Collaboration between academics and industry in clinical trials: cross sectional study of publications and survey of lead academic authors

An error occurred in the results sections of the abstract and main body of this research paper by Rasmussen et al (BMJ 2018;363:c3654, doi:10.1136/bmj.k3654). The number of

studies reporting funder involvement in design should be 173 (87%) rather than 183 (92%).
