Table of Contents

Foreword	xiv
Preface	xvi
Acknowledgment	xvii

Section 1 Basic Theories

Chapter 1

Transmission Line Theories for the Analysis of Electromagnetic Transients in Coil Windings	1
<i>Akihiro Ametani, Doshisha University, Japan</i>	
<i>Teruo Ohno, Tokyo Electric Power Co., Japan</i>	

Chapter 2

Basic Methods for Analysis of High Frequency Transients in Power Apparatus Windings.....	45
<i>Juan A. Martinez-Velasco, Universitat Politècnica de Catalunya, Spain</i>	

Chapter 3

Frequency Characteristics of Transformer Windings	111
<i>Charles Q. Su, Charling Technology, Australia</i>	

Chapter 4

Frequency Characteristics of Generator Stator Windings.....	151
<i>Charles Q. Su, Charling Technology, Australia</i>	

Chapter 5

Ferroresonance in Power and Instrument Transformers	184
<i>Afshin Rezaei-Zare, Hydro One Networks Inc., Canada</i>	
<i>Reza Iravani, University of Toronto, Canada</i>	

Section 2 Modelling

Chapter 6

- Transformer Modelling for Impulse Voltage Distribution and Terminal Transient Analysis 239
Marjan Popov, Delft University of Technology, The Netherlands
Bjørn Gustavsen, SINTEF Energy Research, Norway
Juan A. Martinez-Velasco, Universitat Politècnica de Catalunya, Spain

Chapter 7

- Transformer Model for TRV at Transformer Limited Fault Current Interruption 321
Masayuki Hikita, Kyushu Institute of Technology, Japan
Hiroaki Toda, Kyushu Institute of Technology, Japan
Myo Min Thein, Kyushu Institute of Technology, Japan
Hisatoshi Ikeda, The University of Tokyo, Japan
Eiichi Haginomori, Independent Scholar, Japan
Tadashi Koshiduka, Toshiba Corporation, Japan

Chapter 8

- Z-Transform Models for the Analysis of Electromagnetic Transients in Transformers
and Rotating Machines Windings 343
Charles Q. Su, Charling Technology, Australia

Chapter 9

- Computer Modeling of Rotating Machines 376
J.J. Dai, Operation Technology, Inc., USA

Section 3 Applications

Chapter 10

- Lightning Protection of Substations and the Effects of the Frequency-Dependent
Surge Impedance of Transformers 398
Rafal Tarko, AGH University of Science and Technology, Poland
Wieslaw Nowak, AGH University of Science and Technology, Poland

Chapter 11

- Transformer Insulation Design Based on the Analysis of Impulse Voltage Distribution 438
Jos A.M. Veens, SMIT Transformatoren BV, The Netherlands

Chapter 12

- Detection of Transformer Faults Using Frequency Response Analysis with Case Studies 456
Nilanga Abeywickrama, ABB AB Corporate Research, Sweden

Chapter 13	
Partial Discharge Detection and Location in Transformers Using UHF Techniques	487
<i>Martin D. Judd, University of Strathclyde, UK</i>	
Chapter 14	
Detection and Location of Partial Discharges in Transformers Based on High Frequency Winding Responses.....	521
<i>B.T. Phung, University of New South Wales, Australia</i>	
Compilation of References	540
About the Contributors	561
Index	566
