison to classical maintenance policies.	76
3.5.2	Sensitivity analysis	77
3.6	Conclusion	80
	References	83

4.2.2	Maintenance actions and corresponding costs.	89
4.3	Multi-threshold maintenance policy	90
4.4	Mathematical model.	91
4.5	Illustrative example	94
4.5.1	Comparison to classical maintenance policies.	97
4.6	Conclusion	98
	References	99
	Appendix 4.A. Expression for the expected unavailability cost	100
5	CBM for a redundant, k-out-of-N system with economic dependence	103
5.1	Introduction	105
5.2	Literature review	106

5.3	System description	107
5.3.1	Deterioration model	107
5.3.2	Maintenance actions and corresponding costs.	108
5.4	Maintenance cost model.	109
5.5	Numerical investigation	111
5.5.1	Base case	111
5.5.2	Sensitivity analysis with respect to corrective replacement cost	115
5.5.3	Sensitivity analysis with respect to maintenance set-up cost .	116
5.5.4	Sensitivity analysis with respect to number of components. .	117
5.5.5	Sensitivity analysis with respect to monitoring accuracy . . .	120
5.6	Continuous degradation.	121
5.7	Conclusion	123
	References	125
