Contents:

Figure S1. In vitro release of TCH from (a) TCH/HNTs powders and electrospun (b) TCH/PLGA (1 wt% TCH relative to PLGA) and (c) TCH/HNTs/PLGA (1 wt% HNTs relative to PLGA) nanofibrous mats. The samples were incubated in PBS buffer (pH = 7.4) at 37 °C.

**Figure S1.** In vitro release of TCH from (a) drug loaded TCH/HNTs powders and electrospun (b) TCH/PLGA (1 wt% TCH relative to PLGA) and (c) TCH/HNTs/PLGA (1 wt% HNTs relative to PLGA) nanofibrous mats. The samples were incubated in PBS buffer (pH = 7.4) at 37 °C.
