# Differential Equations with Discontinuous Righthand Sides

edited by

F. M. Arscott

**KLUWER ACADEMIC PUBLISHERS**

**DORDRECHT / BOSTON / LONDON**

## CONTENTS

<b>Series Editor's Preface</b>	v
<b>Preface</b>	ix
<b>Introduction</b>	1
<b>Chapter 1</b>	
<b>Equations with the Right-Hand Side Continuous in <math>x</math> and Discontinuous in <math>t</math></b>	3
1. Carathéodory Differential Equations	3
2. Equations with Distributions Involved as Summands	17
3. Differential Equations with Distributions in Coefficients	29
<b>Chapter 2</b>	
<b>Existence and General Properties of Solutions of Discontinuous Systems</b>	48
4. Definitions of Solution	48
5. Convex Sets and Set-Valued Functions	59
6. Differential Inclusions	67
7. Existence and Properties of Solutions	75
8. Dependence of Solution on Initial Data and on the Right-Hand Side of the Equation	87
9. Change of Variables	99
10. Sufficient Conditions for Uniqueness	106
11. Variation of Solutions	117
<b>Chapter 3</b>	
<b>Basic Methods of Qualitative Theory</b>	123
12. Trajectories of Autonomous Systems	123
13. Properties of Trajectories in a Plane	133
14. Bounded and Periodic Solutions	142
15. Stability	152
<b>Chapter 4</b>	
<b>Local Singularities of Two-Dimensional Systems</b>	175
16. Linear Singularities	175
17. Topological Classification of Singular Points	190

18. Structurally Stable and Structurally Unstable Systems	205
19. Singular Points on a Line of Discontinuity	217
20. Singular Points on an Intersection of Lines of Discontinuity	250
<b>Chapter 5</b>	
<b>Local Singularities of Three-Dimensional and Multidimensional Systems</b>	259
21. Basic Types of Singularities. Two-Dimensional Singularities	259
22. Linear and Point Singularities on a Surface of Discontinuity	268
23. Singularities on an Intersection of Surfaces of Discontinuity	285
<b>References</b>	291
<b>Subject Index</b>	303
