ELEMENTARY MATRIX ALGEBRA

Third Edition

FRANZ E. HOHN

DOVER PUBLICATIONS, INC.
Mineola, New York

CONTENTS

CHAPTER

1 Introduction to Matrix Algebra

1.1 Matrices 1
1.2 Equality of Matrices 2
1.3 Addition of Matrices 3
1.4 Commutative and Associative Laws of Addition 3
1.5 Subtraction of Matrices 4
1.6 Scalar Multiples of Matrices 6
1.7 The Multiplication of Matrices 7
1.8 The Properties of Matrix Multiplication 9
1.9 Exercises 13
1.10 Linear Equations in Matrix Notation 18
1.11 The Transpose of a Matrix 20
1.12 Symmetric, Skew-Symmetric, and Hermitian Matrices 22
1.13 Scalar Matrices 24
1.14 The Identity Matrix 26
1.15 The Inverse of a Matrix 26
1.16 The Product of a Row Matrix into a Column Matrix 29
1.17 Polynomial Functions of Matrices 30
1.18 Exercises 32
1.19 Partitioned Matrices 41
1.20 Exercises 46

2 Linear Equations

2.1 Linear Equations 51
2.2 Three Examples 52

2.3 Exercises 57
2.4 Equivalent Systems of Equations 60
2.5 The Echelon Form for Systems of Equations 63
2.6 Synthetic Elimination 66
2.7 Systems of Homogeneous Linear Equations 70
2.8 Exercises 73
2.9 Computation of the Inverse of a Matrix 75
2.10 Matrix Inversion by Partitioning 78
2.11 Exercises 82
2.12 Number Fields 83
2.13 Exercises 85
2.14 The General Concept of a Field 85
2.15 Exercises 88

3 Vector Geometry in $\mathscr{E}^3$

3.1 Geometric Representation of Vectors in $\mathscr{E}^3$ 90
3.2 Operations on Vectors 91
3.3 Isomorphism 94
3.4 Length, Direction, and Sense 94
3.5 Orthogonality of Two Vectors 97
3.6 Exercises 100
3.7 The Vector Equation of a Line 102
3.8 The Vector Equation of a Plane 105
3.9 Exercises 109
3.10 Linear Combinations of Vectors in $\mathscr{E}^3$ 111
3.11 Linear Dependence of Vectors; Bases 114
3.12 Exercises 118

4 Vector Geometry in n-Dimensional Space

4.1 The Real n-Space $\mathscr{R}^n$ 120
4.2 Vectors in $\mathscr{R}^n$ 121
4.3 Lines and Planes in $\mathscr{R}^n$ 122
4.4 Linear Dependence and Independence in $\mathscr{R}^n$ 125
4.5 Vector Spaces in $\mathscr{R}^n$ 126
4.6 Exercises 127
4.7 Length and the Cauchy-Schwarz Inequality 129
4.8 Angles and Orthogonality in $\mathscr{E}^n$ 132
4.9 Half-Lines and Directed Distances 134
4.10 Unitary n-Space 135

4.11 Exercises 138
4.12 Linear Inequalities 141
4.13 Exercises 147

5 Vector Spaces

5.1 The General Definition of a Vector Space 149
5.2 Linear Combinations and Linear Dependence 153
5.3 Exercises 159
5.4 Basic Theorems on Linear Dependence 164
5.5 Dimension and Basis 167
5.6 Computation of the Dimension of a Vector Space 172
5.7 Exercises 174
5.8 Orthonormal Bases 177
5.9 Exercises 180
5.10 Intersection and Sum of Two Vector Spaces 183
5.11 Exercises 186
5.12 Isomorphic Vector Spaces 187
5.13 Exercises 190

6 The Rank of a Matrix

6.1 The Rank of a Matrix 191
6.2 Basic Theorems About the Rank of a Matrix 195
6.3 Matrix Representation of Elementary Transformations 198
6.4 Exercises 204
6.5 Homogeneous Systems of Linear Equations 210
6.6 Nonhomogeneous Systems of Linear Equations 217
6.7 Exercises 221
6.8 Another Look at Nonhomogeneous Systems 229
6.9 The Variables One Can Solve for 231
6.10 Basic Solutions 234
6.11 Exercises 237

