

Diatoms and Lake Acidity

Reconstructing pH from siliceous algal remains in lake sediments

Edited by

J.P. Smol, R.W. Battarbee, R.B. Davis and J. Meriläinen

Contents

Preface	VII
1. Gunnar Nygaard: A guiding influence on paleolimnological research by J. Kristiansen	1
2. Diatoms as indicators of pH: An historical review by R.W. Battarbee, J.P. Smol & J. Meriläinen	5
Part one: Taxonomy	
3. The genus <i>Melosira</i> from soft-water lakes with special reference to northern Michigan, Wisconsin and Minnesota by K.E. Camburn & J.C. Kingston	17
4. A new diatom species, <i>Fragilaria acidobiontica</i> , from acidic lakes in northeastern North America by D.F. Charles	35
5. Two forms of <i>Tabellaria binalis</i> (Ehr.) Grun. in two acid lakes in Galloway, Scotland by R.J. Flower	45
Part two: Extant floras	
6. Phytoplankton in selected LaCloche (Ontario) lakes, pH 4.2–7.0, with special reference to algae as indicators of chemical characteristics by P.M. Stokes & Y.K. Yung	57
7. The representation of living diatom communities in deep-water sedimentary diatom assemblages in two Maine (U.S.A.) lakes by D.M. DeNicola	73
8. Spatial and temporal variability in periphytic diatom communities: Palaeoecological significance in an acidified lake by V.J. Jones & R.J. Flower	87
Part three: Paleolimnological applications	
9. Relationships between diatom assemblages in lake surface-sediments and limnological characteristics in southern Norway by D.S. Anderson, R.B. Davis & F. Berge	97

10. Diatom evidence for neutralization in acid surface mine lakes by R.B. Brugam & M. Lusk	115
11. The recent history of a naturally acidic lake (Cone Pond, N.H.) by J. Ford	131
12. East african diatoms and water pH by F. Gasse	149
13. Acidification of small lakes in Finland documented by sedimentary diatom and chrysophycean remains by K. Tolonen, M. Liukkonen, R. Harjula & A. Pätälä	169
14. Applications of multivariate techniques to infer limnological conditions from diatom assemblages by P. Huttunen & J. Meriläinen	201
15. A sedimentary diatom record of severe acidification in Lake Blåmissusjön, N. Sweden, through natural soil processes by I. Renberg	213
16. Diatom responses to acidification and lime treatment in a clear-water lake: Comparison of two methods of analysis of a diatom stratigraphy by H. Simola	221
17. Acidification of four lakes in the Federal Republic of Germany as reflected by diatom assemblages, cladoceran remains and sediment chemistry by K. Arzet, D. Krause-Dellin & C. Steinberg	227
18. Late-glacial and Holocene acidity changes in Adirondack (N.Y.) lakes by D.R. Whitehead, D.F. Charles, S.J. Jackson, S.E. Reed & M.C. Sheehan	251
19. Chrysophycean microfossils as indicators of lakewater pH by J.P. Smol	275

Part four: Overview

20. The use of sedimentary remains of siliceous algae for inferring past chemistry of lake water – problems, potential and research needs by R.B. Davis & J.P. Smol	291
