
Erratum: Intense and highly localized gene conversion activity in human meiotic crossover hot spots

A J Jeffreys & C A May
Nat. Genet. 36, 151–156 (2004).

In the version of this paper initially published online, several lines were missing from the bottom of each page of the **Supplementary Note**. This mistake has been corrected online.

Corrigendum: Gene expression–based high-throughput screening (GE-HTS) and application to leukemia differentiation

K Stegmaier, K N Ross, S A Colavito, S O'Malley, B R Stockwell & T R Golub
Nat. Genet. 36, 257–263 (2004).

Brent Stockwell is affiliated with The Whitehead Institute for Biomedical Research, Cambridge, Massachusetts 02139, USA and is not affiliated with The Eli and Edythe L. Broad Institute.

Corrigendum: The *hyh* mutation uncovers roles for α Snap in apical protein localization and control of neural cell fate

T H Chae, S Kim, K E Marz, P I Hanson & C A Walsh
Nat. Genet. 36, 264–270 (2004).

The protein designated INADL throughout the paper should instead be called Pals1.
