

Author/ Affiliation

Editor(s): Filippo Stanco; Sebastiano Battiato, *University of Catania, Italy*;
Giovanni Gallo, *University of Catania, Italy*

Series:

- Digital Imaging and Computer Vision

Features:

- Surveys the latest techniques, algorithms, and solutions for digital imaging and computer graphics-driven cultural heritage preservation
- Summarizes recent advances in 3D reconstruction of archaeological sites
- Provides an overview of the state-of-the-art research in contributed articles from recognized experts in the field
- Contains numerous examples, illustrations and figures summarizing the results of experimentation on real data
- Includes a table of contents, illustrations and figures, summary, and bibliography for further reading in each chapter

About the Book:

This edition presents the most prominent topics and applications of digital image processing, analysis, and computer graphics in the field of cultural heritage preservation. The text assumes prior knowledge of digital image processing and computer graphics fundamentals. Each chapter contains a table of contents, illustrations, and figures that elucidate the presented concepts in detail, as well as a chapter summary and a bibliography for further reading.

Well-known experts cover a wide range of topics and related applications, including spectral imaging, automated restoration, computational reconstruction, digital reproduction, and 3D models.

Select Content:

Experiencing the Past: Computer Graphics in Archaeology, F.

Stanco and D. Tanasi

The Past and the Future: Archaeology and Computer Science
From the Field to the Screen: 3D computer graphics and the Archaeological Heritage

The Archeomatica Project
Archaeological 3D Modeling
Haghia Triada, Crete

Polizzello Mountain, Sicily
Digital Restoration

Dealing with Image Data in Archaeology: New Perspectives

Using Digital 3D Models for Study and Restoration of Cultural

Heritage Artifacts, M. Dellepiane, M. Callieri, M. Corsini, and R. Scopigno

Visual Communication of Art

Art Catalogs and Digital Repositories

Digital 3D as a Tool for Art Scholars

Physical Reproduction from the Digital Model

Virtual Reconstruction and Reassembly

Supporting the Restoration Process

Processing Sampled 3D Data: Reconstruction and Visualization

Technologies, M. Callieri, M. Dellepiane, P. Cignoni, and R. Scopigno

Basic Geometric Processing of Scanned Data

Color Sampling and Processing

MeshLab: An Open Source Tool for Processing 3D Scanned Data

Efficient Visualization and Management of Sampled 3D Data

3D Digitization: How to Improve Current Procedures and Make It More

Practical and Successful

ARC3D: A PublicWeb Service that Turns Photos into 3D Models, D.

Tingdahl, M. Vergauwen, and L. Van Gool

System Overview

Automatic Reconstruction Pipeline

Practical Guidelines for Shooting Images

Case Study: Reconstruction of the Mogao Caves of Dunhuang

Examples

Accurate and Detailed Image-Based 3D Documentation of Large Sites and Complex Objects, F. Remondino

Reality-Based 3D Modeling

Photogrammetry

Digitizing the Parthenon: Estimating Surface Reflectance under Measured Natural Illumination, P. Debevec, C. Tchou, A. Gardner, T.

Hawkins, C. Poullis, J. Stumpfel, A. Jones, N. Yun, P. Einarsson, T.

Lundgren, M. Fajardo P. Martinez

Background and Related Work

Data Acquisition and Calibration

Reflectometry

Results

Discussion and Future Work

Applications of Spectral Imaging and Reproduction to Cultural

Heritage, S. Bianco, A. Colombo, F. Gasparini, R. Schettini, S. Zuffi

Colorimetric and Multispectral Color Imaging

Capturing a Multispectral Image

Imaging and Signal Processing Techniques

Recovery Multispectral Information from RGB Images

Storing a Multispectral Image

Evaluating System Performance

Multispectral Image Reproduction

Final Remarks

Did Early Renaissance Painters Trace Optically Projected Images?

The Conclusion of Independent Scientists, Art Historians, and

Artists, D.G. Stork, J. Collins, M. Duarte, Y. Furuichi, D. Kale, A. Kulkarni,

M.D. Robinson, S.J. Schechner, C.W. Tyler, N.C. Williams

The Projection Theory

Image Evidence

Documentary Evidence

Material Culture and Re-Enactments

Non-Optical Contexts

The "Value" in Tracing

Scholarly Consensus

A Computer Analysis of the Mirror in Hans Memling's Virgin and

Child and Maarten van Nieuwenhove, S. Savarese, D.G. Stork, A. Del

Pozo, R. Spronk

Memling's Diptych

Computer Vision Analysis

Modeling Reflections Off a Mirror Surface

Results

Virtual Restoration of Antique Books and Photographs, F. Stanco, A.

Restrepo Palacios, G. Ramponi

Detection of the Defects

Virtual Restoration of Antique Photographic Prints Affected by Foxing and Water Blotches

Restoration of the Fragmented Glass Plate Photographs

Restoration of Yellowing and Foxing in Antique Books

On Image Quality