7 Determinants

7.1 The Definition of a Determinant 239
7.2 Some Basic Theorems 243
7.3 The Cofactor in det A of an Element of A 247
7.4 Cofactors and the Computation of Determinants 250
7.5 Exercises 253
7.6 The Determinant of the Product of Two Matrices 264

7.7 A Formula for A^{-1} 270
7.8 Determinants and the Rank of a Matrix 272
7.9 Solution of Systems of Equations by Using Determinants 274
7.10 A Geometrical Application of Determinants 278
7.11 Exercises 280
7.12 More About the Rank of a Matrix 288
7.13 Definitions 292
7.14 The Laplace Expansion 295
7.15 The Determinant of a Product of Two Square Matrices 299
7.16 The Adjoint Matrix 300
7.17 The Row-and-Column Expansion 302
7.18 The Diagonal Expansion of the Determinant of a Matrix 303
7.19 Exercises 305

8 Linear Transformations

8.1 Mappings 310
8.2 Linear Mappings 313
8.3 Some Properties of Linear Operators on Vector Spaces 317
8.4 Exercises 320
8.5 Linear Transformations of Coordinates 323
8.6 Transformation of a Linear Operator 331
8.7 Exercises 334
8.8 The Algebra of Linear Operators 340
8.9 Groups of Operators 342
8.10 Exercises 345
8.11 Unitary and Orthogonal Matrices 347
8.12 Exercises 348
8.13 Unitary Transformations 351
8.14 Orthogonal Transformations 353
8.15 The Eulerian Angles 354
8.16 The Triangularization of a Real Matrix 356
8.17 Exercises 360
8.18 Orthogonal Vector Spaces 361
8.19 Exercises 366
8.20 Projections 367
8.21 Orthogonal Projections in $\mathscr{U}^n$ 371
8.22 Exercises 373

9 The Characteristic Value Problem

9.1 Definition of the Characteristic Value Problem 375
9.2 Four Examples 377

9.3 Two Basic Theorems 381
9.4 Exercises 383
9.5 The Characteristic Polynomial and Its Roots 387
9.6 Similar Matrices 392
9.7 Exercises 393
9.8 The Characteristic Roots of a Hermitian Matrix 395
9.9 The Diagonal Form of a Hermitian Matrix 397
9.10 The Diagonalization of a Hermitian Matrix 400
9.11 Examples 401
9.12 Triangularization of an Arbitrary Matrix 403
9.13 Normal Matrices 404
9.14 Exercises 406
9.15 Characteristic Roots of a Polynomial Function of a Matrix 409
9.16 The Cayley-Hamilton Theorem 411
9.17 The Minimum Polynomial of a Matrix 413
9.18 Powers of Matrices 418
9.19 Exercises 419

10 Quadratic, Bilinear, and Hermitian Forms

10.1 Quadratic Forms 422
10.2 Diagonalization of Quadratic Forms 424
10.3 A Geometrical Application 425
10.4 Definite Forms and Matrices 428
10.5 Exercises 433
10.6 Lagrange's Reduction 438
10.7 Kronecker's Reduction 443
10.8 Sylvester's Law of Inertia for Real Quadratic Forms 445
10.9 A Necessary and Sufficient Condition for Positive Definiteness 449
10.10 An Important Example 452
10.11 Exercises 454
10.12 Pairs of Quadratic Forms 455
10.13 Values of Quadratic Forms 457
10.14 Exercises 462
10.15 Bilinear Forms 463
10.16 The Equivalence of Bilinear Forms 465
10.17 Cogredient and Contragredient Transformations 467
10.18 Exercises 469
10.19 Hermitian Forms 471
10.20 Definite Hermitian Forms 474
10.21 Exercises 474

APPENDIX

I The Notations Σ and Π 477

II The Algebra of Complex Numbers 491

BIBLIOGRAPHY 501
