|----------|---|------------|
| 2 | Introduction to Waves | 55 |
| 2.1 | Sinusoidal Uniform Plane Waves | 55 |
| 2.1.1 | Uniform Plane Waves in Lossless Simple Media | 56 |
| 2.1.2 | Uniform Plane Waves with an Arbitrary Direction of Propagation | 59 |
| 2.1.3 | Plane Waves in Lossy Media: Damped Waves | 63 |
| 2.2 | Polarization of Plane Waves | 67 |
| 2.2.1 | Combination of Two Mutually Perpendicular Linearly Polarized Waves | 68 |
| 2.2.2 | Combination of Two Opposite Circularly Polarized Waves | 72 |
| 2.2.3 | Stokes Parameters and the Poincaré Sphere | 74 |
| 2.2.4 | The Degree of Polarization | 76 |
| 2.3 | Normal Reflection and Transmission of Plane Waves | 76 |
| 2.3.1 | Normal Incidence and Reflection at a Perfect-Conductor Surface, Standing Waves | 77 |
| 2.3.2 | Normal Incidence, Reflection and Transmission at Non-conducting Dielectric Boundary, Traveling-Standing Waves | 80 |
| 2.4 | Oblique Reflection and Refraction of Plane Waves | 84 |
| 2.4.1 | Snell’s Law | 84 |
| 2.4.2 | Oblique Incidence and Reflection at a Perfect-Conductor Surface | 86 |
| 2.4.3 | Fresnel’s Law, Reflection and Refraction Coefficients | 91 |
| 2.4.4 | The Brewster Angle | 96 |
| 2.4.5 | Total Reflection and the Critical Angle | 97 |
| 2.4.6 | Decaying Fields and Slow Waves | 99 |
| 2.4.7 | The Goos–Hänchen Shift | 102 |
| 2.4.8 | Reflection Coefficients at Dielectric Boundary | 102 |
| 2.4.9 | Reflection and Transmission of Plane Waves at the Boundary Between Lossless and Lossy Media | 104 |
| 2.5 | Transmission of Impedance for Electromagnetic Waves | 107 |
| 2.6 | Dielectric Layers and Impedance Transducers | 109 |
| 2.6.1 | Single Dielectric Layer, The $\lambda/4$ Impedance Transducer | 109 |
| 2.6.2 | Multiple Dielectric Layer, Multi-Section Impedance Transducer | 111 |
| 2.6.3 | A Multi-Layer Coating with an Alternating Indices. | 111 |
| | Problems | 114 |
| 3 | Transmission-Line Theory and Network Theory for Electromagnetic Waves | 117 |
| 3.1 | Basic Transmission Line Theory | 117 |
| 3.1.1 | The Telegraph Equations | 118 |
| 3.1.2 | Solution of the Telegraph Equations | 119 |
| 3.2 | Standing Waves in Lossless Lines | 121 |

| | | |
|----------|---|------------|
| 3.2.1 | The Reflection Coefficient, Standing Wave Ratio and Impedance in a Lossless Line | 121 |
| 3.2.2 | States of a Transmission Line | 126 |
| 3.3 | Transmission-Line Charts | 130 |
| 3.3.1 | The Smith Chart | 130 |
| 3.3.2 | The Schimdt Chart | 133 |
| 3.3.3 | The Carter Chart | 134 |
| 3.3.4 | Basic Applications of the Smith Chart | 134 |
| 3.4 | The Equivalent Transmission Line of Wave Systems | 134 |
| 3.5 | Introduction to Network Theory | 136 |
| 3.5.1 | Network Matrix and Parameters of a Linear Multi-Port Network | 136 |
| 3.5.2 | The Network Matrices of the Reciprocal, Lossless, Source-Free Multi-Port Networks | 142 |
| 3.6 | Two-Port Networks | 146 |
| 3.6.1 | The Network Matrices and the Parameters of Two-Port Networks | 146 |
| 3.6.2 | The Network Matrices of the Reciprocal, Lossless, Source-Free and Symmetrical Two-Port Networks | 149 |
| 3.6.3 | The Working Parameters of Two-Port Networks | 153 |
| 3.6.4 | The Network Parameters of Some Basic Circuit Elements | 155 |
| 3.7 | Impedance Transducers | 161 |
| 3.7.1 | The Network Approach to the $\lambda/4$ Anti-Reflection Coating and the $\lambda/4$ Impedance Transducer | 161 |
| 3.7.2 | The Double Dielectric Layer, Double-Section Impedance Transducers | 164 |
| 3.7.3 | The Design of a Multiple Dielectric Layer or Multi- Section Impedance Transducer | 166 |
| 3.7.4 | The Small-Reflection Approach | 171 |
| | Problems | 177 |
| 4 | Time-Varying Boundary-Value Problems | 179 |
| 4.1 | Uniqueness Theorem for Time-Varying-Field Problems | 180 |
| 4.1.1 | Uniqueness Theorem for the Boundary-Value Problems of Helmholtz's Equations | 180 |
| 4.1.2 | Uniqueness Theorem for the Boundary-Value Problems with Complicated Boundaries | 182 |
| 4.2 | Orthogonal Curvilinear Coordinate Systems | 185 |
| 4.3 | Solution of Vector Helmholtz Equations in Orthogonal Curvi- linear Coordinates | 188 |
| 4.3.1 | Method of Borgnis' Potentials | 188 |
| 4.3.2 | Method of Hertz Vectors | 194 |
| 4.3.3 | Method of Longitudinal Components | 195 |
| 4.4 | Boundary Conditions of Helmholtz's Equations | 198 |
| 4.5 | Separation of Variables | 199 |

