Received 4 August 2014

Accepted for publication 5 August 2014

Published 15 August 2014

Since publication, the authors became aware of an important typing error (one word) in the Conclusions of their article:

The Conclusions incorrectly states ‘...while forests adapted and ‘reduced’ their WUE significantly ...’ (page 10). The word ‘reduced’ is incorrect and should read ‘increased’. It is correctly stated in the Abstract and throughout the

Results and Discussion sections. It is also correctly reported in the related Insight article on EnvironmentalResearchWeb (<http://environmentalresearchweb.org/cws/article/news/54686>).

We apologize to the readers for this mistake.
