Espoo/Turku, Finland

June 2001 (1<sup>st</sup> ed.)

April 2002 (2<sup>nd</sup> ed.)

February 2004 (3<sup>rd</sup> ed.)

*limited, printed third edition (15 copies)*

(# 131-145)

*all material, including overhead-sheet lecture material  
can be freely downloaded in .pdf format from*

*[www.but.fi/~rzevenbo/gasbook](http://www.but.fi/~rzevenbo/gasbook)*

*[eny.but.fi/gasbook](http://eny.but.fi/gasbook)*

*where also future updates will be posted*

**Report TKK - ENY - 4**

**ISSN 1457 - 9944**

**ISBN 951 - 22 - 5527 - 8**

# *Table of contents*

## *Chapter 1 Preface / introduction*

1.1	Background .....	1-1
1.2	Objective and scope .....	1-1
1.3	About the authors .....	1-2
1.4	Acknowledgements .....	1-3
1.5	Second edition .....	1-3
1.6	Third edition .....	1-3

## *Chapter 2 Flue gases and fuel gases*

2.1	Introduction .....	2-1
2.2	Flue gases and fuel gases: combustion, gasification, pyrolysis, incineration and other processes .....	2-2
2.3	Combustion and gasification technologies for heat and power .....	2-3
2.4	Waste incineration and waste-to-energy processes .....	2-8
2.5	Cement plants .....	2-9
2.6	Emission standards and exhaust gas composition .....	2-10
2.7	References .....	2-11

## *Chapter 3 Sulphur*

3.1	Introduction .....	3-1
3.2	Sulphur in fuel .....	3-3
3.3	Formation of sulphur compounds during combustion and gasification ..	3-5
3.4	Emission standards for SO <sub>2</sub> .....	3-7
3.5	Options for sulphur emissions control .....	3-9
3.6	Flue gas desulphurisation (FGD) 1: Non-regenerable processes .....	3-11
3.7	Flue gas desulphurisation (FGD) 2: Renewable processes .....	3-16
3.8	In-duct sorbent injection at low temperatures .....	3-19
3.9	High temperature SO <sub>2</sub> capture by furnace sorbent injection .....	3-21
3.10	Costs related to FGD .....	3-25
3.11	High temperature SO <sub>2</sub> capture during fluidised bed combustion .....	3-26
3.12	H <sub>2</sub> S control at low temperatures .....	3-34
3.13	H <sub>2</sub> S control by the Claus process .....	3-36
3.14	High temperature H <sub>2</sub> S control by regenerable sorbents .....	3-39
3.15	Sulphur emissions from transport vehicles .....	3-47
3.16	References .....	3-48

## **Chapter 4 Nitrogen**

4.1	Introduction	4-1
4.2	Nitrogen in fuels	4-5
4.3	Emission standards for NO <sub>x</sub>	4-7
4.4	Nitrogen oxides: thermodynamics <i>versus</i> chemical kinetics	4-9
4.5	Nitrogen oxide formation mechanisms during burner combustion	4-12
4.6	Nitric oxide decomposition during burner combustion	4-20
4.7	Formation and decomposition of NO <sub>2</sub> during burner combustion	4-22
4.8	Low NO <sub>x</sub> technology	4-24
4.9	Flue gas treatment for NO <sub>x</sub> reduction	4-30
4.10	Costs for NO <sub>x</sub> control technologies	4-34
4.11	Chemistry of nitrogen oxides at atmospheric fluidised bed combustion	4-35
4.12	Reaction of nitrogen oxides at pressurised combustion	4-49
4.13	Reactions of nitrogen compounds in gasification processes	4-50
4.14	Removal of nitrogen compounds from gasifier product gas	4-52
4.15	Nitrogen oxides formation and reduction in gas turbines	4-55
4.16	Nitrogen oxides formation and reduction in (transport vehicle) engines	4-58
4.17	References	4-62

## **Chapter 5 Particles**

5.1	Introduction	5-1
5.2	Ash-forming elements in fuels	5-5
5.3	Particulate emissions standards	5-10
5.4	Options for particulate emissions control	5-12
5.5	Gravity settlers	5-15
5.6	Cyclones	5-16
5.7	Electrostatic precipitators (ESPs)	5-21
5.8	Filter systems	5-33
5.9	Wet scrubbers	5-41
5.10	Cost comparison ESP, filter, cyclone	5-43
5.11	High temperature, high pressure (HTHP) particulate control	5-44
5.12	Particulate emissions control for vehicles	5-53
5.13	References	5-54
	Appendix	5-57

**Chapter 6 VOCs, PAHs, soot, tar, CO**

6.1	Introduction	6-1
6.2	Emission standards for (non-halogenated) organic compounds	6-3
6.3	Volatile organic compounds (VOCs) and ground-level ozone	6-3
6.4	Control of volatile organic compounds (VOCs)	6-4
6.5	Control of polycyclic aromatic hydrocarbons (PAHs)	6-9
6.6	Soot	6-13
6.7	Tar	6-16
6.8	CO	6-18
6.9	References	6-19

**Chapter 7 Halogens, dioxines/furanes**

7.1	Introduction	7-1
7.2	Halogens in fuels and waste streams	7-3
7.3	Emission standards for halogens and dioxines/furanes	7-6
7.4	Chlorine-related corrosion	7-7
7.5	Hydrogen chloride (HCl) emissions control	7-9
7.6	Formation of dioxins/furans (PCDD/Fs)	7-14
7.7	Control of dioxins/furans (PCDD/Fs)	7-20
7.8	Other halogen compounds (HF, HBr, PBDD/Fs)	7-22
7.9	References	7-23

**Chapter 8 Trace elements, alkali metals**

8.1	Introduction	8-1
8.2	Trace elements in fuels	8-3
8.3	Trace elements in flue gases and fuel gases	8-4
8.4	Emission standards and gas turbine specifications for trace elements	8-8
8.5	Trace elements emissions control ( <i>excl.</i> mercury)	8-10
8.6	Mercury emissions control	8-13
8.7	Alkali in fuels	8-22
8.8	Alkali in flue gases and fuel gases	8-22
8.9	Alkali control in hot gases: aluminosilicate sorbents	8-26
8.10	References	8-27

***Chapter 9 Greenhouse gases and ozone-depleting gases***

9.1	Introduction .....	9-1
9.2	Carbon dioxide emissions reduction, capture and storage .....	9-5
9.3	Emission control for greenhouse gases other gases than CO <sub>2</sub> .....	9-10
9.4	Emission control for ozone-depleting gases .....	9-11
9.5	References .....	9-11

***Chapter 10 Cross-interacting effects of control methods***

10.1	Introduction .....	10-1
10.2	Gas clean-up for power plants .....	10-2
10.3	Gas clean-up for flue gases from waste incineration and cement plants .....	10-3
10.4	Clean-up of fuel gases .....	10-4
10.5	Cross-effects between gas clean-up processes .....	10-4
10.6	References .....	10-7

***List of abbreviations***
