Contents

Introduction	1
Chapter 1. Vibrational Relaxation of Adsorbed Particles	5
1.1. General Approach to Describing Vibrational Relaxation	5
1.2. Phonon Mechanism of Relaxation	8
1.2.1. Relationship between the Simple Perturbation Theory and the Adiabatic Approximation	9
1.2.2. One-Mode Approximation	11
1.2.3. Relaxation Caused by Correlation Potential Proportional to Displacement of Adsorbed Particle from Equilibrium	12
1.2.4. Relaxation Caused by Correlation Potential Proportional to Displacement of Surface Atom from Equilibrium	14
1.2.5. Results and Discussion	15
1.3. Vibrational Relaxation via Interaction with Conduction Electrons	18
1.3.1. Dipole Approximation	18
1.3.2. Hartree–Fock Theory	19
1.3.3. Density Functional Scheme	20
1.3.4. Anderson Model	21
1.3.5. Population Relaxation due to Electron–Hole Pair Excitation	22
1.3.6. Pure-Phase Relaxation due to Elastic Scattering of Conduction Electrons	24

1.3.7.	Pure-Phase Relaxation due to Electron-Hole Pair Scattering	25
1.3.8.	Results and Discussion	27
1.4.	Phenomenological Description of the Dynamics of Adsorbed Particles	29
1.4.1.	Langevin Equation	29
1.4.2.	Generalized Langevin Equation	32
1.4.3.	Fokker-Planck Equation	33
1.5.	Friction Coefficient	34
1.6.	Experimental Data	36
	References	42
 Chapter 2. Dynamics of Molecular Processes on Surfaces		45
2.1.	Transition State Theory	45
2.1.1.	Partition Functions	48
2.1.2.	Monomolecular Desorption	49
2.1.3.	Associative Desorption	51
2.1.4.	Bimolecular Reaction in the Adsorbed Layer; the Langmuir-Hinshelwood Mechanism	51
2.1.5.	Monomolecular Reactions in the Adsorbed Layer	52
2.1.6.	Surface Diffusion	52
2.1.7.	Monomolecular Adsorption	53
2.1.8.	Dissociative Adsorption	54
2.1.9.	Bimolecular Reaction: the Eley-Rideal Mechanism	54
2.1.10.	Summary of Results	55
2.1.11.	Some Experimental Results	56
2.2.	Dynamical Calculations	59
2.2.1.	Typical Experimental Results	59
2.2.2.	Dynamics of Activated Adsorption	62
2.2.3.	Dynamics of Activated Desorption	64
2.3.	Nonequilibrium Effects	68
2.3.1.	Rate Processes Limited by Coupling the Reaction Coordinate to the Bath	68
2.3.2.	Desorption Stimulated by Adsorption	71
2.3.3.	Using Energy of One Reaction to Accelerate Another Reaction	74
2.4.	Nonadiabatic Effects	75

2.5. Dynamics of Surface Diffusion	77
2.5.1. Phenomenology	78
2.5.2. Energy Exchange between Adsorbed Particle and the Solid	78
2.5.3. Effect of the Potential Energy Surface Topology on Diffusion	82
2.5.4. Results of Some Estimations	86
2.5.5. Relaxation of the Lattice during Activated Jumps of Adsorbed Particle	92
2.5.6. Tunnel Diffusion	92
2.5.7. Some Experimental Data	94
References	95
Chapter 3. Statistics of Adsorbed Particles	99
3.1. Lattice-Gas Model, Lateral Interactions	99
3.2. General Statistical Relations	102
3.3. Approximate Statistical Methods	103
3.3.1. Mean-Field (Bragg-Williams) Approximation	103
3.3.2. Quasi-Chemical (Bethe-Peierls) Approximation	108
3.3.3. Transfer-Matrix Technique	111
3.3.4. Renormalization-Group Method	113
3.3.5. Monte Carlo Simulations	115
3.4. Phase Diagrams of Adsorbed Particles	116
3.4.1. Notation of Surface Ordered Structures	117
3.4.2. Order Parameters	118
3.4.3. Universal Classes of Ordered Structures	118
3.4.4. Phase Diagrams	118
3.4.5. Critical Exponents	126
3.5. Adsorbate-Induced Surface Reconstruction	128
3.5.1. First-Order Phase Transitions	129
3.5.2. Phenomenological Description of Continuous Phase Transitions	133
3.5.3. Order-Disorder Phase Transitions	137
3.5.4. Displacive Phase Transitions	138
References	141

