# CONTENTS

<b>1</b>	<b>THE DEVELOPMENT OF AUTOMATED DIFFRACTION IN SCANNING AND TRANSMISSION ELECTRON MICROSCOPY</b> . . . . .	<b>1</b>
	David J. Dingley	
1.1	Abstract . . . . .	1
1.2	Preface . . . . .	1
1.3	The earliest work . . . . .	2
1.4	The first diffraction experiments in the SEM . . . . .	4
1.5	Computer assisted indexing of EBSD . . . . .	5
1.6	Fully automated indexing of EBSD patterns . . . . .	7
1.7	Orientation imaging microscopy . . . . .	7
1.8	EBSD image quality . . . . .	9
1.9	EBSD, spatial resolution . . . . .	11
1.10	EBSD for phase identification . . . . .	13
1.11	The move to the transmission electron microscope . . . . .	14
1.12	Conclusions . . . . .	16
<b>2</b>	<b>THEORETICAL FRAMEWORK FOR ELECTRON BACKSCATTER DIFFRACTION</b> . . . . .	<b>19</b>
	Valerie Randle	
2.1	Introduction . . . . .	19
2.2	Formation and interpretation of the EBSD Kikuchi patterns . . . . .	20
2.3	Crystallographic terms of reference for EBSD . . . . .	25
2.4	Descriptors of orientation and misorientation . . . . .	28
2.5	Concluding remarks . . . . .	30
<b>3</b>	<b>REPRESENTATIONS OF TEXTURE IN ORIENTATION SPACE</b> . . . . .	<b>31</b>
	Krishna Rajan	
3.1	Introduction . . . . .	31
3.2	Stereographic projections . . . . .	31
3.3	Pole figures from EBSD . . . . .	32
3.4	Inverse pole figures from EBSD . . . . .	33
3.5	Orientation distribution functions and Euler space . . . . .	34
3.6	Conclusions . . . . .	37

<b>4</b>	<b>RODRIGUES-FRANK REPRESENTATIONS OF CRYSTALLOGRAPHIC TEXTURE</b> .....	<b>39</b>
	Krishna Rajan	
4.1	Introduction .....	39
4.2	Geometrical characteristics of Rodrigues-Frank space .....	40
4.3	Fiber textures .....	42
4.4	Lattice symmetry-sample symmetry coupling .....	44
4.5	Crystallographic statistics and clustering in R-F space .....	46
4.6	Grain boundary texture .....	47
4.7	Conclusions .....	49
<b>5</b>	<b>FUNDAMENTALS OF AUTOMATED EBSD</b> .....	<b>51</b>
	Stuart I. Wright	
5.1	Abstract .....	51
5.2	Image processing .....	51
5.3	Zone axis indexing .....	53
5.4	Band detection .....	53
5.5	Automatic indexing .....	58
5.6	Structure definition .....	60
5.7	Calibration .....	61
<b>6</b>	<b>STUDIES ON THE ACCURACY OF ELECTRON BACKSCATTER DIFFRACTION MEASUREMENTS</b> .....	<b>65</b>
	Melik C. Demirel, Bassem S. El-Dasher, Brent L. Adams, and Anthony D. Rollett	
6.1	Abstract .....	65
6.2	Introduction .....	65
6.3	Definition of disorientation correlation function (DCF) .....	66
6.4	Accuracy of orientation measurements .....	68
6.5	Results .....	68
6.6	Discussion .....	73
6.7	Summary .....	74
<b>7</b>	<b>PHASE IDENTIFICATION USING ELECTRON BACKSCATTER DIFFRACTION IN THE SCANNING ELECTRON MICROSCOPE</b> .....	<b>75</b>
	Joseph R. Michael	
7.1	Introduction .....	75
7.2	Phase identification procedure .....	76
7.3	Examples of phase identification studies .....	78
7.4	Structure determination from EBSD patterns .....	80
7.5	Summary .....	88
<b>8</b>	<b>THREE-DIMENSIONAL ORIENTATION IMAGING</b> .....	<b>91</b>
	Dorte Juul Jensen	
8.1	Introduction .....	91
8.2	The 3D x-ray diffraction microscope .....	92
8.3	Orientation determination .....	94

8.4	Applications .....	96
8.5	Summary .....	102
<b>9</b>	<b>AUTOMATED ELECTRON BACKSCATTER DIFFRACTION: PRESENT STATE AND PROSPECTS .....</b>	<b>105</b>
	Robert A. Schwarzer	
9.1	Introduction .....	105
9.2	The interpretation of backscatter Kikuchi patterns .....	106
9.3	Experimental setup of a modern EBSD system .....	110
9.4	The components of an automated EBSD system .....	111
9.5	The evaluation of grain orientation data .....	120
<b>10</b>	<b>EBSD: BUYING A SYSTEM .....</b>	<b>123</b>
	Alwyn Eades	
10.1	Should you build your own system? .....	123
10.2	What camera should you use? .....	124
10.3	Which is the best microscope for EBSD? .....	124
10.4	Which software? .....	125
10.5	Software criteria .....	125
10.6	Conclusion .....	126
<b>11</b>	<b>HARDWARE AND SOFTWARE OPTIMIZATION FOR ORIENTATION MAPPING AND PHASE IDENTIFICATION .....</b>	<b>127</b>
	Patrick P. Camus	
11.1	Abstract .....	127
11.2	Background .....	127
11.3	Crystal orientation mapping optimizations .....	128
11.4	Phase identification optimization .....	131
11.5	EBSD options .....	133
11.6	Conclusions .....	133
<b>12</b>	<b>AN AUTOMATED EBSD ACQUISITION AND PROCESSING SYSTEM. ....</b>	<b>135</b>
	Pierre Rolland and Keith G. Dicks	
12.1	Introduction .....	135
12.2	Electron image and pattern acquisition .....	135
12.3	Data processing .....	140
<b>13</b>	<b>ADVANCED SOFTWARE CAPABILITIES FOR AUTOMATED EBSD .....</b>	<b>141</b>
	Stuart I. Wright, David P. Field, and David J. Dingley	
13.1	Introduction .....	141
13.2	Data collection .....	141
13.3	Data analysis .....	146
13.4	Summary .....	152

