

Erratum

Development of the Mayo Investigational Neuromodulation Control System: toward a closed-loop electrochemical feedback system for deep brain stimulation

Laboratory investigation

To THE EDITOR: We appreciate publication of our article entitled “Development of the Mayo Investigational Neuromodulation Control System: toward a closed-loop electrochemical feedback system for deep brain stimulation. Laboratory investigation” (*J Neurosurg* 119:1556–1565, 2013).

After publication of the article, we realized that we had erred in listing grant support for the study. We inadvertently had listed two grants from the National Institutes of Health as K08 NS 52252 and R01 NS 74013 when they should have been K08 NS 52232 and R01 NS 75013. In correcting these errors, the first sentence of the *Disclosure* section of the paper has been changed to read:

Support was provided to K.H.L. by the NIH (Grant Nos. **K08 NS 52232**, R01 NS 70872, and **R01 NS 75013**) and The Grainger Foundation.

The corrections are in boldface.

We apologize to the editor and readers, and we are pleased to have the opportunity to make these corrections. The errors were corrected online as of March 28, 2014.