Chapter 4. Theory of Rate Processes on Uniform Surfaces	145
4.1. Introduction	145
4.2. General Kinetic Equations	147
4.2.1. Monomolecular Desorption	147
4.2.2. Monomolecular Adsorption	151
4.2.3. Associative Desorption	153
4.2.4. Dissociative Adsorption	154
4.2.5. The Eley–Rideal Reaction	156
4.2.6. The Langmuir–Hinshelwood Reaction	156
4.3. Comparison of Kinetic Equations Derived in Different Approximations	158
4.4. Effect of Precursor States on Adsorption and Desorption Kinetics	165
4.4.1. Monomolecular Adsorption and Desorption	167
4.4.2. Dissociative Adsorption	171
4.5. Apparent Arrhenius Parameters for Desorption	173
4.6. Effect of Order–Disorder Phase Transition in the Adlayer on Desorption	180
4.7. Average Energy of Desorption or Reaction Products	184
References	187
 Chapter 5. Kinetics of Rate Processes on Uniform Surfaces . . .	 191
5.1. Kinetics of Reactions under Steady-State Conditions	191
5.2. Thermal Desorption Spectra	194
5.2.1. Redhead’s Equations	195
5.2.2. Lateral Interactions	197
5.2.3. Island Formation	202
5.2.4. Diffusion into the Solid	206
5.2.5. Adsorbate-Induced Changes in the Surface	209
5.2.6. Real Systems	211
5.3. Isothermal Desorption	212
5.4. Kinetics of Phase Transitions in Adsorbed Overlayers	214
5.4.1. Experimental Data	216
5.4.2. First-Order Phase Transitions	219
5.4.3. Continuous Phase Transitions	221
References	227

Chapter 6. Kinetics of Some Heterogeneous Catalytic Reactions	231
6.1. General Remarks	231
6.2. CO Oxidation on Iridium	233
6.3. Hydrogen–Oxygen Reaction on Platinum	241
6.4. NO Decomposition on Transition Metals	245
6.5. Decomposition of HCOOH on Nickel	249
References	254
Chapter 7. Diffusion of Particles Adsorbed on Single Crystalline Surfaces	257
7.1. Diffusion at Low Coverages	258
7.2. Experimental Data	261
7.3. General Equations for Describing Diffusion at Finite Coverages	267
7.3.1. Diffusion in a Langmuir Layer	271
7.3.2. Diffusion of Interacting Particles. The Mean-Field Approximation	271
7.3.3. Diffusion of Interacting Particles. The Quasi-Chemical Approximation	272
7.3.4. Results of Calculations	273
7.3.5. Diffusion and Self-Diffusion	275
7.3.6. Relation between the Mobility and the Chemical Diffusion Coefficient	279
7.3.7. Kubo Equations	280
7.4. Review of Theoretical Results	281
7.5. Kinetics of Reactions Limited by Surface Diffusion	291
7.5.1. Non-Steady-State Kinetics of the Catalytic Reaction Limited by Surface Diffusion of Reactants to Active Sites	291
7.5.2. Steady-State Kinetics of the Catalytic Reaction Limited by Surface Diffusion to Active Sites	295
7.5.3. Effect of Limited Mobility of Adspecies on the Kinetics of Rate Processes on Solid Surfaces	299
References	300
Conclusion	303
Index	305
