

# **Electrochemistry at Semiconductor and Oxidized Metal Electrodes**

**S. Roy Morrison**

*SRI International  
(formerly Stanford Research Institute)  
Menlo Park, California*

**PLENUM PRESS**

**NEW YORK AND LONDON**

---

## Contents

<b>Notation . . . . .</b>	<b>xi</b>
<b>1. The Solid and the Solution . . . . .</b>	<b>1</b>
1.1. The Solid . . . . .	1
1.1.1. Donors, Acceptors, and Traps . . . . .	1
1.1.2. Energy Levels at the Surface . . . . .	11
1.1.3. Conductance in Solids . . . . .	16
1.2. The Solution . . . . .	18
1.2.1. Introduction . . . . .	18
1.2.2. The Electrode Fermi Energy as a Function of the Redox Couples in Solution . . . . .	24
1.2.3. The Relation between the Hydrogen and the Vacuum Scales of Energy . . . . .	29
1.2.4. Fluctuating Energy Levels in Solution . . . . .	31
1.2.5. The Energy Levels Associated with Two-Equivalent Ions	44
1.2.6. Conductance in Liquids . . . . .	47
<b>2. The Solid/Liquid Interface . . . . .</b>	<b>49</b>
2.1. Surface Ions and Their Energy Levels . . . . .	49
2.1.1. Adsorption . . . . .	49
2.1.2. Surface States at the Solid/Liquid Interface . . . . .	54
2.2. Double Layers at the Solid/Liquid Interface . . . . .	56
2.2.1. General . . . . .	56
2.2.2. The Gouy Layer . . . . .	59
2.2.3. The Helmholtz Double Layer . . . . .	60
2.2.4. The Space Charge Double Layer in the Semiconductor .	65
2.3. Theoretical Predictions of the Energy Levels of Band Edges . . . . .	72
2.4. The Band Model of the Solid/Solution Interface . . . . .	75
<b>3. Theory of Electron and Hole Transfer . . . . .</b>	<b>79</b>
3.1. Introduction . . . . .	79

3.1.1. General . . . . .	79
3.1.2. The Activation Energy in Electrode Reactions . . . . .	80
3.2. Classical Model . . . . .	83
3.3. The Energy Level Model of Charge Transfer . . . . .	88
3.3.1. General . . . . .	88
3.3.2. The Metal Electrode . . . . .	90
3.3.3. The Semiconductor Electrode . . . . .	93
3.4. Qualitative Description of Electrode Processes Using the Band Model . . . . .	107
3.4.1. The Behavior of the Metal Electrode . . . . .	107
3.4.2. The Behavior of the Semiconductor Electrode . . . . .	110
3.4.3. The Transition between Semiconductor and Metallic Behavior . . . . .	113
<b>4. Measurement Techniques . . . . .</b>	<b>119</b>
4.1. Capacity Measurements . . . . .	120
4.1.1. Introduction . . . . .	120
4.1.2. Measurement Theory . . . . .	121
4.1.3. Analysis . . . . .	126
4.1.4. Complex Mott–Schottky Plots . . . . .	133
4.1.5. Determination of Band Edges . . . . .	137
4.2. Measurements of the Current/Voltage Characteristics . . . . .	138
4.2.1. General Techniques: Voltammetry . . . . .	138
4.2.2. Rotating Electrodes . . . . .	142
4.2.3. Illumination . . . . .	144
4.3. Other Techniques . . . . .	146
4.3.1. Techniques for $V_s$ Measurement . . . . .	146
4.3.2. Techniques to Determine Surface Species or Phases . . . . .	148
4.3.3. Techniques to Study Electrode Reactions . . . . .	149
<b>5. The Properties of the Electrode and Their Effect on Electrochemical Measurements . . . . .</b>	<b>153</b>
5.1. The Behavior of the Perfect Crystal . . . . .	154
5.1.1. The Helmholtz Double Layer: The Surface Charges on the Electrode . . . . .	154
5.1.2. The Space Charge Region of the Perfect Crystal . . . . .	161
5.2. The Behavior of Electrode Defects . . . . .	164
5.2.1. Introduction . . . . .	164
5.2.2. Deviations of Mott–Schottky Plots Due to Bulk Flaws . . . . .	166
5.2.3. Current Flow Associated with Bulk Flaws . . . . .	177
5.3. Observed Flat Band Potentials for Various Semiconductors . . . . .	186
<b>6. Observations of Charge Transfer at an Inert Semiconductor Electrode . . . . .</b>	<b>189</b>
6.1. Introduction . . . . .	189
6.2. Majority Carrier Capture . . . . .	192

