hemp, beet curly top virus, beet leafhopper, virome, next generation sequencing

A Corrigendum on

First insights into the virus and viroid communities in hemp (*Cannabis sativa*)

By Chiginsky J, Langemeier K, MacWilliams J, Albrecht T, Cranshaw W, Fulladolsa AC, Kapuscinski M, Stenglein M and Nachappa P (2021) *Front. Agron.* 3:778433. doi: 10.3389/fagro.2021.778433

In the published article, there was an error. The incorrect terminology was used.

A correction has been made to **Introduction**, Paragraph 3. This sentence previously stated:

“The virus is transmitted only by the leafhopper, *Circulifer tenellus* Baker (Hemiptera: Cicadellidae) in a circulative propagative manner (Bennett, 1971) (reviewed in Chen and Gilbertson, 2016).”

The corrected sentence appears below:

“The virus is transmitted only by the beet leafhopper, *Circulifer tenellus* Baker (Hemiptera: Cicadellidae) in a circulative non-propagative manner (Bennett, 1971) (reviewed in Chen and Gilbertson, 2016).”

In the published article, there was an error. Adams and Barbara 1982 was incorrectly cited.

A correction has been made to **Discussion**, Paragraph 9. The below sentence has been removed:

“In addition to mechanical transmission, transmission by aphid vectors at low efficiency has also been reported (Adams and Barbara, 1982).”

The reference Adams and Barbara, 1982 has been removed from the reference list.

The authors apologize for these errors and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
