

Electric Power Distribution Reliability

SECOND EDITION

Richard E. Brown

CRC Press
Taylor & Francis Group

Boca Raton London New York

CRC Press is an imprint of the
Taylor & Francis Group, an **Informa** business

Contents

<i>Series Introduction</i>	<i>xi</i>
<i>Preface</i>	<i>xiii</i>
<i>Author</i>	<i>xvii</i>
1. DISTRIBUTION SYSTEMS	1
1.1. Generation, Transmission, and Distribution	1
1.2. Distribution Substations	8
1.3. Primary Distribution Systems	15
1.4. Secondary Distribution Systems	26
1.5. Load Characteristics	28
1.6. Distribution Operations	33
1.7. Study Questions	38
References	38
2. RELIABILITY METRICS AND INDICES	41
2.1. Power Quality, Reliability, and Availability	41
2.2. Reliability Indices	51
2.3. Customer Cost of Reliability	82
2.4. Reliability Targets	90
2.5. History of Reliability Indices	97
2.6. Study Questions	102
References	102

3. INTERRUPTION CAUSES	107
3.1. Equipment Failures	107
3.2. Animals	127
3.3. Severe Weather	133
3.4. Trees	150
3.5. Human Factors	155
3.6. Most Common Causes	157
3.7. Study Questions	159
References	159
4. COMPONENT MODELING	163
4.1. Component Reliability Parameters	163
4.2. Failure Rates and Bathtub Curves	165
4.3. Probability Distribution Functions	167
4.4. Fitting Curves to Measured Data	176
4.5. Component Reliability Data	182
4.6. Study Questions	188
References	188
5. SYSTEM MODELING	191
5.1. System Events and System States	192
5.2. Event Independence	195
5.3. Network Modeling	196
5.4. Markov Modeling	200
5.5. Analytical Simulation for Radial Systems	206
5.6. Analytical Simulation for Network Systems	232
5.7. Monte Carlo Simulation	241
5.8. Other Methodologies	258
5.9. Study Questions	261
References	262
6. SYSTEM ANALYSIS	265
6.1. Model Reduction	265
6.2. System Calibration	272
6.3. System Analysis	277
6.4. Improving Reliability	285
6.5. Storm Hardening	301
6.6. Conversion of Overhead to Underground	307
6.7. Economic Analysis	317
6.8. Marginal Benefit-to-Cost Analysis	325
6.9. Comprehensive Example	333
6.10. Study Questions	356
References	357

7. SYSTEM OPTIMIZATION	361
7.1. Overview of Optimization	361
7.2. Discrete Optimization Methods	371
7.3. Knowledge-Based Systems	385
7.4. Optimization Applications	392
7.5. Final Thoughts on Optimization	418
7.6. Study Questions	421
References	422
8. AGING INFRASTRUCTURE	425
8.1. Equipment Aging	425
8.2. Equipment Age Profiles	426
8.3. Population Aging Behavior	428
8.4. Age and Increasing Failure Rates	432
8.5. Inspection, Repair, and Replacement	438
8.6. State of the Industry	441
8.7. Final Thoughts	450
8.8. Study Questions	451
References	452
<i>Index</i>	455
