Contents

Preface ix

List of Participants xi

Bifurcation to rotating waves from non-trivial steady-states 1
P.J. Aston, A. Spence and W. Wu

Use of approximate inertial manifolds in bifurcation calculations 9
H.S. Brown, M.S. Jolly, I.G. Kevrekidis and E.S. Titi

Understanding steady-state bifurcation diagrams for a model reaction-diffusion system 25
J.C. Eilbeck and J.E. Furter

Bifurcations, chaos and self-organization in reaction-diffusion systems 43
G. Nicolis and P. Gaspard

Eigenvalue problems with the symmetry of a group and bifurcations 71
B. Werner

Steady-state/steady-state mode interaction in nonlinear equations with Z_2-symmetry 89
W. Wu, K.A. Cliffe and A. Spence

Symbolic computation and bifurcation methods 105
E. Freire, E. Gamero and E. Ponce

Bifurcation analysis : a combined numerical and analytical approach 123
M. Kleczka, W. Kleczka and E. Kreuzer

Introduction to the numerical solution of symmetry-breaking bifurcation problems 139
P.J. Aston

A computational method and path following for periodic solutions with symmetry 153
M. Dellnitz

Global bifurcations and their numerical computation 169
W.-J. Beyn

Computation of invariant manifold bifurcations 183
Yu.A. Kuznetsov

A method for homoclinic and heteroclinic continuation in two and three dimensions 197
A.J. Rodríguez-Luis, E. Freire and E. Ponce

The global attractor under discretisation 211
A. Stuart

The numerical detection of Hopf bifurcation points 227
G. Moore, T.J. Garratt and A. Spence

A Newton-like method for simple bifurcation problems with application to large sparse systems 247
Z. Mei

Aspects of continuation software 261
W.C. Rheinboldt, D. Roose and R. Seydel

Interactive system for studies in nonlinear dynamics 269
P. Rosendorf, J. Orsag, I. Schreiber and M. Marek

LINLBF : A program for continuation and bifurcation analysis of equilibria up to codimension three 283
A.I. Khibnik

On the topology of three-dimensional separations, A guide for classification 297
P.G. Bakker

The construction of cubature formulae using continuation and bifurcation software 319
R. Cools and A. Haegemans

Determining an Organizing Center for Passive Optical Systems 335
G. Dangelmayr and M. Wegelin

Optimization by continuation 349
J.P. Kernevez, Y. Liu, M.L. Seoane and E.J. Doedel

Stability of Marangoni convection in a microgravity environment 363
H.D. Mittelmann

Computing with reaction-diffusion systems : applications in image processing 379
C.B. Price, P. Wambacq and A. Oosterlinck

Bifurcation of Codimension 2 for a discrete map 389
A. Steindl

Bifurcation of periodic solutions in PDE's : Numerical techniques and applications *(abstract)* 397
M. Holodniok, M. Kubíček and M. Marek

Bifurcation and chaos in Chua's circuit family *(abstract)* 401
L.O. Chua

Continuation and collocation for parameter dependent boundary value problems *(abstract)* 405
G. Bader and P. Kunkel

Porous medium combustion *(abstract)* 407
H.M. Byrne

Block elimination and the computation of simple turning points *(abstract)* 409
W. Govaerts

Bifurcation into gaps in the essential spectrum *(abstract)* 411
T. Küpper

Application of numerical continuation in aerospace problems *(abstract)* 413
E. Riks

Application of a reduced basis method in structural analysis *(abstract)* 415
H. Schippers and M. Koolstra

Some applications of bifurcation theory in engineering *(abstract)* 417
H. Troger

Higher order predictors in numerical path following schemes *(abstract)* 419
K. Ulrich

Index 421