<b>14 STRATEGIES FOR ANALYZING EBSD DATASETS</b> .....	153
Wayne E. King, James S. Stölken, Mukul Kumar, and Adam J. Schwartz	
14.1 Introduction .....	153
14.2 Data analysis strategies: 2-D .....	153
14.3 Data analysis strategies: 3-D .....	165
<b>15 STRUCTURE-PROPERTY RELATIONS: EBSD-BASED MATERIAL-SENSITIVE DESIGN</b> .....	171
Brent L. Adams, Benjamin L. Henrie, Larry L. Howell, and Richard J. Balling	
15.1 Introduction .....	171
15.2 Structure-properties relationships .....	172
15.3 Material sensitive design .....	176
15.4 Summary and conclusions .....	179
<b>16 USE OF EBSD DATA IN MESOSCALE NUMERICAL ANALYSES</b> ....	181
Richard Becker and Hasso Weiland	
16.1 Introduction .....	181
16.2 Crystal plasticity model .....	182
16.3 Crystal model validation .....	187
16.4 Discussion .....	195
<b>17 CHARACTERIZATION OF DEFORMED MICROSTRUCTURES</b> .....	199
David P. Field and Hasso Weiland	
17.1 Introduction .....	199
17.2 Cold-rolled pure aluminum .....	201
17.3 Equal-channel extruded and cold-rolled copper .....	205
17.4 Friction stir welding in aluminum .....	207
17.5 Discussion .....	210
<b>18 ANISOTROPIC PLASTICITY MODELING INCORPORATING EBSD CHARACTERIZATION OF TANTALUM AND ZIRCONIUM</b> .....	213
John F. Bingert, Thomas A. Mason, George C. Kaschner, Paul J. Maudlin, and George T. Gray III	
18.1 Introduction .....	213
18.2 Tantalum .....	214
18.3 Zirconium .....	221
18.4 Conclusions .....	227
<b>19 MEASURING STRAINS USING ELECTRON BACKSCATTER DIFFRACTION</b> .....	231
Angus J. Wilkinson	
19.1 Scope of chapter .....	231
19.2 Introduction .....	231
19.3 Plastic deformation .....	233
19.4 Elastic deformation .....	238
19.5 Concluding remarks .....	244

<b>20</b>	<b>MAPPING RESIDUAL PLASTIC STRAIN IN MATERIALS USING ELECTRON BACKSCATTER DIFFRACTION</b> .....	247
	Edward M. Lehockey, Yang-Pi Lin, and Olev E. Lepik	
20.1	Introduction .....	247
20.2	Misorientation density distributions .....	248
20.3	Quantifying strains by misorientation density .....	250
20.4	Mapping the spatial distribution of strain fields .....	256
20.5	Applications .....	258
20.6	Summary .....	263
<b>21</b>	<b>EBSD CONTRA TEM CHARACTERIZATION OF A DEFORMED ALUMINUM SINGLE CRYSTAL</b> .....	265
	Xiaoxu Huang and Dorte Juul Jensen	
21.1	Introduction .....	265
21.2	Experimental procedures .....	267
21.3	Results .....	267
21.4	Discussions .....	274
21.5	Summary and general remark .....	275
<b>22</b>	<b>CONTINUOUS RECRYSTALLIZATION AND GRAIN BOUNDARIES IN A SUPERPLASTIC ALUMINUM ALLOY</b> .....	277
	Terry R. McNelley	
22.1	Introduction .....	277
22.2	The material and method of EBSD examination .....	279
22.3	The grain boundary character of Supral 2004 .....	281
22.4	Discussion .....	284
22.5	Conclusion .....	288
<b>23</b>	<b>ANALYSIS OF FACETS AND OTHER SURFACES USING ELECTRON BACKSCATTER DIFFRACTION</b> .....	291
	Valerie Randle	
23.1	Introduction .....	291
23.2	Investigation methodology .....	291
23.3	Data analysis .....	296
23.4	Three-dimensional microtexture .....	297
23.5	Concluding remarks .....	298
<b>24</b>	<b>EBSD OF CERAMIC MATERIALS</b> .....	299
	Jeffrey K. Farrer, Joseph R. Michael, and C. Barry Carter	
24.1	Introduction .....	299
24.2	Challenge of ceramic materials for EBSD .....	300
24.3	Examples of applications to ceramics .....	303
24.4	Similar problems .....	303
24.5	Special problems for ceramics .....	306
24.6	Thin-film reactions .....	308
24.7	Grain boundary migration .....	312
24.8	Grain boundary energies and grooving .....	314

24.9 Summary .....	315
24.10 Conclusions .....	316
<b>25 GRAIN BOUNDARY CHARACTER BASED DESIGN OF POLYCRYSTALLINE HIGH TEMPERATURE SUPERCONDUCTING WIRES .....</b>	<b>319</b>
Amit Goyal	
25.1 Introduction .....	319
25.2 Background .....	320
25.2 First generation HTS wires .....	322
25.2 Second generation HTS wires .....	328
25.6 Summary .....	333
INDEX .....	337
