Unfortunately, there is a typing error in the *Applicability of the method* section. The analysis was performed on 129 samples as is indicated in Table 6. The percentage of positive samples should, therefore, always read 47 % as it is indicated in the text.

In the last paragraph of the *Results and discussion* section “pictogram-per-litre” should correctly be “pictogram-per-millilitre (ppt)”.

The online version of the original article can be found at <http://dx.doi.org/10.1007/s00216-011-5541-y>.