| | | |
|----------|---|------------|
| 4.6 | Electromagnetic Waves in Cylindrical Systems | 201 |
| 4.7 | Solution of Helmholtz's Equations in Rectangular Coordinates | 205 |
| 4.7.1 | Set z as u_3 | 205 |
| 4.7.2 | Set x or y as u_3 | 208 |
| 4.8 | Solution of Helmholtz's Equations in Circular Cylindrical Coordinates | 209 |
| 4.9 | Solution of Helmholtz's Equations in Spherical Coordinates | 214 |
| 4.10 | Vector Eigenfunctions and Normal Modes | 219 |
| 4.10.1 | Eigenvalue Problems and Orthogonal Expansions | 220 |
| 4.10.2 | Eigenvalues for the Boundary-Value Problems of the Vector Helmholtz Equations | 222 |
| 4.10.3 | Two-Dimensional Eigenvalues in Cylindrical Systems | 224 |
| 4.10.4 | Vector Eigenfunctions and Normal Mode Expansion | 225 |
| 4.11 | Approximate Solution of Helmholtz's Equations | 228 |
| 4.11.1 | Variational Principle of Eigenvalues | 228 |
| 4.11.2 | Approximate Field-Matching Conditions | 230 |
| | Problems | 234 |
| 5 | Metallic Waveguides and Resonant Cavities | 235 |
| 5.1 | General Characteristics of Metallic Waveguides | 236 |
| 5.1.1 | Ideal-Waveguide Model | 237 |
| 5.1.2 | Propagation Characteristics | 237 |
| 5.1.3 | Dispersion Relations | 239 |
| 5.1.4 | Wave Impedance | 240 |
| 5.1.5 | Power Flow | 240 |
| 5.1.6 | Attenuation | 241 |
| 5.2 | General Characteristics of Resonant Cavities | 243 |
| 5.2.1 | Modes and Natural Frequencies of the Resonant Cavity | 243 |
| 5.2.2 | Losses in a Resonant Cavity, the Q Factor | 244 |
| 5.3 | Waveguides and Cavities in Rectangular Coordinates | 245 |
| 5.3.1 | Rectangular Waveguides | 245 |
| 5.3.2 | Parallel-Plate Transmission Lines | 256 |
| 5.3.3 | Rectangular Resonant Cavities | 259 |
| 5.4 | Waveguides and Cavities in Circular Cylindrical Coordinates | 264 |
| 5.4.1 | Sectorial Cavities | 264 |
| 5.4.2 | Sectorial Waveguides | 267 |
| 5.4.3 | Coaxial Lines and Coaxial Cavities | 268 |
| 5.4.4 | Circular Waveguides and Circular Cylindrical Cavities | 274 |
| 5.4.5 | Cylindrical Horn Waveguides and Inclined-Plate Lines | 282 |
| 5.4.6 | Radial Transmission Lines and Radial-Line Cavities | 285 |
| 5.5 | Waveguides and Cavities in Spherical Coordinates | 288 |
| 5.5.1 | Spherical Cavities | 288 |
| 5.5.2 | Biconical Lines and Biconical Cavities | 291 |
| 5.6 | Reentrant Cavities | 295 |
| 5.6.1 | Exact Solution for the Reentrant Cavity | 297 |

| | | |
|----------|---|------------|
| 5.6.2 | Approximate Solution for the Reentrant Cavity | 300 |
| 5.7 | Principle of Perturbation | 305 |
| 5.7.1 | Cavity Wall Perturbations | 305 |
| 5.7.2 | Material Perturbation of a Cavity | 308 |
| 5.7.3 | Cutoff Frequency Perturbation of a Waveguide | 311 |
| 5.7.4 | Propagation Constant Perturbation of a Waveguide | 312 |
| Problems | | 314 |
| 6 | Dielectric Waveguides and Resonators | 317 |
| 6.1 | Metallic Waveguide with Different Filling Media | 319 |
| 6.1.1 | The Possible TE and TM Modes | 319 |
| 6.1.2 | LSE and LSM Modes, HEM Modes | 322 |
| 6.2 | Symmetrical Planar Dielectric Waveguides | 327 |
| 6.2.1 | TM Modes | 328 |
| 6.2.2 | TE Modes | 330 |