6.2.1. Direct Carrier Transfer to Ions in Solution . . . . .	193
6.2.2. Indirect Electron Transfer to Ions in Solution . . . . .	200
6.3. Minority Carrier Capture . . . . .	208
6.3.1. Minority Carrier Capture on Two-Equivalent Species: Radical Formation and Current Doubling . . . . .	209
6.3.2. Minority Carrier Capture by One-Equivalent Ions . . . . .	220
6.3.3. Photocatalysis . . . . .	222
6.4. Intrinsic Surface States and Recombination Centers . . . . .	227
6.4.1. Intrinsic Surface States as Carrier Transfer Centers . .	229
6.4.2. Intrinsic Surface States and Ions in Solution as Recombination Centers . . . . .	233
6.5. Carrier Injection . . . . .	238
6.5.1. Direct Electron and Hole Injection . . . . .	238
6.5.2. Injection by Tunneling . . . . .	243
6.5.3. Injection by Optically Excited Ions: Dye Injection . .	246
6.6. High-Current, High-Voltage Processes . . . . .	249
6.6.1. Introduction . . . . .	249
6.6.2. High Currents with Accumulation Layers . . . . .	251
6.6.3. Tunneling and Breakdown on Non-Transition-Metal Semiconductors . . . . .	253
6.6.4. Practical Electrodes . . . . .	254
6.7. Analysis of Complicated Electrode Reactions using the Tools of Semiconductor Electrochemistry . . . . .	256
6.7.1. The Photocatalytic Oxidation of Formic Acid . . . . .	257
6.7.2. Analysis of the Energy Levels of Two-Equivalent Species	259
6.7.3. The Reduction of Iodine on CdS . . . . .	261
<b>7. Chemical Transformation in the Electrode Reaction . . . . .</b>	<b>263</b>
7.1. Introduction . . . . .	263
7.2. Inner Sphere Changes during Redox Reactions at an Inert Electrode . . . . .	265
7.3. Adsorption onto and Absorption into the Electrode . . . . .	270
7.3.1. Adsorption of Water, Hydrogen, and Oxygen . . . . .	271
7.3.2. Adsorption of Electrolyte Ions . . . . .	272
7.3.3. Action of Deposited Species . . . . .	275
7.3.4. Movement of Impurities and Defects into the Electrode .	277
7.4. Corrosion . . . . .	279
7.4.1. Introduction . . . . .	279
7.4.2. Theory and Observations of Semiconductor Corrosion .	283
7.4.3. Stabilizing Agents to Prevent Corrosion . . . . .	295
<b>8. Coated Electrodes . . . . .</b>	<b>299</b>
8.1. Introduction . . . . .	299
8.1.1. The Band Model for Oxide Films . . . . .	300
8.1.2. Thin Films . . . . .	306
8.1.3. The Structure of Thick Films . . . . .	309

8.2.	Current Transport through Oxide Films . . . . .	315
8.2.1.	Thin Oxide Layers . . . . .	315
8.2.2.	Model of Electronic Conduction through Thick Coherent Layers . . . . .	318
8.2.3.	Semiconducting Oxide Layers on Metal Electrodes . .	324
8.2.4.	Insulating Layers on Metal and Semiconductor Electrodes . . . . .	328
8.3.	Deposition of Reaction Products on Semiconductor Electrodes .	331
<b>9.</b>	<b>Applications of Semiconductor Electrodes . . . . .</b>	<b>335</b>
9.1.	Solar Energy Conversion . . . . .	335
9.1.1.	Introduction . . . . .	335
9.1.2.	Photovoltaic Cells . . . . .	338
9.1.3.	Conversion of Optical to Chemical Energy . . . . .	342
9.1.4.	Corrosion of PEC Cells . . . . .	345
9.1.5.	The Future Potential of PEC Solar Cells . . . . .	347
9.2.	Electrocatalysis on Semiconductors . . . . .	348
9.2.1.	General . . . . .	348
9.2.2.	Surface State Additives and Narrow Bands in Electrocatalysis . . . . .	352
9.3.	New Devices . . . . .	354
9.4.	Electropolishing of Semiconductors . . . . .	355
<b>REFERENCES</b>	. . . . .	<b>359</b>
<b>REFERENCES TO REVIEW ARTICLES AND BOOKS</b>	. . . . .	<b>374</b>
