

DIFFERENTIAL GEOMETRY AND SYMMETRIC SPACES

SIGURDUR HELGASON

AMS CHELSEA PUBLISHING
American Mathematical Society • Providence, Rhode Island

CONTENTS

PREFACE TO THE NEW PRINTING	ix
PREFACE	xi
SUGGESTIONS TO THE READER	xiii

CHAPTER I

Elementary Differential Geometry

1. Manifolds	2
2. Tensor Fields	8
1. <i>Vector Fields and 1-Forms</i>	8
2. <i>The Tensor Algebra</i>	13
3. <i>The Grassmann Algebra</i>	17
4. <i>Exterior Differentiation</i>	19
3. Mappings	22
1. <i>The Interpretation of the Jacobian</i>	22
2. <i>Transformation of Vector Fields</i>	24
3. <i>Effect on Differential Forms</i>	25
4. Affine Connections	26
5. Parallelism	28
6. The Exponential Mapping	32
7. Covariant Differentiation	40
8. The Structural Equations	43
9. The Riemannian Connection	47
10. Complete Riemannian Manifolds	55
11. Isometries	60
12. Sectional Curvature	64
13. Riemannian Manifolds of Negative Curvature	70
14. Totally Geodesic Submanifolds	78
Exercises	82
Notes	85

CHAPTER II

Lie Groups and Lie Algebras

1. The Exponential Mapping	88
1. <i>The Lie Algebra of a Lie Group</i>	88
2. <i>The Universal Enveloping Algebra</i>	90
3. <i>Left Invariant Affine Connections</i>	92
4. <i>Taylor's Formula and Applications</i>	94
2. Lie Subgroups and Subalgebras	102
3. Lie Transformation Groups	110
4. Coset Spaces and Homogeneous Spaces	113

5. The Adjoint Group	116
6. Semisimple Lie Groups	121
Exercises	125
Notes	128

CHAPTER III

Structure of Semisimple Lie Algebras

1. Preliminaries	130
2. Theorems of Lie and Engel	133
3. Cartan Subalgebras	137
4. Root Space Decomposition	140
5. Significance of the Root Pattern	146
6. Real Forms	152
7. Cartan Decompositions	156
Exercises	160
Notes	161

CHAPTER IV

Symmetric Spaces

1. Affine Locally Symmetric Spaces	163
2. Groups of Isometries	166
3. Riemannian Globally Symmetric Spaces	170
4. The Exponential Mapping and the Curvature	179
5. Locally and Globally Symmetric Spaces	183
6. Compact Lie Groups	188
7. Totally Geodesic Submanifolds. Lie Triple Systems	189
Exercises	191
Notes	191

CHAPTER V

Decomposition of Symmetric Spaces

1. Orthogonal Symmetric Lie Algebras	193
2. The Duality	199
3. Sectional Curvature of Symmetric Spaces	205
4. Symmetric Spaces with Semisimple Groups of Isometries	207
5. Notational Conventions	208
6. Rank of Symmetric Spaces	209
Exercises	213
Notes	213

CHAPTER VI

Symmetric Spaces of the Noncompact Type

1. Decomposition of a Semisimple Lie Group	214
2. Maximal Compact Subgroups and Their Conjugacy	218
3. The Iwasawa Decomposition	219
4. Nilpotent Lie Groups	225

CONTENTS

vii

5. Global Decompositions	234
6. The Complex Case	237
Exercises	239
Notes	240

CHAPTER VII

Symmetric Spaces of the Compact Type

1. The Contrast between the Compact Type and the Noncompact Type	241
2. The Weyl Group	243
3. Conjugate Points. Singular Points. The Diagram	250
4. Applications to Compact Groups	254
5. Control over the Singular Set	260
6. The Fundamental Group and the Center	264
7. Application to the Symmetric Space U/K	271
8. Classification of Locally Isometric Spaces	273
9. Appendix. Results from Dimension Theory	275
Exercises	278
Notes	280

CHAPTER VIII

Hermitian Symmetric Spaces

1. Almost Complex Manifolds	281
2. Complex Tensor Fields. The Ricci Curvature	285
3. Bounded Domains. The Kernel Function	293
4. Hermitian Symmetric Spaces of the Compact Type and the Noncompact Type	301
5. Irreducible Orthogonal Symmetric Lie Algebras	306
6. Irreducible Hermitian Symmetric Spaces	310
7. Bounded Symmetric Domains	311
Exercises	322
Notes	325

CHAPTER IX

On the Classification of Symmetric Spaces

1. Reduction of the Problem	326
2. Automorphisms	331
3. Involutive Automorphisms	334
4. É. Cartan's List of Irreducible Riemannian Globally Symmetric Spaces	339
1. Some Matrix Groups and Their Lie Algebras	339
2. The Simple Lie Algebras over \mathbb{C} and Their Compact Real Forms. The Irreducible Riemannian Globally Symmetric Spaces of Type II and Type IV	346
3. The Involutive Automorphisms of Simple Compact Lie Algebras. The Irreducible Globally Symmetric Spaces of Type I and Type III	347
4. Irreducible Hermitian Symmetric Spaces	354
5. Two-Point Homogeneous Spaces. Symmetric Spaces of Rank One. Closed Geodesics	355
Exercises	358
Notes	359
